gap: 1rem;	Space between grid or flex items without extra margins.
border: 1px solid var(--line);	Changes the visual order of a flex item without changing the source.
border-radius: 10px;	Rounds the corners.
border-radius: 12px;	The line around the element: width, style and colour.

Check your work

- Follows system setting by default
- Manual choice overrides
- Form controls also switch (color-scheme)
- Contrast good in both themes

Exercises

1. Remember the choice in localStorage.
2. Add a high-contrast theme.
3. Animate the switch with a view transition.

Theme data for this project

Field	Value
Business	Port Said Seafood
Tagline	Grilled fish straight from the boats
City	Port Said
Owner	Sherif Wahba
Brand colour	#0e7490
Accent colour	#ecfeff
Offers	Grilled sea bass (320 EGP); Shrimp tagine (280 EGP); Calamari (190 EGP); Fish soup (120 EGP)

Project 947: Light and dark theme switcher for Delta Kids Library

Theme: Delta Kids Library (Tanta) | Level 3 | Files: index.html, styles.css

Brief

Support the system colour scheme automatically and add a manual switch that sets a data attribute on the html element, all driven by custom properties.

Learning goals

- Use prefers-color-scheme and color-scheme
- Theme with custom properties
- Override with a data attribute set by a few lines of JavaScript

Elements and CSS used

HTML elements	CSS features
fieldset, legend, label, input type=radio, section, script	custom properties, @media (prefers-color-scheme), [data-theme], color-scheme, transition

Build guide

1. Define light variables in :root and dark ones inside a prefers-color-scheme media query.
2. Add [data-theme] overrides.
3. Use the variables for background, colour and cards.
4. Add the radio group.

5. Add the script that copies the chosen value to html's data-theme.
6. Test with your OS in dark mode.

Project 947: index.html

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="utf-8">
  <meta name="viewport" content="width=device-width, initial-scale=1">
  <title>Delta Kids Library - Themes</title>
  <link rel="stylesheet" href="styles.css">
</head>
<body>
  <main>
    <h1>Delta Kids Library</h1>
    <p>This page follows your system theme and also lets you choose
one.</p>
    <fieldset class="theme">
      <legend>Theme</legend>
      <label><input type="radio" name="theme" value="auto" checked>
Auto</label>
      <label><input type="radio" name="theme" value="light"> Light</
label>
      <label><input type="radio" name="theme" value="dark"> Dark</
label>
    </fieldset>
    <section class="card">
      <h2>Story hour</h2>
      <p>Ages 3 to 6, Saturdays. <a href="#">Read more</a></p>
    </section>
  </main>
  <script>
    document.querySelectorAll('input[name=theme]').forEach(r => r.
addEventListener('change', e => {
      document.documentElement.dataset.theme = e.target.value;
    }));
  </script>
</body>
</html>
```

Project 947: styles.css

```
*, *::before, *::after { box-sizing: border-box; }
:root { --brand: #ea580c; --accent: #fff7ed; --ink: #1b2431; --muted:
#5b6472; --line: #d9d9d9; }

a { color: var(--brand); }
```

Project 947 explained line by line

The important lines of index.html

Line	What it does
<!DOCTYPE html>	Declares modern HTML so the browser renders in standards mode.
<html lang="en">	Root element; lang tells screen readers and search engines the page language.
<meta charset="utf-8">	Character encoding: makes Arabic, accents and symbols display correctly.
<meta name="viewport" content="width=device-width, initial-scale=1">	Makes the page use the real device width on phones.
<title>Delta Kids Library - Themes</title>	Text shown in the browser tab and search results.
<link rel="stylesheet" href="styles.css">	Loads the external CSS file styles.css.
<main>	The unique content of this page; exactly one per page.
Delta Kids Library	The main heading; only one per page.
<p>This page follows your system theme and also lets you choose one...	A paragraph of text.
<fieldset class="theme">	Groups related form controls.
<legend>Theme</legend>	Caption for the fieldset.
<label><input type="radio" name="theme" value="auto" checked> Auto<...	Text label for a control; for matches the control's id, or the label wraps the control.
<label><input type="radio" name="theme" value="light"> Light</label>	Radio button: one choice from a group sharing the same name.

Line	What it does
<label><input type="radio" name="theme" value="dark"> Dark</label>	A form control; its type decides what it looks like.
<section class="card">	A thematic group of content, normally with its own heading.
Story hour	Second-level heading for a section.
Ages 3 to 6, Saturdays. Read more	A hyperlink; href gives the destination.
<script>	JavaScript; here only a few lines to open a dialog or switch a theme.

The important declarations of styles.css

Declaration	What it does
*, *::before, *::after {	Generated content inserted before the element's content (decorations, numbers, lines).
box-sizing: border-box;	Width and height include padding and border, which makes sizing predictable.
:root {	Custom properties (variables) defined on the root so every element can use them.
--brand: #ea580c;	The brand colour variable; change it once and every use follows.
margin: 0;	Space outside the element.
font-family: system-ui, Arial, sans-serif;	The typeface stack: preferred font first, fallbacks after.
line-height: 1.6;	Space between lines; 1.5 to 1.7 is comfortable for body text.
color: var(--ink);	Text colour.

Declaration	What it does
color-scheme: light dark;	Tells the browser which colour schemes the page supports so native controls match.
@media (prefers-color-scheme: dark) { :root { --bg: #111827; --fg: ...	Applies when the user's system is in dark mode.
:root[data-theme="light"] {	Attribute selector on a data attribute set by JavaScript.
background: var(--bg);	Background colour or image.
transition: background .3s, color .3s;	Animates property changes smoothly, for example on hover.
max-width: 40rem;	Limits how wide the element can grow, keeping lines readable.
padding: 0 1rem;	Space inside the element between its border and content.
display: flex;	Turns the element into a flex container (one-dimensional layout).
gap: 1rem;	Space between grid or flex items without extra margins.
border: 1px solid var(--line);	Changes the visual order of a flex item without changing the source.
border-radius: 10px;	Rounds the corners.
border-radius: 12px;	The line around the element: width, style and colour.

Check your work

- Follows system setting by default
- Manual choice overrides
- Form controls also switch (color-scheme)
- Contrast good in both themes

Exercises

1. Remember the choice in localStorage.
2. Add a high-contrast theme.
3. Animate the switch with a view transition.

Theme data for this project

Field	Value
Business	Delta Kids Library
Tagline	Stories, reading clubs and homework help
City	Tanta
Owner	Ghada Kamel
Brand colour	#ea580c
Accent colour	#fff7ed
Offers	Story hour (Free); Reading club (50 EGP per month); Homework help (Free); Summer challenge (Free)

Project 948: Light and dark theme switcher for Nubian Guest House

Theme: Nubian Guest House (Aswan) | Level 3 | Files: index.html, styles.css

Brief

Support the system colour scheme automatically and add a manual switch that sets a data attribute on the html element, all driven by custom properties.

Learning goals

- Use prefers-color-scheme and color-scheme
- Theme with custom properties
- Override with a data attribute set by a few lines of JavaScript

Elements and CSS used

HTML elements	CSS features
fieldset, legend, label, input type=radio, section, script	custom properties, @media (prefers-color-scheme), [data-theme], color-scheme, transition

Build guide

1. Define light variables in :root and dark ones inside a prefers-color-scheme media query.
2. Add [data-theme] overrides.
3. Use the variables for background, colour and cards.
4. Add the radio group.

5. Add the script that copies the chosen value to html's data-theme.
6. Test with your OS in dark mode.

```

Project 950 explained line by line

The important lines of index.html

Line	What it does
<!DOCTYPE html>	Declares modern HTML so the browser renders in standards mode.
<html lang="en">	Root element; lang tells screen readers and search engines the page language.
<meta charset="utf-8">	Character encoding: makes Arabic, accents and symbols display correctly.
<meta name="viewport" content="width=device-width, initial-scale=1">	Makes the page use the real device width on phones.
<title>Minya Coding Club - Themes</title>	Text shown in the browser tab and search results.
<link rel="stylesheet" href="styles.css">	Loads the external CSS file styles.css.
<main>	The unique content of this page; exactly one per page.
Minya Coding Club	The main heading; only one per page.
<p>This page follows your system theme and also lets you choose one...	A paragraph of text.
<fieldset class="theme">	Groups related form controls.
<legend>Theme</legend>	Caption for the fieldset.
<label><input type="radio" name="theme" value="auto" checked> Auto<...	Text label for a control; for matches the control's id, or the label wraps the control.
<label><input type="radio" name="theme" value="light"> Light</label>	Radio button: one choice from a group sharing the same name.

Line	What it does
<label><input type="radio" name="theme" value="dark"> Dark</label>	A form control; its type decides what it looks like.
<section class="card">	A thematic group of content, normally with its own heading.
HTML weekend	Second-level heading for a section.
Build your first page. Read more	A hyperlink; href gives the destination.
<script>	JavaScript; here only a few lines to open a dialog or switch a theme.

The important declarations of styles.css

Declaration	What it does
*, *::before, *::after {	Generated content inserted before the element's content (decorations, numbers, lines).
box-sizing: border-box;	Width and height include padding and border, which makes sizing predictable.
:root {	Custom properties (variables) defined on the root so every element can use them.
--brand: #2563eb;	The brand colour variable; change it once and every use follows.
margin: 0;	Space outside the element.
font-family: system-ui, Arial, sans-serif;	The typeface stack: preferred font first, fallbacks after.
line-height: 1.6;	Space between lines; 1.5 to 1.7 is comfortable for body text.
color: var(--ink);	Text colour.

Declaration	What it does
color-scheme: light dark;	Tells the browser which colour schemes the page supports so native controls match.
@media (prefers-color-scheme: dark) { :root { --bg: #111827; --fg: ...	Applies when the user's system is in dark mode.
:root[data-theme="light"] {	Attribute selector on a data attribute set by JavaScript.
background: var(--bg);	Background colour or image.
transition: background .3s, color .3s;	Animates property changes smoothly, for example on hover.
max-width: 40rem;	Limits how wide the element can grow, keeping lines readable.
padding: 0 1rem;	Space inside the element between its border and content.
display: flex;	Turns the element into a flex container (one-dimensional layout).
gap: 1rem;	Space between grid or flex items without extra margins.
border: 1px solid var(--line);	Changes the visual order of a flex item without changing the source.
border-radius: 10px;	Rounds the corners.
border-radius: 12px;	The line around the element: width, style and colour.

Check your work

- Follows system setting by default
- Manual choice overrides
- Form controls also switch (color-scheme)
- Contrast good in both themes

Exercises

1. Remember the choice in localStorage.
2. Add a high-contrast theme.
3. Animate the switch with a view transition.

Theme data for this project

Field	Value
Business	Minya Coding Club
Tagline	Free weekend coding for teenagers
City	Minya

Brand colour	#2563eb
Accent colour	#eff6ff
Offers	HTML weekend (Free); CSS art (Free); Scratch games (Free); Hackathon (Free)

Project type: Printable voucher

Level 2 | 25 projects, one per theme

Design a gift voucher that looks good on screen and prints cleanly: hide navigation, avoid page breaks, print link URLs and set page margins.

Project 951: Printable voucher for Cairo Book Shop

Theme: Cairo Book Shop (Giza) | Level 2 | Files: index.html, styles.css

Brief

Design a gift voucher that looks good on screen and prints cleanly: hide navigation, avoid page breaks, print link URLs and set page margins.

Learning goals

- Write @media print rules
- Use @page
- Trigger printing with a button

Elements and CSS used

HTML elements	CSS features
nav, a, button, article, h1, p, time, b	@media print, display: none, page-break-inside, attr(), @page, border: double

Build guide

1. Write the voucher article and a nav with a print button.
2. Style the voucher with a double border.
3. In @media print hide .no-print.
4. Prevent the voucher splitting across pages.
5. Print link hrefs after links.
6. Set @page margins and test with print preview.

Project 951: index.html

```
<!DOCTYPE html>

line-height: 1.6;	Space between lines; 1.5 to 1.7 is comfortable for body text.
color: var(--ink);	Text colour.
max-width: 36rem;	Limits how wide the element can grow, keeping lines readable.
padding: 0 1rem;	Space inside the element between its border and content.
border: 4px double var(--brand);	Changes the visual order of a flex item without changing the source.
text-align: center;	Centres inline content such as text.
border-radius: 8px;	Rounds the corners.
font-size: 3rem;	Size of the text.

Declaration	What it does
font-weight: 800;	Thickness of the text.
background: var(--accent);	Background colour or image.
display: inline-block;	Flows in text but accepts width, height and vertical padding.
@media print {	Applies only when printing.
display: none;	Removes the element from rendering completely.
border-color: #000;	The line around the element: width, style and colour.
a[href]::after {	Generated content inserted after the element's content.
content: " (" attr(href) ")";	The text or empty string for a pseudo-element.
@page { margin: 2cm; }	Sets the printed page margins.

Check your work

- Nav hidden in print
- Voucher on one page
- Black border when printed
- Print button works

Exercises

1. Add a barcode-like pattern with repeating-linear-gradient.
2. Add two vouchers per page with columns.
3. Add a QR code image.

Project 954 explained line by line

The important lines of index.html

Line	What it does
<!DOCTYPE html>	Declares modern HTML so the browser renders in standards mode.
<html lang="en">	Root element; lang tells screen readers and search engines the page language.
<meta charset="utf-8">	Character encoding: makes Arabic, accents and symbols display correctly.
<meta name="viewport" content="width=device-width, initial-scale=1">	Makes the page use the real device width on phones.
<title>Delta Dental Clinic - Voucher</title>	Text shown in the browser tab and search results.
<link rel="stylesheet" href="styles.css">	Loads the external CSS file styles.css.
<main>	The unique content of this page; exactly one per page.
<nav class="no-print">Back · <butto...	A block of navigation links; aria-label names it for screen readers.
<article class="voucher">	A self-contained piece: card, post, product.
Delta Dental Clinic gift voucher	The main heading; only one per page.
200 EGP	A paragraph of text.
Valid for any service until <time datetime="2027-09-11">11 Septe...	A date or time; datetime holds the machine-readable value.

Line	What it does
Code: GIFT-CLIN-2026	Keyword or name drawn to attention without extra importance.

The important declarations of styles.css

Declaration	What it does
*, *::before, *::after {	Generated content inserted before the element's content (decorations, numbers, lines).
box-sizing: border-box;	Width and height include padding and border, which makes sizing predictable.
:root {	Custom properties (variables) defined on the root so every element can use them.
--brand: #1d4ed8;	The brand colour variable; change it once and every use follows.
margin: 0;	Space outside the element.
font-family: system-ui, Arial, sans-serif;	The typeface stack: preferred font first, fallbacks after.
line-height: 1.6;	Space between lines; 1.5 to 1.7 is comfortable for body text.
color: var(--ink);	Text colour.
max-width: 36rem;	Limits how wide the element can grow, keeping lines readable.
padding: 0 1rem;	Space inside the element between its border and content.
border: 4px double var(--brand);	Changes the visual order of a flex item without changing the source.
text-align: center;	Centres inline content such as text.
border-radius: 8px;	Rounds the corners.
font-size: 3rem;	Size of the text.

Declaration	What it does
font-weight: 800;	Thickness of the text.
background: var(--accent);	Background colour or image.
display: inline-block;	Flows in text but accepts width, height and vertical padding.
@media print {	Applies only when printing.
display: none;	Removes the element from rendering completely.
border-color: #000;	The line around the element: width, style and colour.
a[href]::after {	Generated content inserted after the element's content.
content: " (" attr(href) ")";	The text or empty string for a pseudo-element.
@page { margin: 2cm; }	Sets the printed page margins.

Check your work

- Nav hidden in print
- Voucher on one page
- Black border when printed
- Print button works

Exercises

1. Add a barcode-like pattern with repeating-linear-gradient.
2. Add two vouchers per page with columns.
3. Add a QR code image.

Theme data for this project

Field	Value
Business	Delta Dental Clinic

Field	Value
Tagline	Gentle care for the whole family
City	Mansoura
Owner	Dr. Hana Youssef
Brand colour	#1d4ed8
Accent colour	#eff6ff
Offers	Check-up (300 EGP); Whitening (1500 EGP); Filling (600 EGP); Braces consultation (Free)

Project 955: Printable voucher for Red Sea Travel

Theme: Red Sea Travel (Hurghada) | Level 2 | Files: index.html, styles.css

Brief

Design a gift voucher that looks good on screen and prints cleanly: hide navigation, avoid page breaks, print link URLs and set page margins.

Learning goals

- Write @media print rules
- Use @page
- Trigger printing with a button

Elements and CSS used

HTML elements	CSS features
nav, a, button, article, h1, p, time, b	@media print, display: none, page-break-inside, attr(), @page, border: double

Build guide

1. Write the voucher article and a nav with a print button.
2. Style the voucher with a double border.
3. In @media print hide .no-print.
4. Prevent the voucher splitting across pages.
5. Print link hrefs after links.
6. Set @page margins and test with print preview.

Project 958 explained line by line

The important lines of index.html

Line	What it does
<!DOCTYPE html>	Declares modern HTML so the browser renders in standards mode.
<html lang="en">	Root element; lang tells screen readers and search engines the page language.
<meta charset="utf-8">	Character encoding: makes Arabic, accents and symbols display correctly.
<meta name="viewport" content="width=device-width, initial-scale=1">	Makes the page use the real device width on phones.
<title>Sinai Trekking Club - Voucher</title>	Text shown in the browser tab and search results.
<link rel="stylesheet" href="styles.css">	Loads the external CSS file styles.css.
<main>	The unique content of this page; exactly one per page.
<nav class="no-print">Back · <butto...	A block of navigation links; aria-label names it for screen readers.
<article class="voucher">	A self-contained piece: card, post, product.
Sinai Trekking Club gift voucher	The main heading; only one per page.
200 EGP	A paragraph of text.
Valid for any hike until <time datetime="2027-09-11">11 Septembe...	A date or time; datetime holds the machine-readable value.

Line	What it does
Code: GIFT-TREK-2026	Keyword or name drawn to attention without extra importance.

The important declarations of styles.css

Declaration	What it does
*, *::before, *::after {	Generated content inserted before the element's content (decorations, numbers, lines).
box-sizing: border-box;	Width and height include padding and border, which makes sizing predictable.
:root {	Custom properties (variables) defined on the root so every element can use them.
--brand: #92400e;	The brand colour variable; change it once and every use follows.
margin: 0;	Space outside the element.
font-family: system-ui, Arial, sans-serif;	The typeface stack: preferred font first, fallbacks after.
line-height: 1.6;	Space between lines; 1.5 to 1.7 is comfortable for body text.
color: var(--ink);	Text colour.
max-width: 36rem;	Limits how wide the element can grow, keeping lines readable.
padding: 0 1rem;	Space inside the element between its border and content.
border: 4px double var(--brand);	Changes the visual order of a flex item without changing the source.
text-align: center;	Centres inline content such as text.
border-radius: 8px;	Rounds the corners.
font-size: 3rem;	Size of the text.

Declaration	What it does
font-weight: 800;	Thickness of the text.
background: var(--accent);	Background colour or image.
display: inline-block;	Flows in text but accepts width, height and vertical padding.
@media print {	Applies only when printing.
display: none;	Removes the element from rendering completely.
border-color: #000;	The line around the element: width, style and colour.
a[href]::after {	Generated content inserted after the element's content.
content: " (" attr(href) ")";	The text or empty string for a pseudo-element.
@page { margin: 2cm; }	Sets the printed page margins.

Check your work

- Nav hidden in print
- Voucher on one page
- Black border when printed
- Print button works

Exercises

1. Add a barcode-like pattern with repeating-linear-gradient.
2. Add two vouchers per page with columns.
3. Add a QR code image.

Theme data for this project

Field	Value
Business	Sinai Trekking Club

Field	Value
Tagline	Guided mountain walks for every level
City	Saint Catherine
Owner	Yara Hamdy
Brand colour	#92400e
Accent colour	#fffbeb
Offers	Mount Sinai sunrise (400 EGP); Blue Desert loop (250 EGP); Wadi Gnai (300 EGP); Three-day traverse (1900 EGP)

Project 959: Printable voucher for Horizon Photography

Theme: Horizon Photography (Maadi) | Level 2 | Files: index.html, styles.css

Brief

Design a gift voucher that looks good on screen and prints cleanly: hide navigation, avoid page breaks, print link URLs and set page margins.

Learning goals

- Write @media print rules
- Use @page
- Trigger printing with a button

Elements and CSS used

HTML elements	CSS features
nav, a, button, article, h1, p, time, b	@media print, display: none, page-break-inside, attr(), @page, border: double

Build guide

1. Write the voucher article and a nav with a print button.
2. Style the voucher with a double border.
3. In @media print hide .no-print.
4. Prevent the voucher splitting across pages.
5. Print link hrefs after links.
6. Set @page margins and test with print preview.

Project 962 explained line by line

The important lines of index.html

Line	What it does
<!DOCTYPE html>	Declares modern HTML so the browser renders in standards mode.
<html lang="en">	Root element; lang tells screen readers and search engines the page language.
<meta charset="utf-8">	Character encoding: makes Arabic, accents and symbols display correctly.
<meta name="viewport" content="width=device-width, initial-scale=1">	Makes the page use the real device width on phones.
<title>Cedar Furniture - Voucher</title>	Text shown in the browser tab and search results.
<link rel="stylesheet" href="styles.css">	Loads the external CSS file styles.css.
<main>	The unique content of this page; exactly one per page.
<nav class="no-print">Back · <butto...	A block of navigation links; aria-label names it for screen readers.
<article class="voucher">	A self-contained piece: card, post, product.
Cedar Furniture gift voucher	The main heading; only one per page.
200 EGP	A paragraph of text.
Valid for any piece until <time datetime="2027-09-11">11 Septemb...	A date or time; datetime holds the machine-readable value.

Line	What it does
Code: GIFT-FURN-2026	Keyword or name drawn to attention without extra importance.

The important declarations of styles.css

Declaration	What it does
*, *::before, *::after {	Generated content inserted before the element's content (decorations, numbers, lines).
box-sizing: border-box;	Width and height include padding and border, which makes sizing predictable.
:root {	Custom properties (variables) defined on the root so every element can use them.
--brand: #78350f;	The brand colour variable; change it once and every use follows.
margin: 0;	Space outside the element.
font-family: system-ui, Arial, sans-serif;	The typeface stack: preferred font first, fallbacks after.
line-height: 1.6;	Space between lines; 1.5 to 1.7 is comfortable for body text.
color: var(--ink);	Text colour.
max-width: 36rem;	Limits how wide the element can grow, keeping lines readable.
padding: 0 1rem;	Space inside the element between its border and content.
border: 4px double var(--brand);	Changes the visual order of a flex item without changing the source.
text-align: center;	Centres inline content such as text.
border-radius: 8px;	Rounds the corners.
font-size: 3rem;	Size of the text.

Declaration	What it does
font-weight: 800;	Thickness of the text.
background: var(--accent);	Background colour or image.
display: inline-block;	Flows in text but accepts width, height and vertical padding.
@media print {	Applies only when printing.
display: none;	Removes the element from rendering completely.
border-color: #000;	The line around the element: width, style and colour.
a[href]::after {	Generated content inserted after the element's content.
content: " (" attr(href) ")";	The text or empty string for a pseudo-element.
@page { margin: 2cm; }	Sets the printed page margins.

Check your work

- Nav hidden in print
- Voucher on one page
- Black border when printed
- Print button works

Exercises

1. Add a barcode-like pattern with repeating-linear-gradient.
2. Add two vouchers per page with columns.
3. Add a QR code image.

Theme data for this project

Field	Value
Business	Cedar Furniture

Field	Value
Tagline	Solid wood furniture made to order
City	Damietta
Owner	Tarek Lotfy
Brand colour	#78350f
Accent colour	#fef3c7
Offers	Oak dining table (9500 EGP); Bookshelf (4200 EGP); Bedside table (1500 EGP); Coffee table (2800 EGP)

Project 963: Printable voucher for Byte Repair

Theme: Byte Repair (Nasr City) | Level 2 | Files: index.html, styles.css

Brief

Design a gift voucher that looks good on screen and prints cleanly: hide navigation, avoid page breaks, print link URLs and set page margins.

Learning goals

- Write @media print rules
- Use @page
- Trigger printing with a button

Elements and CSS used

HTML elements	CSS features
nav, a, button, article, h1, p, time, b	@media print, display: none, page-break-inside, attr(), @page, border: double

Build guide

1. Write the voucher article and a nav with a print button.
2. Style the voucher with a double border.
3. In @media print hide .no-print.
4. Prevent the voucher splitting across pages.
5. Print link hrefs after links.
6. Set @page margins and test with print preview.

Project 966 explained line by line

The important lines of index.html

Line	What it does
<!DOCTYPE html>	Declares modern HTML so the browser renders in standards mode.
<html lang="en">	Root element; lang tells screen readers and search engines the page language.
<meta charset="utf-8">	Character encoding: makes Arabic, accents and symbols display correctly.
<meta name="viewport" content="width=device-width, initial-scale=1">	Makes the page use the real device width on phones.
<title>Habiba Handmade Jewellery - Voucher</title>	Text shown in the browser tab and search results.
<link rel="stylesheet" href="styles.css">	Loads the external CSS file styles.css.
<main>	The unique content of this page; exactly one per page.
<nav class="no-print">Back · <butto...	A block of navigation links; aria-label names it for screen readers.
<article class="voucher">	A self-contained piece: card, post, product.
Habiba Handmade Jewellery gift voucher	The main heading; only one per page.
200 EGP	A paragraph of text.
Valid for any item until <time datetime="2027-09-11">11 Septembe...	A date or time; datetime holds the machine-readable value.

Line	What it does
Code: GIFT-JEWE-2026	Keyword or name drawn to attention without extra importance.

The important declarations of styles.css

Declaration	What it does
*, *::before, *::after {	Generated content inserted before the element's content (decorations, numbers, lines).
box-sizing: border-box;	Width and height include padding and border, which makes sizing predictable.
:root {	Custom properties (variables) defined on the root so every element can use them.
--brand: #a16207;	The brand colour variable; change it once and every use follows.
margin: 0;	Space outside the element.
font-family: system-ui, Arial, sans-serif;	The typeface stack: preferred font first, fallbacks after.
line-height: 1.6;	Space between lines; 1.5 to 1.7 is comfortable for body text.
color: var(--ink);	Text colour.
max-width: 36rem;	Limits how wide the element can grow, keeping lines readable.
padding: 0 1rem;	Space inside the element between its border and content.
border: 4px double var(--brand);	Changes the visual order of a flex item without changing the source.
text-align: center;	Centres inline content such as text.
border-radius: 8px;	Rounds the corners.
font-size: 3rem;	Size of the text.

Declaration	What it does
font-weight: 800;	Thickness of the text.
background: var(--accent);	Background colour or image.
display: inline-block;	Flows in text but accepts width, height and vertical padding.
@media print {	Applies only when printing.
display: none;	Removes the element from rendering completely.
border-color: #000;	The line around the element: width, style and colour.
a[href]::after {	Generated content inserted after the element's content.
content: " (" attr(href) ")";	The text or empty string for a pseudo-element.
@page { margin: 2cm; }	Sets the printed page margins.

Check your work

- Nav hidden in print
- Voucher on one page
- Black border when printed
- Print button works

Exercises

1. Add a barcode-like pattern with repeating-linear-gradient.
2. Add two vouchers per page with columns.
3. Add a QR code image.

Theme data for this project

Field	Value
Business	Habiba Handmade Jewellery

Field	Value
Tagline	Silver and brass pieces inspired by Nubia
City	Aswan
Owner	Habiba Saleh
Brand colour	#a16207
Accent colour	#fefce8
Offers	Lotus pendant (650 EGP); Brass cuff (420 EGP); Bead earrings (180 EGP); Ankh ring (300 EGP)

Project 967: Printable voucher for Fayoum Pottery Studio

Theme: Fayoum Pottery Studio (Tunis Village) | Level 2 | Files: index.html, styles.css

Brief

Design a gift voucher that looks good on screen and prints cleanly: hide navigation, avoid page breaks, print link URLs and set page margins.

Learning goals

- Write @media print rules
- Use @page
- Trigger printing with a button

Elements and CSS used

HTML elements	CSS features
nav, a, button, article, h1, p, time, b	@media print, display: none, page-break-inside, attr(), @page, border: double

Build guide

1. Write the voucher article and a nav with a print button.
2. Style the voucher with a double border.
3. In @media print hide .no-print.
4. Prevent the voucher splitting across pages.
5. Print link hrefs after links.
6. Set @page margins and test with print preview.

Project 970 explained line by line

The important lines of index.html

Line	What it does
<!DOCTYPE html>	Declares modern HTML so the browser renders in standards mode.
<html lang="en">	Root element; lang tells screen readers and search engines the page language.
<meta charset="utf-8">	Character encoding: makes Arabic, accents and symbols display correctly.
<meta name="viewport" content="width=device-width, initial-scale=1">	Makes the page use the real device width on phones.
<title>Luxor Music Academy - Voucher</title>	Text shown in the browser tab and search results.
<link rel="stylesheet" href="styles.css">	Loads the external CSS file styles.css.
<main>	The unique content of this page; exactly one per page.
<nav class="no-print">Back · <butto...	A block of navigation links; aria-label names it for screen readers.
<article class="voucher">	A self-contained piece: card, post, product.
Luxor Music Academy gift voucher	The main heading; only one per page.
200 EGP	A paragraph of text.
Valid for any course until <time datetime="2027-09-11">11 Septem...	A date or time; datetime holds the machine-readable value.

Line	What it does
Code: GIFT-MUSI-2026	Keyword or name drawn to attention without extra importance.

The important declarations of styles.css

Declaration	What it does
*, *::before, *::after {	Generated content inserted before the element's content (decorations, numbers, lines).
box-sizing: border-box;	Width and height include padding and border, which makes sizing predictable.
:root {	Custom properties (variables) defined on the root so every element can use them.
--brand: #4c1d95;	The brand colour variable; change it once and every use follows.
margin: 0;	Space outside the element.
font-family: system-ui, Arial, sans-serif;	The typeface stack: preferred font first, fallbacks after.
line-height: 1.6;	Space between lines; 1.5 to 1.7 is comfortable for body text.
color: var(--ink);	Text colour.
max-width: 36rem;	Limits how wide the element can grow, keeping lines readable.
padding: 0 1rem;	Space inside the element between its border and content.
border: 4px double var(--brand);	Changes the visual order of a flex item without changing the source.
text-align: center;	Centres inline content such as text.
border-radius: 8px;	Rounds the corners.
font-size: 3rem;	Size of the text.

Declaration	What it does
font-weight: 800;	Thickness of the text.
background: var(--accent);	Background colour or image.
display: inline-block;	Flows in text but accepts width, height and vertical padding.
@media print {	Applies only when printing.
display: none;	Removes the element from rendering completely.
border-color: #000;	The line around the element: width, style and colour.
a[href]::after {	Generated content inserted after the element's content.
content: " (" attr(href) ")";	The text or empty string for a pseudo-element.
@page { margin: 2cm; }	Sets the printed page margins.

Check your work

- Nav hidden in print
- Voucher on one page
- Black border when printed
- Print button works

Exercises

1. Add a barcode-like pattern with repeating-linear-gradient.
2. Add two vouchers per page with columns.
3. Add a QR code image.

Theme data for this project

Field	Value
Business	Luxor Music Academy

Field	Value
Tagline	Oud, piano, guitar and voice lessons
City	Luxor
Owner	Salma Ragab
Brand colour	#4c1d95
Accent colour	#f5f3ff
Offers	Oud for beginners (1600 EGP); Piano grade 1 (1800 EGP); Guitar chords (1400 EGP); Voice coaching (1500 EGP)

Project 971: Printable voucher for Port Said Seafood

Theme: Port Said Seafood (Port Said) | Level 2 | Files: index.html, styles.css

Brief

Design a gift voucher that looks good on screen and prints cleanly: hide navigation, avoid page breaks, print link URLs and set page margins.

Learning goals

- Write @media print rules
- Use @page
- Trigger printing with a button

Elements and CSS used

HTML elements	CSS features
nav, a, button, article, h1, p, time, b	@media print, display: none, page-break-inside, attr(), @page, border: double

Build guide

1. Write the voucher article and a nav with a print button.
2. Style the voucher with a double border.
3. In @media print hide .no-print.
4. Prevent the voucher splitting across pages.
5. Print link hrefs after links.
6. Set @page margins and test with print preview.

The important lines of index.html

Line	What it does
<!DOCTYPE html>	Declares modern HTML so the browser renders in standards mode.
<html lang="en">	Root element; lang tells screen readers and search engines the page language.
<meta charset="utf-8">	Character encoding: makes Arabic, accents and symbols display correctly.
<meta name="viewport" content="width=device-width, initial-scale=1">	Makes the page use the real device width on phones.
<title>Ismailia Cycling Store - Voucher</title>	Text shown in the browser tab and search results.
<link rel="stylesheet" href="styles.css">	Loads the external CSS file styles.css.
<main>	The unique content of this page; exactly one per page.
<nav class="no-print">Back · <butto...	A block of navigation links; aria-label names it for screen readers.
<article class="voucher">	A self-contained piece: card, post, product.
Ismailia Cycling Store gift voucher	The main heading; only one per page.
200 EGP	A paragraph of text.
Valid for any bike until <time datetime="2027-09-11">11 Septembe...	A date or time; datetime holds the machine-readable value.

Line	What it does
Code: GIFT-CYCL-2026	Keyword or name drawn to attention without extra importance.

The important declarations of styles.css

Declaration	What it does
*, *::before, *::after {	Generated content inserted before the element's content (decorations, numbers, lines).
box-sizing: border-box;	Width and height include padding and border, which makes sizing predictable.
:root {	Custom properties (variables) defined on the root so every element can use them.
--brand: #dc2626;	The brand colour variable; change it once and every use follows.
margin: 0;	Space outside the element.
font-family: system-ui, Arial, sans-serif;	The typeface stack: preferred font first, fallbacks after.
line-height: 1.6;	Space between lines; 1.5 to 1.7 is comfortable for body text.
color: var(--ink);	Text colour.
max-width: 36rem;	Limits how wide the element can grow, keeping lines readable.
padding: 0 1rem;	Space inside the element between its border and content.
border: 4px double var(--brand);	Changes the visual order of a flex item without changing the source.
text-align: center;	Centres inline content such as text.
border-radius: 8px;	Rounds the corners.
font-size: 3rem;	Size of the text.

Declaration	What it does
font-weight: 800;	Thickness of the text.
background: var(--accent);	Background colour or image.
display: inline-block;	Flows in text but accepts width, height and vertical padding.
@media print {	Applies only when printing.
display: none;	Removes the element from rendering completely.
border-color: #000;	The line around the element: width, style and colour.
a[href]::after {	Generated content inserted after the element's content.
content: " (" attr(href) ")";	The text or empty string for a pseudo-element.
@page { margin: 2cm; }	Sets the printed page margins.

Check your work

- Nav hidden in print
- Voucher on one page
- Black border when printed
- Print button works

Exercises

1. Add a barcode-like pattern with repeating-linear-gradient.
2. Add two vouchers per page with columns.
3. Add a QR code image.

Theme data for this project

Field	Value
Business	Ismailia Cycling Store

Field	Value
Tagline	Bikes, parts and Friday group rides
City	Ismailia

Project 975: Printable voucher for Minya Coding Club

Theme: Minya Coding Club (Minya) | Level 2 | Files: index.html, styles.css

Brief

Design a gift voucher that looks good on screen and prints cleanly: hide navigation, avoid page breaks, print link URLs and set page margins.

Learning goals

- Write @media print rules
- Use @page
- Trigger printing with a button

Elements and CSS used

HTML elements	CSS features
nav, a, button, article, h1, p, time, b	@media print, display: none, page-break-inside, attr(), @page, border: double

Build guide

1. Write the voucher article and a nav with a print button.
2. Style the voucher with a double border.
3. In @media print hide .no-print.
4. Prevent the voucher splitting across pages.
5. Print link hrefs after links.
6. Set @page margins and test with print preview.

Project 975: index.html

Project type: Month calendar

Level 3 | 25 projects, one per theme

Draw a month grid as a table with fixed equal columns, tall cells, event labels that shrink to dots on phones and a highlighted Friday column.

Project 976: Month calendar for Cairo Book Shop

Theme: Cairo Book Shop (Giza) | Level 3 | Files: index.html, styles.css

Brief

Draw a month grid as a table with fixed equal columns, tall cells, event labels that shrink to dots on phones and a highlighted Friday column.

Learning goals

- Use table-layout: fixed for equal columns
- Use :last-child for a column
- Adapt content presentation with a media query

Elements and CSS used

HTML elements	CSS features
table, caption, thead, tbody, tr, th, td, span	table-layout: fixed, vertical-align: top, height on td, :last-child, @media (max-width)

Build guide

1. Write the header row with day names starting Saturday.
2. Write the day cells in rows of seven, padding the first row with empty cells.
3. Add a span for event labels.
4. Fix the layout and set tall cells aligned top.
5. Colour the last column.
6. On narrow screens shrink event labels to dots.

Project 976: index.html

```

- Adapt content presentation with a media query

Elements and CSS used

HTML elements	CSS features
table, caption, thead, tbody, tr, th, td, span	table-layout: fixed, vertical-align: top, height on td, :last-child, @media (max-width)

Build guide

1. Write the header row with day names starting Saturday.
2. Write the day cells in rows of seven, padding the first row with empty cells.
3. Add a span for event labels.
4. Fix the layout and set tall cells aligned top.
5. Colour the last column.
6. On narrow screens shrink event labels to dots.

Project 978 explained line by line

The important lines of index.html

Line	What it does
<!DOCTYPE html>	Declares modern HTML so the browser renders in standards mode.
<html lang="en">	Root element; lang tells screen readers and search engines the page language.
<meta charset="utf-8">	Character encoding: makes Arabic, accents and symbols display correctly.
<meta name="viewport" content="width=device-width, initial-scale=1">	Makes the page use the real device width on phones.
<title>Pyramid Fitness - September</title>	Text shown in the browser tab and search results.
<link rel="stylesheet" href="styles.css">	Loads the external CSS file styles.css.
<main>	The unique content of this page; exactly one per page.
Pyramid Fitness calendar	The main heading; only one per page.
<table class="cal">	Tabular data in rows and columns.
<caption>September 2026</caption>	Title of the table.
<thead><tr><th>Sat</th><th>Sun</th><th>Mon</th><th>Tue</th><th>Wed<...	Group of header rows.
<tbody>	Group of data rows.
<tr><td></td><td></td><td>1</td><td>2</td><td>3</td><td>4</td><td c...	A table row.

Line	What it does
<tr><td>6</td><td>7</td><td>8</td><td>9</td><td>10</td><td>11</td><...	A data cell.
<tr><td>13</td><td>14</td><td>15</td><td>16</td><td>17</td><td>18<//...	Generic inline container for styling.

The important declarations of styles.css

Declaration	What it does
*, *::before, *::after {	Generated content inserted before the element's content (decorations, numbers, lines).
box-sizing: border-box;	Width and height include padding and border, which makes sizing predictable.
:root {	Custom properties (variables) defined on the root so every element can use them.
--brand: #0f766e;	The brand colour variable; change it once and every use follows.
margin: 0;	Space outside the element.
font-family: system-ui, Arial, sans-serif;	The typeface stack: preferred font first, fallbacks after.
line-height: 1.6;	Space between lines; 1.5 to 1.7 is comfortable for body text.
color: var(--ink);	Text colour.
max-width: 56rem;	Limits how wide the element can grow, keeping lines readable.
padding: 0 1rem;	Space inside the element between its border and content.
width: 100%;	Fills the container width.

Declaration	What it does
border-collapse: collapse;	Merges adjacent table cell borders into single lines.
table-layout: fixed;	Columns get equal widths regardless of content; faster rendering.
font-size: 1.3rem;	Size of the text.
font-weight: 700;	Thickness of the text.
background: var(--accent);	Background colour or image.
vertical-align: top;	Aligns cell content to the top.
border: 1px solid var(--line);	Changes the visual order of a flex item without changing the source.
display: block;	Element starts on a new line and fills the width (used on links and images).
border-radius: 4px;	Rounds the corners.
th:last-child, td:last-child {	The last child of its parent.
@media (max-width: 600px) { td { height: 3rem; } td span { font-siz...	Turns a square into a circle.

Check your work

- Seven cells in every row
- Columns equal width
- Events visible on mobile as dots
- Caption gives the month

Exercises

1. Generate the cells with JavaScript for any month.
2. Highlight today with a class.
3. Make cells links to day pages.

Accent colour	#ecfdf5
Offers	Morning yoga (100 EGP); Strength circuit (120 EGP); Spinning (110 EGP); Personal training (350 EGP)

Project 979: Month calendar for Delta Dental Clinic

Theme: Delta Dental Clinic (Mansoura) | Level 3 | Files: index.html, styles.css

Brief

Draw a month grid as a table with fixed equal columns, tall cells, event labels that shrink to dots on phones and a highlighted Friday column.

Learning goals

- Use table-layout: fixed for equal columns
- Use :last-child for a column
- Adapt content presentation with a media query

Elements and CSS used

HTML elements	CSS features
table, caption, thead, tbody, tr, th, td, span	table-layout: fixed, vertical-align: top, height on td, :last-child, @media (max-width)

Build guide

1. Write the header row with day names starting Saturday.
2. Write the day cells in rows of seven, padding the first row with empty cells.
3. Add a span for event labels.
4. Fix the layout and set tall cells aligned top.
5. Colour the last column.
6. On narrow screens shrink event labels to dots.

<tr><td></td><td></td><td>1</td><td>2</td><td>3</td><td>4</td><td c...	A table row.

Line	What it does
<tr><td>6</td><td>7</td><td>8</td><td>9</td><td>10</td><td>11</td><...	A data cell.
<tr><td>13</td><td>14</td><td>15</td><td>16</td><td>17</td><td>18<//...	Generic inline container for styling.

The important declarations of styles.css

Declaration	What it does
*, *::before, *::after {	Generated content inserted before the element's content (decorations, numbers, lines).
box-sizing: border-box;	Width and height include padding and border, which makes sizing predictable.
:root {	Custom properties (variables) defined on the root so every element can use them.
--brand: #7c3aed;	The brand colour variable; change it once and every use follows.
margin: 0;	Space outside the element.
font-family: system-ui, Arial, sans-serif;	The typeface stack: preferred font first, fallbacks after.
line-height: 1.6;	Space between lines; 1.5 to 1.7 is comfortable for body text.
color: var(--ink);	Text colour.
max-width: 56rem;	Limits how wide the element can grow, keeping lines readable.
padding: 0 1rem;	Space inside the element between its border and content.
width: 100%;	Fills the container width.

Declaration	What it does
border-collapse: collapse;	Merges adjacent table cell borders into single lines.
table-layout: fixed;	Columns get equal widths regardless of content; faster rendering.
font-size: 1.3rem;	Size of the text.
font-weight: 700;	Thickness of the text.
background: var(--accent);	Background colour or image.
vertical-align: top;	Aligns cell content to the top.
border: 1px solid var(--line);	Changes the visual order of a flex item without changing the source.
display: block;	Element starts on a new line and fills the width (used on links and images).
border-radius: 4px;	Rounds the corners.
th:last-child, td:last-child {	The last child of its parent.
@media (max-width: 600px) { td { height: 3rem; } td span { font-siz...	Turns a square into a circle.

Check your work

- Seven cells in every row
- Columns equal width
- Events visible on mobile as dots
- Caption gives the month

Exercises

1. Generate the cells with JavaScript for any month.
2. Highlight today with a class.
3. Make cells links to day pages.

Theme data for this project

Field	Value
Business	Lotus Language School
Tagline	Learn English, French and German in small groups
City	Alexandria
Owner	Nour El Din
Brand colour	#7c3aed
Accent colour	#f5f3ff
Offers	English A1 (1800 EGP); French B1 (2200 EGP); German A2 (2000 EGP); IELTS preparation (3000 EGP)

Project 982: Month calendar for Green Leaf Cafe

Theme: Green Leaf Cafe (Zamalek) | Level 3 | Files: index.html, styles.css

Brief

Draw a month grid as a table with fixed equal columns, tall cells, event labels that shrink to dots on phones and a highlighted Friday column.

Learning goals

- Use table-layout: fixed for equal columns
- Use :last-child for a column
- Adapt content presentation with a media query

Elements and CSS used

HTML elements	CSS features
table, caption, thead, tbody, tr, th, td, span	table-layout: fixed, vertical-align: top, height on td, :last-child, @media (max-width)

Build guide

1. Write the header row with day names starting Saturday.
2. Write the day cells in rows of seven, padding the first row with empty cells.
3. Add a span for event labels.
4. Fix the layout and set tall cells aligned top.
5. Colour the last column.
6. On narrow screens shrink event labels to dots.

Project 982: index.html

```
<!DOCTYPE html>

Project 985 explained line by line

The important lines of index.html

Line	What it does
<!DOCTYPE html>	Declares modern HTML so the browser renders in standards mode.
<html lang="en">	Root element; lang tells screen readers and search engines the page language.
<meta charset="utf-8">	Character encoding: makes Arabic, accents and symbols display correctly.
<meta name="viewport" content="width=device-width, initial-scale=1">	Makes the page use the real device width on phones.
<title>Papyrus Stationery - September</title>	Text shown in the browser tab and search results.
<link rel="stylesheet" href="styles.css">	Loads the external CSS file styles.css.
<main>	The unique content of this page; exactly one per page.
Papyrus Stationery calendar	The main heading; only one per page.
<table class="cal">	Tabular data in rows and columns.
<caption>September 2026</caption>	Title of the table.
<thead><tr><th>Sat</th><th>Sun</th><th>Mon</th><th>Tue</th><th>Wed<...	Group of header rows.
<tbody>	Group of data rows.
<tr><td></td><td></td><td>1</td><td>2</td><td>3</td><td>4</td><td c...	A table row.

Line	What it does
<tr><td>6</td><td>7</td><td>8</td><td>9</td><td>10</td><td>11</td><...	A data cell.
<tr><td>13</td><td>14</td><td>15</td><td>16</td><td>17</td><td>18<//...	Generic inline container for styling.

The important declarations of styles.css

Declaration	What it does
*, *::before, *::after {	Generated content inserted before the element's content (decorations, numbers, lines).
box-sizing: border-box;	Width and height include padding and border, which makes sizing predictable.
:root {	Custom properties (variables) defined on the root so every element can use them.
--brand: #be185d;	The brand colour variable; change it once and every use follows.
margin: 0;	Space outside the element.
font-family: system-ui, Arial, sans-serif;	The typeface stack: preferred font first, fallbacks after.
line-height: 1.6;	Space between lines; 1.5 to 1.7 is comfortable for body text.
color: var(--ink);	Text colour.
max-width: 56rem;	Limits how wide the element can grow, keeping lines readable.
padding: 0 1rem;	Space inside the element between its border and content.
width: 100%;	Fills the container width.

Declaration	What it does
border-collapse: collapse;	Merges adjacent table cell borders into single lines.
table-layout: fixed;	Columns get equal widths regardless of content; faster rendering.
font-size: 1.3rem;	Size of the text.
font-weight: 700;	Thickness of the text.
background: var(--accent);	Background colour or image.
vertical-align: top;	Aligns cell content to the top.
border: 1px solid var(--line);	Changes the visual order of a flex item without changing the source.
display: block;	Element starts on a new line and fills the width (used on links and images).
border-radius: 4px;	Rounds the corners.
th:last-child, td:last-child {	The last child of its parent.
@media (max-width: 600px) { td { height: 3rem; } td span { font-siz...	Turns a square into a circle.

Check your work

- Seven cells in every row
- Columns equal width
- Events visible on mobile as dots
- Caption gives the month

Exercises

1. Generate the cells with JavaScript for any month.
2. Highlight today with a class.
3. Make cells links to day pages.

Theme data for this project

Field	Value
Business	Papyrus Stationery
Tagline	Notebooks, pens and paper made in Egypt
City	Heliopolis
Owner	Dina Fathy
Brand colour	#be185d
Accent colour	#fdf2f8
Offers	Dotted notebook (140 EGP); Fountain pen (350 EGP); Washi tape set (90 EGP); Desk planner (110 EGP)

Project 986: Month calendar for Oasis Plant Nursery

Theme: Oasis Plant Nursery (Sheikh Zayed) | Level 3 | Files: index.html, styles.css

Brief

Draw a month grid as a table with fixed equal columns, tall cells, event labels that shrink to dots on phones and a highlighted Friday column.

Learning goals

- Use table-layout: fixed for equal columns
- Use :last-child for a column
- Adapt content presentation with a media query

Elements and CSS used

HTML elements	CSS features
table, caption, thead, tbody, tr, th, td, span	table-layout: fixed, vertical-align: top, height on td, :last-child, @media (max-width)

Build guide

1. Write the header row with day names starting Saturday.
2. Write the day cells in rows of seven, padding the first row with empty cells.
3. Add a span for event labels.
4. Fix the layout and set tall cells aligned top.
5. Colour the last column.
6. On narrow screens shrink event labels to dots.

max-width: 56rem;	Limits how wide the element can grow, keeping lines readable.
padding: 0 1rem;	Space inside the element between its border and content.
width: 100%;	Fills the container width.

Declaration	What it does
border-collapse: collapse;	Merges adjacent table cell borders into single lines.
table-layout: fixed;	Columns get equal widths regardless of content; faster rendering.
font-size: 1.3rem;	Size of the text.
font-weight: 700;	Thickness of the text.
background: var(--accent);	Background colour or image.
vertical-align: top;	Aligns cell content to the top.
border: 1px solid var(--line);	Changes the visual order of a flex item without changing the source.
display: block;	Element starts on a new line and fills the width (used on links and images).
border-radius: 4px;	Rounds the corners.
th:last-child, td:last-child {	The last child of its parent.
@media (max-width: 600px) { td { height: 3rem; } td span { font-siz...	Turns a square into a circle.

Check your work

- Seven cells in every row
- Columns equal width
- Events visible on mobile as dots
- Caption gives the month

Exercises

1. Generate the cells with JavaScript for any month.
2. Highlight today with a class.
3. Make cells links to day pages.

Theme data for this project

Field	Value
Business	Byte Repair
Tagline	Phone and laptop repairs while you wait
City	Nasr City
Owner	Mostafa Gamal
Brand colour	#0891b2
Accent colour	#ecfeff
Offers	Screen replacement (From 800 EGP); Battery swap (From 500 EGP); Laptop cleaning (350 EGP); Data recovery (From 1200 EGP)

Project 989: Month calendar for Sahara Pet Care

Theme: Sahara Pet Care (New Cairo) | Level 3 | Files: index.html, styles.css

Brief

Draw a month grid as a table with fixed equal columns, tall cells, event labels that shrink to dots on phones and a highlighted Friday column.

Learning goals

- Use table-layout: fixed for equal columns
- Use :last-child for a column
- Adapt content presentation with a media query

Elements and CSS used

HTML elements	CSS features
table, caption, thead, tbody, tr, th, td, span	table-layout: fixed, vertical-align: top, height on td, :last-child, @media (max-width)

Build guide

1. Write the header row with day names starting Saturday.
2. Write the day cells in rows of seven, padding the first row with empty cells.
3. Add a span for event labels.
4. Fix the layout and set tall cells aligned top.
5. Colour the last column.
6. On narrow screens shrink event labels to dots.

Project 989: index.html

```
<!DOCTYPE html>

Project 992 explained line by line

The important lines of index.html

Line	What it does
<!DOCTYPE html>	Declares modern HTML so the browser renders in standards mode.
<html lang="en">	Root element; lang tells screen readers and search engines the page language.
<meta charset="utf-8">	Character encoding: makes Arabic, accents and symbols display correctly.
<meta name="viewport" content="width=device-width, initial-scale=1">	Makes the page use the real device width on phones.
<title>Fayoum Pottery Studio - September</title>	Text shown in the browser tab and search results.
<link rel="stylesheet" href="styles.css">	Loads the external CSS file styles.css.
<main>	The unique content of this page; exactly one per page.
Fayoum Pottery Studio calendar	The main heading; only one per page.
<table class="cal">	Tabular data in rows and columns.
<caption>September 2026</caption>	Title of the table.
<thead><tr><th>Sat</th><th>Sun</th><th>Mon</th><th>Tue</th><th>Wed<...	Group of header rows.
<tbody>	Group of data rows.
<tr><td></td><td></td><td>1</td><td>2</td><td>3</td><td>4</td><td c...	A table row.

Line	What it does
<tr><td>6</td><td>7</td><td>8</td><td>9</td><td>10</td><td>11</td><...	A data cell.
<tr><td>13</td><td>14</td><td>15</td><td>16</td><td>17</td><td>18<//...	Generic inline container for styling.

The important declarations of styles.css

Declaration	What it does
*, *::before, *::after {	Generated content inserted before the element's content (decorations, numbers, lines).
box-sizing: border-box;	Width and height include padding and border, which makes sizing predictable.
:root {	Custom properties (variables) defined on the root so every element can use them.
--brand: #9a3412;	The brand colour variable; change it once and every use follows.
margin: 0;	Space outside the element.
font-family: system-ui, Arial, sans-serif;	The typeface stack: preferred font first, fallbacks after.
line-height: 1.6;	Space between lines; 1.5 to 1.7 is comfortable for body text.
color: var(--ink);	Text colour.
max-width: 56rem;	Limits how wide the element can grow, keeping lines readable.
padding: 0 1rem;	Space inside the element between its border and content.
width: 100%;	Fills the container width.

Declaration	What it does
border-collapse: collapse;	Merges adjacent table cell borders into single lines.
table-layout: fixed;	Columns get equal widths regardless of content; faster rendering.
font-size: 1.3rem;	Size of the text.
font-weight: 700;	Thickness of the text.
background: var(--accent);	Background colour or image.
vertical-align: top;	Aligns cell content to the top.
border: 1px solid var(--line);	Changes the visual order of a flex item without changing the source.
display: block;	Element starts on a new line and fills the width (used on links and images).
border-radius: 4px;	Rounds the corners.
th:last-child, td:last-child {	The last child of its parent.
@media (max-width: 600px) { td { height: 3rem; } td span { font-siz...	Turns a square into a circle.

Check your work

- Seven cells in every row
- Columns equal width
- Events visible on mobile as dots
- Caption gives the month

Exercises

1. Generate the cells with JavaScript for any month.
2. Highlight today with a class.
3. Make cells links to day pages.

Theme data for this project

Field	Value
Business	Fayoum Pottery Studio
Tagline	Wheel throwing and glazing classes
City	Tunis Village
Owner	Ahmed Mahmoud
Brand colour	#9a3412
Accent colour	#fff7ed
Offers	Intro to the wheel (450 EGP); Glazing day (300 EGP); Kids clay class (200 EGP); Weekend retreat (2500 EGP)

Project 993: Month calendar for Cleopatra Beauty Salon

Theme: Cleopatra Beauty Salon (Dokki) | Level 3 | Files: index.html, styles.css

Brief

Draw a month grid as a table with fixed equal columns, tall cells, event labels that shrink to dots on phones and a highlighted Friday column.

Learning goals

- Use table-layout: fixed for equal columns
- Use :last-child for a column
- Adapt content presentation with a media query

Elements and CSS used

HTML elements	CSS features
table, caption, thead, tbody, tr, th, td, span	table-layout: fixed, vertical-align: top, height on td, :last-child, @media (max-width)

Build guide

1. Write the header row with day names starting Saturday.
2. Write the day cells in rows of seven, padding the first row with empty cells.
3. Add a span for event labels.
4. Fix the layout and set tall cells aligned top.
5. Colour the last column.
6. On narrow screens shrink event labels to dots.

Project 993: index.html

Project 996: Month calendar for Port Said Seafood

Theme: Port Said Seafood (Port Said) | Level 3 | Files: index.html, styles.css

Brief

Draw a month grid as a table with fixed equal columns, tall cells, event labels that shrink to dots on phones and a highlighted Friday column.

Learning goals

- Use table-layout: fixed for equal columns
- Use :last-child for a column
- Adapt content presentation with a media query

Elements and CSS used

HTML elements	CSS features
table, caption, thead, tbody, tr, th, td, span	table-layout: fixed, vertical-align: top, height on td, :last-child, @media (max-width)

Build guide

1. Write the header row with day names starting Saturday.
2. Write the day cells in rows of seven, padding the first row with empty cells.
3. Add a span for event labels.
4. Fix the layout and set tall cells aligned top.
5. Colour the last column.
6. On narrow screens shrink event labels to dots.

Project 996: index.html

```
<!DOCTYPE html>

Project 996 explained line by line

The important lines of index.html

Line	What it does
<!DOCTYPE html>	Declares modern HTML so the browser renders in standards mode.
<html lang="en">	Root element; lang tells screen readers and search engines the page language.
<meta charset="utf-8">	Character encoding: makes Arabic, accents and symbols display correctly.
<meta name="viewport" content="width=device-width, initial-scale=1">	Makes the page use the real device width on phones.
<title>Port Said Seafood - September</title>	Text shown in the browser tab and search results.
<link rel="stylesheet" href="styles.css">	Loads the external CSS file styles.css.
<main>	The unique content of this page; exactly one per page.
Port Said Seafood calendar	The main heading; only one per page.
<table class="cal">	Tabular data in rows and columns.
<caption>September 2026</caption>	Title of the table.
<thead><tr><th>Sat</th><th>Sun</th><th>Mon</th><th>Tue</th><th>Wed<...	Group of header rows.
<tbody>	Group of data rows.
<tr><td></td><td></td><td>1</td><td>2</td><td>3</td><td>4</td><td c...	A table row.

Line	What it does
<tr><td>6</td><td>7</td><td>8</td><td>9</td><td>10</td><td>11</td><...	A data cell.
<tr><td>13</td><td>14</td><td>15</td><td>16</td><td>17</td><td>18<//...	Generic inline container for styling.

The important declarations of styles.css

Declaration	What it does
*, *::before, *::after {	Generated content inserted before the element's content (decorations, numbers, lines).
box-sizing: border-box;	Width and height include padding and border, which makes sizing predictable.
:root {	Custom properties (variables) defined on the root so every element can use them.
--brand: #0e7490;	The brand colour variable; change it once and every use follows.
margin: 0;	Space outside the element.
font-family: system-ui, Arial, sans-serif;	The typeface stack: preferred font first, fallbacks after.
line-height: 1.6;	Space between lines; 1.5 to 1.7 is comfortable for body text.
color: var(--ink);	Text colour.
max-width: 56rem;	Limits how wide the element can grow, keeping lines readable.
padding: 0 1rem;	Space inside the element between its border and content.
width: 100%;	Fills the container width.

Declaration	What it does
border-collapse: collapse;	Merges adjacent table cell borders into single lines.
table-layout: fixed;	Columns get equal widths regardless of content; faster rendering.
font-size: 1.3rem;	Size of the text.
font-weight: 700;	Thickness of the text.
background: var(--accent);	Background colour or image.
vertical-align: top;	Aligns cell content to the top.
border: 1px solid var(--line);	Changes the visual order of a flex item without changing the source.
display: block;	Element starts on a new line and fills the width (used on links and images).
border-radius: 4px;	Rounds the corners.
th:last-child, td:last-child {	The last child of its parent.
@media (max-width: 600px) { td { height: 3rem; } td span { font-siz...	Turns a square into a circle.

Check your work

- Seven cells in every row
- Columns equal width
- Events visible on mobile as dots
- Caption gives the month

Exercises

1. Generate the cells with JavaScript for any month.
2. Highlight today with a class.
3. Make cells links to day pages.

The important declarations of styles.css

Declaration	What it does
*, *::before, *::after {	Generated content inserted before the element's content (decorations, numbers, lines).
box-sizing: border-box;	Width and height include padding and border, which makes sizing predictable.
:root {	Custom properties (variables) defined on the root so every element can use them.
--brand: #dc2626;	The brand colour variable; change it once and every use follows.
margin: 0;	Space outside the element.
font-family: system-ui, Arial, sans-serif;	The typeface stack: preferred font first, fallbacks after.
line-height: 1.6;	Space between lines; 1.5 to 1.7 is comfortable for body text.
color: var(--ink);	Text colour.
max-width: 56rem;	Limits how wide the element can grow, keeping lines readable.
padding: 0 1rem;	Space inside the element between its border and content.
width: 100%;	Fills the container width.

Declaration	What it does
border-collapse: collapse;	Merges adjacent table cell borders into single lines.
table-layout: fixed;	Columns get equal widths regardless of content; faster rendering.
font-size: 1.3rem;	Size of the text.
font-weight: 700;	Thickness of the text.
background: var(--accent);	Background colour or image.
vertical-align: top;	Aligns cell content to the top.
border: 1px solid var(--line);	Changes the visual order of a flex item without changing the source.
display: block;	Element starts on a new line and fills the width (used on links and images).
border-radius: 4px;	Rounds the corners.
th:last-child, td:last-child {	The last child of its parent.
@media (max-width: 600px) { td { height: 3rem; } td span { font-siz...	Turns a square into a circle.

Check your work

- Seven cells in every row
- Columns equal width
- Events visible on mobile as dots
- Caption gives the month

Exercises

1. Generate the cells with JavaScript for any month.
2. Highlight today with a class.
3. Make cells links to day pages.

Theme data for this project

Field	Value
Business	Ismailia Cycling Store
Tagline	Bikes, parts and Friday group rides
City	Ismailia
Owner	Bassem Adly
Brand colour	#dc2626
Accent colour	#fef2f2
Offers	City bike (6500 EGP); Mountain bike (11000 EGP); Kids bike (3200 EGP); Tune-up (250 EGP)

Project 1000: Month calendar for Minya Coding Club

Theme: Minya Coding Club (Minya) | Level 3 | Files: index.html, styles.css

Brief

Draw a month grid as a table with fixed equal columns, tall cells, event labels that shrink to dots on phones and a highlighted Friday column.

Learning goals

- Use table-layout: fixed for equal columns
- Use :last-child for a column
- Adapt content presentation with a media query

Elements and CSS used

HTML elements	CSS features
table, caption, thead, tbody, tr, th, td, span	table-layout: fixed, vertical-align: top, height on td, :last-child, @media (max-width)

Build guide

1. Write the header row with day names starting Saturday.
2. Write the day cells in rows of seven, padding the first row with empty cells.
3. Add a span for event labels.
4. Fix the layout and set tall cells aligned top.
5. Colour the last column.
6. On narrow screens shrink event labels to dots.

Project 1000: index.html

```

Project type: Responsive hamburger menu

Level 3 | 25 projects, one per theme

Build a navigation that is a horizontal bar on desktop and collapses behind a hamburger button on phones, toggled by a hidden checkbox and no JavaScript.

Project 1001: Responsive hamburger menu for Cairo Book Shop

Theme: Cairo Book Shop (Giza) | Level 3 | Files: index.html, styles.css

Brief

Build a navigation that is a horizontal bar on desktop and collapses behind a hamburger button on phones, toggled by a hidden checkbox and no JavaScript.

Learning goals

- Use the checkbox hack with :checked ~
- Switch layouts with a min-width media query
- Use flex-basis: 100% to wrap an item to its own line

Elements and CSS used

HTML elements	CSS features
header, input type=checkbox, label, nav, ul, li, a	:checked ~, flex-basis: 100%, display: none/block, @media (min-width), flex-wrap

Build guide

1. Write the header: logo, hidden checkbox, label as the burger, nav.
2. Mobile first: hide .menu; show when the checkbox is checked.
3. Make .menu take the full row with flex-basis: 100%.
4. At 700px hide the burger and always show the menu inline.
5. Style links for both modes.

6. Test with keyboard: Space on the focused label toggles the checkbox.

Project 1001: index.html

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="utf-8">

<main><h1>Resize the window</h1><p>Below 700px the menu hides behin...	The unique content of this page; exactly one per page.

The important declarations of styles.css

Declaration	What it does
*, *::before, *::after {	Generated content inserted before the element's content (decorations, numbers, lines).
box-sizing: border-box;	Width and height include padding and border, which makes sizing predictable.
:root {	Custom properties (variables) defined on the root so every element can use them.
--brand: #b90000;	The brand colour variable; change it once and every use follows.
margin: 0;	Space outside the element.
font-family: system-ui, Arial, sans-serif;	The typeface stack: preferred font first, fallbacks after.
line-height: 1.6;	Space between lines; 1.5 to 1.7 is comfortable for body text.
color: var(--ink);	Text colour.
display: flex;	Turns the element into a flex container (one-dimensional layout).
align-items: center;	Centres items on the cross axis.
justify-content: space-between;	Spreads items so the first touches the start and the last the end.
flex-wrap: wrap;	Allows flex items to move to a new line when they do not fit.
padding: .75rem 1rem;	Space inside the element between its border and content.

Declaration	What it does
background: var(--brand);	Background colour or image.
text-decoration: none;	Removes the underline from links.
font-weight: 700;	Thickness of the text.
font-size: 1.6rem;	Size of the text.
cursor: pointer;	Shows the hand cursor to indicate something clickable.
flex-basis: 100%;	The item takes a whole line, pushing the next items down.
display: none;	Removes the element from rendering completely.
.toggle:checked ~ .menu {	Applies to a checked radio or checkbox; combined with ~ it drives CSS-only widgets.
display: block;	Element starts on a new line and fills the width (used on links and images).
list-style: none;	Removes bullets or numbers from a list.
border-top: 1px solid rgb(255 255 255 / 25%);	A top border used as an accent or separator.
@media (min-width: 700px) {	Applies from the given width upwards (mobile-first breakpoint).
gap: .5rem;	Space between grid or flex items without extra margins.
border: 0;	Changes the visual order of a flex item without changing the source.
border-radius: 6px;	Rounds the corners.
.menu a:hover {	Applies while the pointer is over the element.

Check your work

- Menu opens and closes on mobile
- Burger hidden on desktop
- Label has an aria-label
- No horizontal scrollbar at 320px

Exercises

1. Animate the menu opening with grid-template-rows: 0fr to 1fr.
2. Rebuild with a <button> and aria-expanded using JavaScript.
3. Add a close (X) state to the burger icon.

Project 1003: Responsive hamburger menu for Pyramid Fitness

Theme: Pyramid Fitness (6th of October) | Level 3 | Files: index.html, styles.css

Brief

Build a navigation that is a horizontal bar on desktop and collapses behind a hamburger button on phones, toggled by a hidden checkbox and no JavaScript.

Learning goals

- Use the checkbox hack with :checked ~
- Switch layouts with a min-width media query
- Use flex-basis: 100% to wrap an item to its own line

Elements and CSS used

HTML elements	CSS features
header, input type=checkbox, label, nav, ul, li, a	:checked ~, flex-basis: 100%, display: none/block, @media (min-width), flex-wrap

Build guide

1. Write the header: logo, hidden checkbox, label as the burger, nav.
2. Mobile first: hide .menu; show when the checkbox is checked.
3. Make .menu take the full row with flex-basis: 100%.
4. At 700px hide the burger and always show the menu inline.
5. Style links for both modes.

6. Test with keyboard: Space on the focused label toggles the checkbox.

Project 1003: index.html

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="utf-8">
  <meta name="viewport" content="width=device-width, initial-scale=1">

Project 1003 explained line by line

The important lines of index.html

Line	What it does
<!DOCTYPE html>	Declares modern HTML so the browser renders in standards mode.
<html lang="en">	Root element; lang tells screen readers and search engines the page language.
<meta charset="utf-8">	Character encoding: makes Arabic, accents and symbols display correctly.
<meta name="viewport" content="width=device-width, initial-scale=1">	Makes the page use the real device width on phones.
<title>Pyramid Fitness - Mobile menu</title>	Text shown in the browser tab and search results.
<link rel="stylesheet" href="styles.css">	Loads the external CSS file styles.css.
<header class="top">	Introductory content: logo, title, navigation.
<input type="checkbox" id="menu-toggle" class="toggle" hidden>	Checkbox: on or off.
<label for="menu-toggle" class="burger" aria-label="Open menu">&#97...	Text label for a control; for matches the control's id, or the label wraps the control.
<nav class="menu" aria-label="Main">	A block of navigation links; aria-label names it for screen readers.
	Unordered (bulleted) list.
Home	A hyperlink; href gives the destination.
Morning yoga	One list item.

Line	What it does
<main><h1>Resize the window</h1><p>Below 700px the menu hides behin...	The unique content of this page; exactly one per page.

The important declarations of styles.css

Declaration	What it does
*, *::before, *::after {	Generated content inserted before the element's content (decorations, numbers, lines).
box-sizing: border-box;	Width and height include padding and border, which makes sizing predictable.
:root {	Custom properties (variables) defined on the root so every element can use them.
--brand: #0f766e;	The brand colour variable; change it once and every use follows.
margin: 0;	Space outside the element.
font-family: system-ui, Arial, sans-serif;	The typeface stack: preferred font first, fallbacks after.
line-height: 1.6;	Space between lines; 1.5 to 1.7 is comfortable for body text.
color: var(--ink);	Text colour.
display: flex;	Turns the element into a flex container (one-dimensional layout).
align-items: center;	Centres items on the cross axis.
justify-content: space-between;	Spreads items so the first touches the start and the last the end.
flex-wrap: wrap;	Allows flex items to move to a new line when they do not fit.
padding: .75rem 1rem;	Space inside the element between its border and content.

Declaration	What it does
background: var(--brand);	Background colour or image.
text-decoration: none;	Removes the underline from links.
font-weight: 700;	Thickness of the text.
font-size: 1.6rem;	Size of the text.
cursor: pointer;	Shows the hand cursor to indicate something clickable.
flex-basis: 100%;	The item takes a whole line, pushing the next items down.
display: none;	Removes the element from rendering completely.
.toggle:checked ~ .menu {	Applies to a checked radio or checkbox; combined with ~ it drives CSS-only widgets.
display: block;	Element starts on a new line and fills the width (used on links and images).
list-style: none;	Removes bullets or numbers from a list.
border-top: 1px solid rgb(255 255 255 / 25%);	A top border used as an accent or separator.
@media (min-width: 700px) {	Applies from the given width upwards (mobile-first breakpoint).
gap: .5rem;	Space between grid or flex items without extra margins.
border: 0;	Changes the visual order of a flex item without changing the source.
border-radius: 6px;	Rounds the corners.
.menu a:hover {	Applies while the pointer is over the element.

Check your work

- Menu opens and closes on mobile
- Burger hidden on desktop
- Label has an aria-label
- No horizontal scrollbar at 320px

Exercises

1. Animate the menu opening with grid-template-rows: 0fr to 1fr.
2. Rebuild with a <button> and aria-expanded using JavaScript.
3. Add a close (X) state to the burger icon.

Project 1006 explained line by line

The important lines of index.html

Line	What it does
<!DOCTYPE html>	Declares modern HTML so the browser renders in standards mode.
<html lang="en">	Root element; lang tells screen readers and search engines the page language.
<meta charset="utf-8">	Character encoding: makes Arabic, accents and symbols display correctly.
<meta name="viewport" content="width=device-width, initial-scale=1">	Makes the page use the real device width on phones.
<title>Lotus Language School - Mobile menu</title>	Text shown in the browser tab and search results.
<link rel="stylesheet" href="styles.css">	Loads the external CSS file styles.css.
<header class="top">	Introductory content: logo, title, navigation.
<input type="checkbox" id="menu-toggle" class="toggle" hidden>	Checkbox: on or off.
<label for="menu-toggle" class="burger" aria-label="Open menu">&#97...	Text label for a control; for matches the control's id, or the label wraps the control.
<nav class="menu" aria-label="Main">	A block of navigation links; aria-label names it for screen readers.
	Unordered (bulleted) list.
Home	A hyperlink; href gives the destination.
English A1	One list item.

Line	What it does
<main><h1>Resize the window</h1><p>Below 700px the menu hides behin...	The unique content of this page; exactly one per page.

The important declarations of styles.css

Declaration	What it does
*, *::before, *::after {	Generated content inserted before the element's content (decorations, numbers, lines).
box-sizing: border-box;	Width and height include padding and border, which makes sizing predictable.
:root {	Custom properties (variables) defined on the root so every element can use them.
--brand: #7c3aed;	The brand colour variable; change it once and every use follows.
margin: 0;	Space outside the element.
font-family: system-ui, Arial, sans-serif;	The typeface stack: preferred font first, fallbacks after.
line-height: 1.6;	Space between lines; 1.5 to 1.7 is comfortable for body text.
color: var(--ink);	Text colour.
display: flex;	Turns the element into a flex container (one-dimensional layout).
align-items: center;	Centres items on the cross axis.
justify-content: space-between;	Spreads items so the first touches the start and the last the end.
flex-wrap: wrap;	Allows flex items to move to a new line when they do not fit.
padding: .75rem 1rem;	Space inside the element between its border and content.

Declaration	What it does
background: var(--brand);	Background colour or image.
text-decoration: none;	Removes the underline from links.
font-weight: 700;	Thickness of the text.
font-size: 1.6rem;	Size of the text.
cursor: pointer;	Shows the hand cursor to indicate something clickable.
flex-basis: 100%;	The item takes a whole line, pushing the next items down.
display: none;	Removes the element from rendering completely.
.toggle:checked ~ .menu {	Applies to a checked radio or checkbox; combined with ~ it drives CSS-only widgets.
display: block;	Element starts on a new line and fills the width (used on links and images).
list-style: none;	Removes bullets or numbers from a list.
border-top: 1px solid rgb(255 255 255 / 25%);	A top border used as an accent or separator.
@media (min-width: 700px) {	Applies from the given width upwards (mobile-first breakpoint).
gap: .5rem;	Space between grid or flex items without extra margins.
border: 0;	Changes the visual order of a flex item without changing the source.
border-radius: 6px;	Rounds the corners.
.menu a:hover {	Applies while the pointer is over the element.

Check your work

- Menu opens and closes on mobile
- Burger hidden on desktop
- Label has an aria-label
- No horizontal scrollbar at 320px

Exercises

1. Animate the menu opening with grid-template-rows: 0fr to 1fr.
2. Rebuild with a <button> and aria-expanded using JavaScript.
3. Add a close (X) state to the burger icon.

Theme data for this project

Field	Value

Project 1007: Responsive hamburger menu for Green Leaf Cafe

Theme: Green Leaf Cafe (Zamalek) | Level 3 | Files: index.html, styles.css

Brief

Build a navigation that is a horizontal bar on desktop and collapses behind a hamburger button on phones, toggled by a hidden checkbox and no JavaScript.

Learning goals

- Use the checkbox hack with :checked ~
- Switch layouts with a min-width media query
- Use flex-basis: 100% to wrap an item to its own line

Elements and CSS used

HTML elements	CSS features
header, input type=checkbox, label, nav, ul, li, a	:checked ~, flex-basis: 100%, display: none/block, @media (min-width), flex-wrap

Build guide

1. Write the header: logo, hidden checkbox, label as the burger, nav.
2. Mobile first: hide .menu; show when the checkbox is checked.
3. Make .menu take the full row with flex-basis: 100%.
4. At 700px hide the burger and always show the menu inline.
5. Style links for both modes.

6. Test with keyboard: Space on the focused label toggles the checkbox.

Project 1007: index.html

```
<!DOCTYPE html>
<html lang="en">
<head>

Home	A hyperlink; href gives the destination.
Portrait session	One list item.

Line	What it does
<main><h1>Resize the window</h1><p>Below 700px the menu hides behin...	The unique content of this page; exactly one per page.

The important declarations of styles.css

Declaration	What it does
*, *::before, *::after {	Generated content inserted before the element's content (decorations, numbers, lines).
box-sizing: border-box;	Width and height include padding and border, which makes sizing predictable.
:root {	Custom properties (variables) defined on the root so every element can use them.
--brand: #111827;	The brand colour variable; change it once and every use follows.
margin: 0;	Space outside the element.
font-family: system-ui, Arial, sans-serif;	The typeface stack: preferred font first, fallbacks after.
line-height: 1.6;	Space between lines; 1.5 to 1.7 is comfortable for body text.
color: var(--ink);	Text colour.
display: flex;	Turns the element into a flex container (one-dimensional layout).
align-items: center;	Centres items on the cross axis.
justify-content: space-between;	Spreads items so the first touches the start and the last the end.
flex-wrap: wrap;	Allows flex items to move to a new line when they do not fit.
padding: .75rem 1rem;	Space inside the element between its border and content.

Declaration	What it does
background: var(--brand);	Background colour or image.
text-decoration: none;	Removes the underline from links.
font-weight: 700;	Thickness of the text.
font-size: 1.6rem;	Size of the text.
cursor: pointer;	Shows the hand cursor to indicate something clickable.
flex-basis: 100%;	The item takes a whole line, pushing the next items down.
display: none;	Removes the element from rendering completely.
.toggle:checked ~ .menu {	Applies to a checked radio or checkbox; combined with ~ it drives CSS-only widgets.
display: block;	Element starts on a new line and fills the width (used on links and images).
list-style: none;	Removes bullets or numbers from a list.
border-top: 1px solid rgb(255 255 255 / 25%);	A top border used as an accent or separator.
@media (min-width: 700px) {	Applies from the given width upwards (mobile-first breakpoint).
gap: .5rem;	Space between grid or flex items without extra margins.
border: 0;	Changes the visual order of a flex item without changing the source.
border-radius: 6px;	Rounds the corners.
.menu a:hover {	Applies while the pointer is over the element.

Check your work

- Menu opens and closes on mobile
- Burger hidden on desktop
- Label has an aria-label
- No horizontal scrollbar at 320px

Exercises

1. Animate the menu opening with grid-template-rows: 0fr to 1fr.
2. Rebuild with a <button> and aria-expanded using JavaScript.
3. Add a close (X) state to the burger icon.

Theme data for this project

Business	Horizon Photography
Tagline	Portraits, weddings and product photography
City	Maadi
Owner	Adham Nabil
Brand colour	#111827
Accent colour	#f3f4f6
Offers	Portrait session (1200 EGP); Wedding day (15000 EGP); Product shoot (900 EGP); Family session (1500 EGP)

Project 1010: Responsive hamburger menu for Papyrus Stationery

Theme: Papyrus Stationery (Heliopolis) | Level 3 | Files: index.html, styles.css

Brief

Build a navigation that is a horizontal bar on desktop and collapses behind a hamburger button on phones, toggled by a hidden checkbox and no JavaScript.

Learning goals

- Use the checkbox hack with :checked ~
- Switch layouts with a min-width media query
- Use flex-basis: 100% to wrap an item to its own line

Elements and CSS used

HTML elements	CSS features
header, input type=checkbox, label, nav, ul, li, a	:checked ~, flex-basis: 100%, display: none/block, @media (min-width), flex-wrap

Build guide

1. Write the header: logo, hidden checkbox, label as the burger, nav.
2. Mobile first: hide .menu; show when the checkbox is checked.
3. Make .menu take the full row with flex-basis: 100%.
4. At 700px hide the burger and always show the menu inline.
5. Style links for both modes.

6. Test with keyboard: Space on the focused label toggles the checkbox.

Project 1010: index.html

```
<!DOCTYPE html>

Project 1013: Responsive hamburger menu for Byte Repair

Theme: Byte Repair (Nasr City) | Level 3 | Files: index.html, styles.css

Brief

Build a navigation that is a horizontal bar on desktop and collapses behind a hamburger button on phones, toggled by a hidden checkbox and no JavaScript.

Learning goals

- Use the checkbox hack with :checked ~
- Switch layouts with a min-width media query
- Use flex-basis: 100% to wrap an item to its own line

Elements and CSS used

HTML elements	CSS features
header, input type=checkbox, label, nav, ul, li, a	:checked ~, flex-basis: 100%, display: none/block, @media (min-width), flex-wrap

Build guide

1. Write the header: logo, hidden checkbox, label as the burger, nav.
2. Mobile first: hide .menu; show when the checkbox is checked.
3. Make .menu take the full row with flex-basis: 100%.
4. At 700px hide the burger and always show the menu inline.
5. Style links for both modes.

6. Test with keyboard: Space on the focused label toggles the checkbox.

Project 1013: index.html

```
<!DOCTYPE html>

Project 1013 explained line by line

The important lines of index.html

Line	What it does
<!DOCTYPE html>	Declares modern HTML so the browser renders in standards mode.
<html lang="en">	Root element; lang tells screen readers and search engines the page language.
<meta charset="utf-8">	Character encoding: makes Arabic, accents and symbols display correctly.
<meta name="viewport" content="width=device-width, initial-scale=1">	Makes the page use the real device width on phones.
<title>Byte Repair - Mobile menu</title>	Text shown in the browser tab and search results.
<link rel="stylesheet" href="styles.css">	Loads the external CSS file styles.css.
<header class="top">	Introductory content: logo, title, navigation.
<input type="checkbox" id="menu-toggle" class="toggle" hidden>	Checkbox: on or off.
<label for="menu-toggle" class="burger" aria-label="Open menu">&#97...	Text label for a control; for matches the control's id, or the label wraps the control.
<nav class="menu" aria-label="Main">	A block of navigation links; aria-label names it for screen readers.
	Unordered (bulleted) list.
Home	A hyperlink; href gives the destination.
Screen replacement	One list item.

Line	What it does
<main><h1>Resize the window</h1><p>Below 700px the menu hides behin...	The unique content of this page; exactly one per page.

The important declarations of styles.css

Declaration	What it does
*, *::before, *::after {	Generated content inserted before the element's content (decorations, numbers, lines).
box-sizing: border-box;	Width and height include padding and border, which makes sizing predictable.
:root {	Custom properties (variables) defined on the root so every element can use them.
--brand: #0891b2;	The brand colour variable; change it once and every use follows.
margin: 0;	Space outside the element.
font-family: system-ui, Arial, sans-serif;	The typeface stack: preferred font first, fallbacks after.
line-height: 1.6;	Space between lines; 1.5 to 1.7 is comfortable for body text.
color: var(--ink);	Text colour.
display: flex;	Turns the element into a flex container (one-dimensional layout).
align-items: center;	Centres items on the cross axis.
justify-content: space-between;	Spreads items so the first touches the start and the last the end.
flex-wrap: wrap;	Allows flex items to move to a new line when they do not fit.
padding: .75rem 1rem;	Space inside the element between its border and content.

Declaration	What it does
background: var(--brand);	Background colour or image.
text-decoration: none;	Removes the underline from links.
font-weight: 700;	Thickness of the text.
font-size: 1.6rem;	Size of the text.
cursor: pointer;	Shows the hand cursor to indicate something clickable.
flex-basis: 100%;	The item takes a whole line, pushing the next items down.
display: none;	Removes the element from rendering completely.
.toggle:checked ~ .menu {	Applies to a checked radio or checkbox; combined with ~ it drives CSS-only widgets.
display: block;	Element starts on a new line and fills the width (used on links and images).
list-style: none;	Removes bullets or numbers from a list.
border-top: 1px solid rgb(255 255 255 / 25%);	A top border used as an accent or separator.
@media (min-width: 700px) {	Applies from the given width upwards (mobile-first breakpoint).
gap: .5rem;	Space between grid or flex items without extra margins.
border: 0;	Changes the visual order of a flex item without changing the source.
border-radius: 6px;	Rounds the corners.
.menu a:hover {	Applies while the pointer is over the element.

Check your work

- Menu opens and closes on mobile
- Burger hidden on desktop
- Label has an aria-label
- No horizontal scrollbar at 320px

Exercises

1. Animate the menu opening with grid-template-rows: 0fr to 1fr.
2. Rebuild with a <button> and aria-expanded using JavaScript.
3. Add a close (X) state to the burger icon.

  .menu a:hover { background: rgb(255 255 255 / 20%); }
}
main { padding: 2rem 1rem; }
```

Project 1016 explained line by line

The important lines of index.html

Line	What it does
<!DOCTYPE html>	Declares modern HTML so the browser renders in standards mode.
<html lang="en">	Root element; lang tells screen readers and search engines the page language.
<meta charset="utf-8">	Character encoding: makes Arabic, accents and symbols display correctly.
<meta name="viewport" content="width=device-width, initial-scale=1">	Makes the page use the real device width on phones.
<title>Habiba Handmade Jewellery - Mobile menu</title>	Text shown in the browser tab and search results.
<link rel="stylesheet" href="styles.css">	Loads the external CSS file styles.css.
<header class="top">	Introductory content: logo, title, navigation.
<input type="checkbox" id="menu-toggle" class="toggle" hidden>	Checkbox: on or off.
<label for="menu-toggle" class="burger" aria-label="Open menu">&#97...	Text label for a control; for matches the control's id, or the label wraps the control.
<nav class="menu" aria-label="Main">	A block of navigation links; aria-label names it for screen readers.
	Unordered (bulleted) list.
Home	A hyperlink; href gives the destination.

Line	What it does
Lotus pendant	One list item.
<main><h1>Resize the window</h1><p>Below 700px the menu hides behin...	The unique content of this page; exactly one per page.

The important declarations of styles.css

Declaration	What it does
*, *::before, *::after {	Generated content inserted before the element's content (decorations, numbers, lines).
box-sizing: border-box;	Width and height include padding and border, which makes sizing predictable.
:root {	Custom properties (variables) defined on the root so every element can use them.
--brand: #a16207;	The brand colour variable; change it once and every use follows.
margin: 0;	Space outside the element.
font-family: system-ui, Arial, sans-serif;	The typeface stack: preferred font first, fallbacks after.
line-height: 1.6;	Space between lines; 1.5 to 1.7 is comfortable for body text.
color: var(--ink);	Text colour.
display: flex;	Turns the element into a flex container (one-dimensional layout).
align-items: center;	Centres items on the cross axis.
justify-content: space-between;	Spreads items so the first touches the start and the last the end.
flex-wrap: wrap;	Allows flex items to move to a new line when they do not fit.

Declaration	What it does
padding: .75rem 1rem;	Space inside the element between its border and content.
background: var(--brand);	Background colour or image.
text-decoration: none;	Removes the underline from links.
font-weight: 700;	Thickness of the text.
font-size: 1.6rem;	Size of the text.
cursor: pointer;	Shows the hand cursor to indicate something clickable.
flex-basis: 100%;	The item takes a whole line, pushing the next items down.
display: none;	Removes the element from rendering completely.
.toggle:checked ~ .menu {	Applies to a checked radio or checkbox; combined with ~ it drives CSS-only widgets.
display: block;	Element starts on a new line and fills the width (used on links and images).
list-style: none;	Removes bullets or numbers from a list.
border-top: 1px solid rgb(255 255 255 / 25%);	A top border used as an accent or separator.
@media (min-width: 700px) {	Applies from the given width upwards (mobile-first breakpoint).
gap: .5rem;	Space between grid or flex items without extra margins.
border: 0;	Changes the visual order of a flex item without changing the source.
border-radius: 6px;	Rounds the corners.
.menu a:hover {	Applies while the pointer is over the element.

Check your work

- Menu opens and closes on mobile
- Burger hidden on desktop
- Label has an aria-label
- No horizontal scrollbar at 320px

Exercises

1. Animate the menu opening with grid-template-rows: 0fr to 1fr.
2. Rebuild with a <button> and aria-expanded using JavaScript.
3. Add a close (X) state to the burger icon.

Theme data for this project

Field	Value
Business	Habiba Handmade Jewellery
Tagline	Silver and brass pieces inspired by Nubia
City	Aswan
Owner	Habiba Saleh
Brand colour	#a16207
Accent colour	#fefce8
Offers	Lotus pendant (650 EGP); Brass cuff (420 EGP); Bead earrings (180 EGP); Ankh ring (300 EGP)

Project 1017: Responsive hamburger menu for Fayoum Pottery Studio

Theme: Fayoum Pottery Studio (Tunis Village) | Level 3 | Files: index.html, styles.css

Brief

Build a navigation that is a horizontal bar on desktop and collapses behind a hamburger button on phones, toggled by a hidden checkbox and no JavaScript.

Learning goals

- Use the checkbox hack with :checked ~
- Switch layouts with a min-width media query
- Use flex-basis: 100% to wrap an item to its own line

Elements and CSS used

HTML elements	CSS features
header, input type=checkbox, label, nav, ul, li, a	:checked ~, flex-basis: 100%, display: none/block, @media (min-width), flex-wrap

Build guide

1. Write the header: logo, hidden checkbox, label as the burger, nav.
2. Mobile first: hide .menu; show when the checkbox is checked.
3. Make .menu take the full row with flex-basis: 100%.
4. At 700px hide the burger and always show the menu inline.
5. Style links for both modes.

6. Test with keyboard: Space on the focused label toggles the checkbox.

Project 1017: index.html

```

<label for="menu-toggle" class="burger" aria-label="Open menu">&#97...	Text label for a control; for matches the control's id, or the label wraps the control.
<nav class="menu" aria-label="Main">	A block of navigation links; aria-label names it for screen readers.
	Unordered (bulleted) list.
Home	A hyperlink; href gives the destination.
Oil change	One list item.

Line	What it does
<main><h1>Resize the window</h1><p>Below 700px the menu hides behin...	The unique content of this page; exactly one per page.

The important declarations of styles.css

Declaration	What it does
*, *::before, *::after {	Generated content inserted before the element's content (decorations, numbers, lines).
box-sizing: border-box;	Width and height include padding and border, which makes sizing predictable.
:root {	Custom properties (variables) defined on the root so every element can use them.
--brand: #374151;	The brand colour variable; change it once and every use follows.
margin: 0;	Space outside the element.
font-family: system-ui, Arial, sans-serif;	The typeface stack: preferred font first, fallbacks after.
line-height: 1.6;	Space between lines; 1.5 to 1.7 is comfortable for body text.
color: var(--ink);	Text colour.
display: flex;	Turns the element into a flex container (one-dimensional layout).
align-items: center;	Centres items on the cross axis.
justify-content: space-between;	Spreads items so the first touches the start and the last the end.
flex-wrap: wrap;	Allows flex items to move to a new line when they do not fit.
padding: .75rem 1rem;	Space inside the element between its border and content.

Declaration	What it does
background: var(--brand);	Background colour or image.
text-decoration: none;	Removes the underline from links.
font-weight: 700;	Thickness of the text.
font-size: 1.6rem;	Size of the text.
cursor: pointer;	Shows the hand cursor to indicate something clickable.
flex-basis: 100%;	The item takes a whole line, pushing the next items down.
display: none;	Removes the element from rendering completely.
.toggle:checked ~ .menu {	Applies to a checked radio or checkbox; combined with ~ it drives CSS-only widgets.
display: block;	Element starts on a new line and fills the width (used on links and images).
list-style: none;	Removes bullets or numbers from a list.
border-top: 1px solid rgb(255 255 255 / 25%);	A top border used as an accent or separator.
@media (min-width: 700px) {	Applies from the given width upwards (mobile-first breakpoint).
gap: .5rem;	Space between grid or flex items without extra margins.
border: 0;	Changes the visual order of a flex item without changing the source.
border-radius: 6px;	Rounds the corners.
.menu a:hover {	Applies while the pointer is over the element.

Check your work

- Menu opens and closes on mobile
- Burger hidden on desktop
- Label has an aria-label
- No horizontal scrollbar at 320px

Exercises

1. Animate the menu opening with grid-template-rows: 0fr to 1fr.
2. Rebuild with a <button> and aria-expanded using JavaScript.
3. Add a close (X) state to the burger icon.

Theme data for this project

Field	Value
Business	Suez Auto Service
Tagline	Honest car servicing and repairs
City	Suez
Owner	Khaled Nasser
Brand colour	#374151
Accent colour	#f9fafb
Offers	Oil change (600 EGP); Brake pads (1400 EGP); Air conditioning (900 EGP); Pre-purchase inspection (750 EGP)

Project 1020: Responsive hamburger menu for Luxor Music Academy

Theme: Luxor Music Academy (Luxor) | Level 3 | Files: index.html, styles.css

Brief

Build a navigation that is a horizontal bar on desktop and collapses behind a hamburger button on phones, toggled by a hidden checkbox and no JavaScript.

Learning goals

- Use the checkbox hack with :checked ~
- Switch layouts with a min-width media query
- Use flex-basis: 100% to wrap an item to its own line

Elements and CSS used

HTML elements	CSS features
header, input type=checkbox, label, nav, ul, li, a	:checked ~, flex-basis: 100%, display: none/block, @media (min-width), flex-wrap

Build guide

1. Write the header: logo, hidden checkbox, label as the burger, nav.
2. Mobile first: hide .menu; show when the checkbox is checked.
3. Make .menu take the full row with flex-basis: 100%.
4. At 700px hide the burger and always show the menu inline.
5. Style links for both modes.

6. Test with keyboard: Space on the focused label toggles the checkbox.

Project 1020: index.html

```

list-style: none;	Removes bullets or numbers from a list.
border-top: 1px solid rgb(255 255 255 / 25%);	A top border used as an accent or separator.
@media (min-width: 700px) {	Applies from the given width upwards (mobile-first breakpoint).
gap: .5rem;	Space between grid or flex items without extra margins.
border: 0;	Changes the visual order of a flex item without changing the source.
border-radius: 6px;	Rounds the corners.
.menu a:hover {	Applies while the pointer is over the element.

Check your work

- Menu opens and closes on mobile
- Burger hidden on desktop
- Label has an aria-label
- No horizontal scrollbar at 320px

Exercises

1. Animate the menu opening with grid-template-rows: 0fr to 1fr.
2. Rebuild with a <button> and aria-expanded using JavaScript.
3. Add a close (X) state to the burger icon.

Project 1023: Responsive hamburger menu for Nubian Guest House

Theme: Nubian Guest House (Aswan) | Level 3 | Files: index.html, styles.css

Brief

Build a navigation that is a horizontal bar on desktop and collapses behind a hamburger button on phones, toggled by a hidden checkbox and no JavaScript.

Learning goals

- Use the checkbox hack with :checked ~
- Switch layouts with a min-width media query
- Use flex-basis: 100% to wrap an item to its own line

Elements and CSS used

HTML elements	CSS features
header, input type=checkbox, label, nav, ul, li, a	:checked ~, flex-basis: 100%, display: none/block, @media (min-width), flex-wrap

Build guide

1. Write the header: logo, hidden checkbox, label as the burger, nav.
2. Mobile first: hide .menu; show when the checkbox is checked.
3. Make .menu take the full row with flex-basis: 100%.
4. At 700px hide the burger and always show the menu inline.
5. Style links for both modes.

6. Test with keyboard: Space on the focused label toggles the checkbox.

Project 1023: index.html

```

Project 1023 explained line by line

The important lines of index.html

Line	What it does
<!DOCTYPE html>	Declares modern HTML so the browser renders in standards mode.
<html lang="en">	Root element; lang tells screen readers and search engines the page language.
<meta charset="utf-8">	Character encoding: makes Arabic, accents and symbols display correctly.
<meta name="viewport" content="width=device-width, initial-scale=1">	Makes the page use the real device width on phones.
<title>Nubian Guest House - Mobile menu</title>	Text shown in the browser tab and search results.
<link rel="stylesheet" href="styles.css">	Loads the external CSS file styles.css.
<header class="top">	Introductory content: logo, title, navigation.
<input type="checkbox" id="menu-toggle" class="toggle" hidden>	Checkbox: on or off.
<label for="menu-toggle" class="burger" aria-label="Open menu">&#97...	Text label for a control; for matches the control's id, or the label wraps the control.
<nav class="menu" aria-label="Main">	A block of navigation links; aria-label names it for screen readers.
	Unordered (bulleted) list.
Home	A hyperlink; href gives the destination.
Garden room	One list item.

Line	What it does
<main><h1>Resize the window</h1><p>Below 700px the menu hides behin...	The unique content of this page; exactly one per page.

The important declarations of styles.css

Declaration	What it does
*, *::before, *::after {	Generated content inserted before the element's content (decorations, numbers, lines).
box-sizing: border-box;	Width and height include padding and border, which makes sizing predictable.
:root {	Custom properties (variables) defined on the root so every element can use them.
--brand: #b45309;	The brand colour variable; change it once and every use follows.
margin: 0;	Space outside the element.
font-family: system-ui, Arial, sans-serif;	The typeface stack: preferred font first, fallbacks after.
line-height: 1.6;	Space between lines; 1.5 to 1.7 is comfortable for body text.
color: var(--ink);	Text colour.
display: flex;	Turns the element into a flex container (one-dimensional layout).
align-items: center;	Centres items on the cross axis.
justify-content: space-between;	Spreads items so the first touches the start and the last the end.
flex-wrap: wrap;	Allows flex items to move to a new line when they do not fit.
padding: .75rem 1rem;	Space inside the element between its border and content.

Declaration	What it does
background: var(--brand);	Background colour or image.
text-decoration: none;	Removes the underline from links.
font-weight: 700;	Thickness of the text.
font-size: 1.6rem;	Size of the text.
cursor: pointer;	Shows the hand cursor to indicate something clickable.
flex-basis: 100%;	The item takes a whole line, pushing the next items down.
display: none;	Removes the element from rendering completely.
.toggle:checked ~ .menu {	Applies to a checked radio or checkbox; combined with ~ it drives CSS-only widgets.
display: block;	Element starts on a new line and fills the width (used on links and images).
list-style: none;	Removes bullets or numbers from a list.
border-top: 1px solid rgb(255 255 255 / 25%);	A top border used as an accent or separator.
@media (min-width: 700px) {	Applies from the given width upwards (mobile-first breakpoint).
gap: .5rem;	Space between grid or flex items without extra margins.
border: 0;	Changes the visual order of a flex item without changing the source.
border-radius: 6px;	Rounds the corners.
.menu a:hover {	Applies while the pointer is over the element.

Check your work

- Menu opens and closes on mobile
- Burger hidden on desktop
- Label has an aria-label
- No horizontal scrollbar at 320px

Exercises

Project type: Glossary with letter navigation

Level 2 | 25 projects, one per theme

Build an A-Z glossary using description lists grouped under letter headings, a sticky letter navigation and highlighted :target entries.

Project 1026: Glossary with letter navigation for Cairo Book Shop

Theme: Cairo Book Shop (Giza) | Level 2 | Files: index.html, styles.css

Brief

Build an A-Z glossary using description lists grouped under letter headings, a sticky letter navigation and highlighted :target entries.

Learning goals

- Group dl entries under sections with ids
- Use :target to highlight a linked term
- Prevent sticky headers from hiding anchors with scroll-margin-top

Elements and CSS used

HTML elements	CSS features
nav, a, section, h2, dl, dt, dd	position: sticky, :target, scroll-margin-top, place-items, flex-wrap

Build guide

1. Sort terms alphabetically and group by first letter.
2. Write one section per letter with an id and a dl.
3. Give each dt an id from its name.
4. Write the letter nav with fragment links.
5. Make the nav sticky.

6. Add scroll-margin-top so targets are not hidden under the nav; highlight :target.

Project 1026 explained line by line

The important lines of index.html

Line	What it does
<!DOCTYPE html>	Declares modern HTML so the browser renders in standards mode.
<html lang="en">	Root element; lang tells screen readers and search engines the page language.
<meta charset="utf-8">	Character encoding: makes Arabic, accents and symbols display correctly.
<meta name="viewport" content="width=device-width, initial-scale=1">	Makes the page use the real device width on phones.
<title>Cairo Book Shop - Glossary</title>	Text shown in the browser tab and search results.
<link rel="stylesheet" href="styles.css">	Loads the external CSS file styles.css.
<main>	The unique content of this page; exactly one per page.
Cairo Book Shop glossary	The main heading; only one per page.
<nav class="letters" aria-label="Jump to letter">B...	A block of navigation links; aria-label names it for screen readers.
<section id="B">	A thematic group of content, normally with its own heading.
B	Second-level heading for a section.
<dl>	Description list of term / description pairs.
<dt id="booking">Booking</dt><dd>Reserving a book in advance..</dd>	A term (name) in a description list.

Line	What it does
<dt id="css-in-practice">CSS in Practice</dt><dd>Layouts, colours a...	The description of the preceding term.

The important declarations of styles.css

Declaration	What it does
*, *::before, *::after {	Generated content inserted before the element's content (decorations, numbers, lines).
box-sizing: border-box;	Width and height include padding and border, which makes sizing predictable.
:root {	Custom properties (variables) defined on the root so every element can use them.
--brand: #b90000;	The brand colour variable; change it once and every use follows.
margin: 0;	Space outside the element.
font-family: system-ui, Arial, sans-serif;	The typeface stack: preferred font first, fallbacks after.
line-height: 1.6;	Space between lines; 1.5 to 1.7 is comfortable for body text.
color: var(--ink);	Text colour.
max-width: 44rem;	Limits how wide the element can grow, keeping lines readable.
padding: 0 1rem;	Space inside the element between its border and content.
display: flex;	Turns the element into a flex container (one-dimensional layout).
gap: .4rem;	Space between grid or flex items without extra margins.

Declaration	What it does
flex-wrap: wrap;	Allows flex items to move to a new line when they do not fit.
position: sticky;	Scrolls normally until it reaches the given offset, then sticks.
background: #fff;	Background colour or image.
display: grid;	Turns the element into a grid container.
place-items: center;	Centres items horizontally and vertically in a grid.
border: 1px solid var(--line);	Changes the visual order of a flex item without changing the source.
border-radius: 6px;	Rounds the corners.
text-decoration: none;	Removes the underline from links.
border-bottom: 2px solid var(--accent);	A bottom border used as a separator line.
scroll-margin-top: 4rem;	Leaves room above an anchor target so a sticky header does not cover it.
font-weight: 700;	Thickness of the text.
dt:target {	Applies to the element whose id matches the URL fragment.

Check your work

- Letter links jump correctly
- Target term highlighted
- Headings not hidden under sticky bar
- dt/dd pairs valid

Exercises

1. Add a live filter input with JavaScript.
2. Link terms to each other with <a href="#term">.

3. Add <dfn> around each term.

Theme data for this project

Project 1027: Glossary with letter navigation for Nile Bakery

Theme: Nile Bakery (Cairo) | Level 2 | Files: index.html, styles.css

Brief

Build an A-Z glossary using description lists grouped under letter headings, a sticky letter navigation and highlighted :target entries.

Learning goals

- Group dl entries under sections with ids
- Use :target to highlight a linked term
- Prevent sticky headers from hiding anchors with scroll-margin-top

Elements and CSS used

HTML elements	CSS features
nav, a, section, h2, dl, dt, dd	position: sticky, :target, scroll-margin-top, place-items, flex-wrap

Build guide

1. Sort terms alphabetically and group by first letter.
2. Write one section per letter with an id and a dl.
3. Give each dt an id from its name.
4. Write the letter nav with fragment links.
5. Make the nav sticky.

6. Add scroll-margin-top so targets are not hidden under the nav; highlight :target.

Project 1027: index.html

```

Project 1028: Glossary with letter navigation for Pyramid Fitness

Theme: Pyramid Fitness (6th of October) | Level 2 | Files: index.html, styles.css

Brief

Build an A-Z glossary using description lists grouped under letter headings, a sticky letter navigation and highlighted :target entries.

Learning goals

- Group dl entries under sections with ids
- Use :target to highlight a linked term
- Prevent sticky headers from hiding anchors with scroll-margin-top

Elements and CSS used

HTML elements	CSS features
nav, a, section, h2, dl, dt, dd	position: sticky, :target, scroll-margin-top, place-items, flex-wrap

Build guide

1. Sort terms alphabetically and group by first letter.
2. Write one section per letter with an id and a dl.
3. Give each dt an id from its name.
4. Write the letter nav with fragment links.
5. Make the nav sticky.

6. Add scroll-margin-top so targets are not hidden under the nav; highlight :target.

Project 1028: index.html

Project 1029: Glossary with letter navigation for Delta Dental Clinic

Theme: Delta Dental Clinic (Mansoura) | Level 2 | Files: index.html, styles.css

Brief

Build an A-Z glossary using description lists grouped under letter headings, a sticky letter navigation and highlighted :target entries.

Learning goals

- Group dl entries under sections with ids
- Use :target to highlight a linked term
- Prevent sticky headers from hiding anchors with scroll-margin-top

Elements and CSS used

HTML elements	CSS features
nav, a, section, h2, dl, dt, dd	position: sticky, :target, scroll-margin-top, place-items, flex-wrap

Build guide

1. Sort terms alphabetically and group by first letter.
2. Write one section per letter with an id and a dl.
3. Give each dt an id from its name.
4. Write the letter nav with fragment links.
5. Make the nav sticky.

6. Add scroll-margin-top so targets are not hidden under the nav; highlight :target.

<main>	The unique content of this page; exactly one per page.
Delta Dental Clinic glossary	The main heading; only one per page.
<nav class="letters" aria-label="Jump to letter">B...	A block of navigation links; aria-label names it for screen readers.
<section id="B">	A thematic group of content, normally with its own heading.
B	Second-level heading for a section.
<dl>	Description list of term / description pairs.
<dt id="booking">Booking</dt><dd>Reserving a service in advance..</dd>	A term (name) in a description list.

Line	What it does
<dt id="braces-consultation">Braces consultation</dt><dd>Plan your ...	The description of the preceding term.

The important declarations of styles.css

Declaration	What it does
*, *::before, *::after {	Generated content inserted before the element's content (decorations, numbers, lines).
box-sizing: border-box;	Width and height include padding and border, which makes sizing predictable.
:root {	Custom properties (variables) defined on the root so every element can use them.
--brand: #1d4ed8;	The brand colour variable; change it once and every use follows.
margin: 0;	Space outside the element.
font-family: system-ui, Arial, sans-serif;	The typeface stack: preferred font first, fallbacks after.
line-height: 1.6;	Space between lines; 1.5 to 1.7 is comfortable for body text.
color: var(--ink);	Text colour.
max-width: 44rem;	Limits how wide the element can grow, keeping lines readable.
padding: 0 1rem;	Space inside the element between its border and content.
display: flex;	Turns the element into a flex container (one-dimensional layout).
gap: .4rem;	Space between grid or flex items without extra margins.

Declaration	What it does
flex-wrap: wrap;	Allows flex items to move to a new line when they do not fit.
position: sticky;	Scrolls normally until it reaches the given offset, then sticks.
background: #fff;	Background colour or image.
display: grid;	Turns the element into a grid container.
place-items: center;	Centres items horizontally and vertically in a grid.
border: 1px solid var(--line);	Changes the visual order of a flex item without changing the source.
border-radius: 6px;	Rounds the corners.
text-decoration: none;	Removes the underline from links.
border-bottom: 2px solid var(--accent);	A bottom border used as a separator line.
scroll-margin-top: 4rem;	Leaves room above an anchor target so a sticky header does not cover it.
font-weight: 700;	Thickness of the text.
dt:target {	Applies to the element whose id matches the URL fragment.

Check your work

- Letter links jump correctly
- Target term highlighted
- Headings not hidden under sticky bar
- dt/dd pairs valid

Exercises

1. Add a live filter input with JavaScript.
2. Link terms to each other with <a href="#term">.

3. Add <dfn> around each term.

Theme data for this project

Field	Value
Business	Delta Dental Clinic
Tagline	Gentle care for the whole family
City	Mansoura
Owner	Dr. Hana Youssef
Brand colour	#1d4ed8
Accent colour	#eff6ff
Offers	Check-up (300 EGP); Whitening (1500 EGP); Filling (600 EGP); Braces consultation (Free)

Project 1030: Glossary with letter navigation for Red Sea Travel

Theme: Red Sea Travel (Hurghada) | Level 2 | Files: index.html, styles.css

Brief

Build an A-Z glossary using description lists grouped under letter headings, a sticky letter navigation and highlighted :target entries.

Learning goals

- Group dl entries under sections with ids
- Use :target to highlight a linked term
- Prevent sticky headers from hiding anchors with scroll-margin-top

Elements and CSS used

HTML elements	CSS features
nav, a, section, h2, dl, dt, dd	position: sticky, :target, scroll-margin-top, place-items, flex-wrap

Build guide

1. Sort terms alphabetically and group by first letter.
2. Write one section per letter with an id and a dl.
3. Give each dt an id from its name.
4. Write the letter nav with fragment links.
5. Make the nav sticky.

6. Add scroll-margin-top so targets are not hidden under the nav; highlight :target.

Project 1030: index.html

Project 1032: Glossary with letter navigation for Green Leaf Cafe

Theme: Green Leaf Cafe (Zamalek) | Level 2 | Files: index.html, styles.css

Brief

Build an A-Z glossary using description lists grouped under letter headings, a sticky letter navigation and highlighted :target entries.

Learning goals

- Group dl entries under sections with ids
- Use :target to highlight a linked term
- Prevent sticky headers from hiding anchors with scroll-margin-top

Elements and CSS used

HTML elements	CSS features
nav, a, section, h2, dl, dt, dd	position: sticky, :target, scroll-margin-top, place-items, flex-wrap

Build guide

1. Sort terms alphabetically and group by first letter.
2. Write one section per letter with an id and a dl.
3. Give each dt an id from its name.
4. Write the letter nav with fragment links.
5. Make the nav sticky.

6. Add scroll-margin-top so targets are not hidden under the nav; highlight :target.

Project 1032 explained line by line

The important lines of index.html

Line	What it does
<!DOCTYPE html>	Declares modern HTML so the browser renders in standards mode.
<html lang="en">	Root element; lang tells screen readers and search engines the page language.
<meta charset="utf-8">	Character encoding: makes Arabic, accents and symbols display correctly.
<meta name="viewport" content="width=device-width, initial-scale=1">	Makes the page use the real device width on phones.
<title>Green Leaf Cafe - Glossary</title>	Text shown in the browser tab and search results.
<link rel="stylesheet" href="styles.css">	Loads the external CSS file styles.css.
<main>	The unique content of this page; exactly one per page.
Green Leaf Cafe glossary	The main heading; only one per page.
<nav class="letters" aria-label="Jump to letter">B...	A block of navigation links; aria-label names it for screen readers.
<section id="B">	A thematic group of content, normally with its own heading.
B	Second-level heading for a section.
<dl>	Description list of term / description pairs.
<dt id="booking">Booking</dt><dd>Reserving a drink in advance..</dd>	A term (name) in a description list.

Line	What it does
<dt id="cheesecake">Cheesecake</dt><dd>Baked, with berries.</dd>	The description of the preceding term.

The important declarations of styles.css

Declaration	What it does
*, *::before, *::after {	Generated content inserted before the element's content (decorations, numbers, lines).
box-sizing: border-box;	Width and height include padding and border, which makes sizing predictable.
:root {	Custom properties (variables) defined on the root so every element can use them.
--brand: #166534;	The brand colour variable; change it once and every use follows.
margin: 0;	Space outside the element.
font-family: system-ui, Arial, sans-serif;	The typeface stack: preferred font first, fallbacks after.
line-height: 1.6;	Space between lines; 1.5 to 1.7 is comfortable for body text.
color: var(--ink);	Text colour.
max-width: 44rem;	Limits how wide the element can grow, keeping lines readable.
padding: 0 1rem;	Space inside the element between its border and content.
display: flex;	Turns the element into a flex container (one-dimensional layout).
gap: .4rem;	Space between grid or flex items without extra margins.

Declaration	What it does
flex-wrap: wrap;	Allows flex items to move to a new line when they do not fit.
position: sticky;	Scrolls normally until it reaches the given offset, then sticks.
background: #fff;	Background colour or image.
display: grid;	Turns the element into a grid container.
place-items: center;	Centres items horizontally and vertically in a grid.
border: 1px solid var(--line);	Changes the visual order of a flex item without changing the source.
border-radius: 6px;	Rounds the corners.
text-decoration: none;	Removes the underline from links.
border-bottom: 2px solid var(--accent);	A bottom border used as a separator line.
scroll-margin-top: 4rem;	Leaves room above an anchor target so a sticky header does not cover it.
font-weight: 700;	Thickness of the text.
dt:target {	Applies to the element whose id matches the URL fragment.

Check your work

- Letter links jump correctly
- Target term highlighted
- Headings not hidden under sticky bar
- dt/dd pairs valid

Exercises

1. Add a live filter input with JavaScript.
2. Link terms to each other with <a href="#term">.

3. Add <dfn> around each term.

Project 1033: Glossary with letter navigation for Sinai Trekking Club

Theme: Sinai Trekking Club (Saint Catherine) | Level 2 | Files: index.html, styles.css

Brief

Build an A-Z glossary using description lists grouped under letter headings, a sticky letter navigation and highlighted :target entries.

Learning goals

- Group dl entries under sections with ids
- Use :target to highlight a linked term
- Prevent sticky headers from hiding anchors with scroll-margin-top

Elements and CSS used

HTML elements	CSS features
nav, a, section, h2, dl, dt, dd	position: sticky, :target, scroll-margin-top, place-items, flex-wrap

Build guide

1. Sort terms alphabetically and group by first letter.
2. Write one section per letter with an id and a dl.
3. Give each dt an id from its name.
4. Write the letter nav with fragment links.
5. Make the nav sticky.

6. Add scroll-margin-top so targets are not hidden under the nav; highlight :target.

Project 1033: index.html

```

Project 1033 explained line by line

The important lines of index.html

Line	What it does
<!DOCTYPE html>	Declares modern HTML so the browser renders in standards mode.
<html lang="en">	Root element; lang tells screen readers and search engines the page language.
<meta charset="utf-8">	Character encoding: makes Arabic, accents and symbols display correctly.
<meta name="viewport" content="width=device-width, initial-scale=1">	Makes the page use the real device width on phones.
<title>Sinai Trekking Club - Glossary</title>	Text shown in the browser tab and search results.
<link rel="stylesheet" href="styles.css">	Loads the external CSS file styles.css.
<main>	The unique content of this page; exactly one per page.
Sinai Trekking Club glossary	The main heading; only one per page.
<nav class="letters" aria-label="Jump to letter">B...	A block of navigation links; aria-label names it for screen readers.
<section id="B">	A thematic group of content, normally with its own heading.
B	Second-level heading for a section.
<dl>	Description list of term / description pairs.
<dt id="blue-desert-loop">Blue Desert loop</dt><dd>Easy day walk.</dd>	A term (name) in a description list.

Line	What it does
<dt id="booking">Booking</dt><dd>Reserving a hike in advance..</dd>	The description of the preceding term.

The important declarations of styles.css

Declaration	What it does
*, *::before, *::after {	Generated content inserted before the element's content (decorations, numbers, lines).
box-sizing: border-box;	Width and height include padding and border, which makes sizing predictable.
:root {	Custom properties (variables) defined on the root so every element can use them.
--brand: #92400e;	The brand colour variable; change it once and every use follows.
margin: 0;	Space outside the element.
font-family: system-ui, Arial, sans-serif;	The typeface stack: preferred font first, fallbacks after.
line-height: 1.6;	Space between lines; 1.5 to 1.7 is comfortable for body text.
color: var(--ink);	Text colour.
max-width: 44rem;	Limits how wide the element can grow, keeping lines readable.
padding: 0 1rem;	Space inside the element between its border and content.
display: flex;	Turns the element into a flex container (one-dimensional layout).
gap: .4rem;	Space between grid or flex items without extra margins.

Declaration	What it does
flex-wrap: wrap;	Allows flex items to move to a new line when they do not fit.
position: sticky;	Scrolls normally until it reaches the given offset, then sticks.
background: #fff;	Background colour or image.
display: grid;	Turns the element into a grid container.
place-items: center;	Centres items horizontally and vertically in a grid.
border: 1px solid var(--line);	Changes the visual order of a flex item without changing the source.
border-radius: 6px;	Rounds the corners.
text-decoration: none;	Removes the underline from links.
border-bottom: 2px solid var(--accent);	A bottom border used as a separator line.
scroll-margin-top: 4rem;	Leaves room above an anchor target so a sticky header does not cover it.
font-weight: 700;	Thickness of the text.
dt:target {	Applies to the element whose id matches the URL fragment.

Check your work

- Letter links jump correctly
- Target term highlighted
- Headings not hidden under sticky bar
- dt/dd pairs valid

Exercises

1. Add a live filter input with JavaScript.
2. Link terms to each other with <a href="#term">.

3. Add <dfn> around each term.

Theme data for this project

Field	Value
Business	Sinai Trekking Club

Project 1036: Glossary with letter navigation for Oasis Plant Nursery

Theme: Oasis Plant Nursery (Sheikh Zayed) | Level 2 | Files: index.html, styles.css

Brief

Build an A-Z glossary using description lists grouped under letter headings, a sticky letter navigation and highlighted :target entries.

Learning goals

- Group dl entries under sections with ids
- Use :target to highlight a linked term
- Prevent sticky headers from hiding anchors with scroll-margin-top

Elements and CSS used

HTML elements	CSS features
nav, a, section, h2, dl, dt, dd	position: sticky, :target, scroll-margin-top, place-items, flex-wrap

Build guide

1. Sort terms alphabetically and group by first letter.
2. Write one section per letter with an id and a dl.
3. Give each dt an id from its name.
4. Write the letter nav with fragment links.
5. Make the nav sticky.

6. Add scroll-margin-top so targets are not hidden under the nav; highlight :target.

Project 1036: index.html

Project 1036 explained line by line

The important lines of index.html

Line	What it does
<!DOCTYPE html>	Declares modern HTML so the browser renders in standards mode.
<html lang="en">	Root element; lang tells screen readers and search engines the page language.
<meta charset="utf-8">	Character encoding: makes Arabic, accents and symbols display correctly.
<meta name="viewport" content="width=device-width, initial-scale=1">	Makes the page use the real device width on phones.
<title>Oasis Plant Nursery - Glossary</title>	Text shown in the browser tab and search results.
<link rel="stylesheet" href="styles.css">	Loads the external CSS file styles.css.
<main>	The unique content of this page; exactly one per page.
Oasis Plant Nursery glossary	The main heading; only one per page.
<nav class="letters" aria-label="Jump to letter">B...	A block of navigation links; aria-label names it for screen readers.
<section id="B">	A thematic group of content, normally with its own heading.
B	Second-level heading for a section.
<dl>	Description list of term / description pairs.
<dt id="basil-pot">Basil pot</dt><dd>Kitchen herb.</dd>	A term (name) in a description list.

Line	What it does
<dt id="booking">Booking</dt><dd>Reserving a plant in advance..</dd>	The description of the preceding term.

The important declarations of styles.css

Declaration	What it does
*, *::before, *::after {	Generated content inserted before the element's content (decorations, numbers, lines).
box-sizing: border-box;	Width and height include padding and border, which makes sizing predictable.
:root {	Custom properties (variables) defined on the root so every element can use them.
--brand: #15803d;	The brand colour variable; change it once and every use follows.
margin: 0;	Space outside the element.
font-family: system-ui, Arial, sans-serif;	The typeface stack: preferred font first, fallbacks after.
line-height: 1.6;	Space between lines; 1.5 to 1.7 is comfortable for body text.
color: var(--ink);	Text colour.
max-width: 44rem;	Limits how wide the element can grow, keeping lines readable.
padding: 0 1rem;	Space inside the element between its border and content.
display: flex;	Turns the element into a flex container (one-dimensional layout).
gap: .4rem;	Space between grid or flex items without extra margins.

Declaration	What it does
flex-wrap: wrap;	Allows flex items to move to a new line when they do not fit.
position: sticky;	Scrolls normally until it reaches the given offset, then sticks.
background: #fff;	Background colour or image.
display: grid;	Turns the element into a grid container.
place-items: center;	Centres items horizontally and vertically in a grid.
border: 1px solid var(--line);	Changes the visual order of a flex item without changing the source.
border-radius: 6px;	Rounds the corners.
text-decoration: none;	Removes the underline from links.
border-bottom: 2px solid var(--accent);	A bottom border used as a separator line.
scroll-margin-top: 4rem;	Leaves room above an anchor target so a sticky header does not cover it.
font-weight: 700;	Thickness of the text.
dt:target {	Applies to the element whose id matches the URL fragment.

Check your work

- Letter links jump correctly
- Target term highlighted
- Headings not hidden under sticky bar
- dt/dd pairs valid

Exercises

1. Add a live filter input with JavaScript.
2. Link terms to each other with <a href="#term">.

3. Add <dfn> around each term.

Theme data for this project

Field	Value
Business	Oasis Plant Nursery
Tagline	Indoor plants and gardening advice
City	Sheikh Zayed
Owner	Hossam Ali
Brand colour	#15803d
Accent colour	#f7fee7
Offers	Monstera (250 EGP); Snake plant (120 EGP); Basil pot (45 EGP); Olive tree (600 EGP)

Project 1037: Glossary with letter navigation for Cedar Furniture

Theme: Cedar Furniture (Damietta) | Level 2 | Files: index.html, styles.css

Brief

Build an A-Z glossary using description lists grouped under letter headings, a sticky letter navigation and highlighted :target entries.

Learning goals

- Group dl entries under sections with ids
- Use :target to highlight a linked term
- Prevent sticky headers from hiding anchors with scroll-margin-top

Elements and CSS used

HTML elements	CSS features
nav, a, section, h2, dl, dt, dd	position: sticky, :target, scroll-margin-top, place-items, flex-wrap

Build guide

1. Sort terms alphabetically and group by first letter.
2. Write one section per letter with an id and a dl.
3. Give each dt an id from its name.
4. Write the letter nav with fragment links.
5. Make the nav sticky.

6. Add scroll-margin-top so targets are not hidden under the nav; highlight :target.

The important declarations of styles.css

Declaration	What it does
*, *::before, *::after {	Generated content inserted before the element's content (decorations, numbers, lines).
box-sizing: border-box;	Width and height include padding and border, which makes sizing predictable.
:root {	Custom properties (variables) defined on the root so every element can use them.
--brand: #c2410c;	The brand colour variable; change it once and every use follows.
margin: 0;	Space outside the element.
font-family: system-ui, Arial, sans-serif;	The typeface stack: preferred font first, fallbacks after.
line-height: 1.6;	Space between lines; 1.5 to 1.7 is comfortable for body text.
color: var(--ink);	Text colour.
max-width: 44rem;	Limits how wide the element can grow, keeping lines readable.
padding: 0 1rem;	Space inside the element between its border and content.
display: flex;	Turns the element into a flex container (one-dimensional layout).
gap: .4rem;	Space between grid or flex items without extra margins.

Declaration	What it does
flex-wrap: wrap;	Allows flex items to move to a new line when they do not fit.
position: sticky;	Scrolls normally until it reaches the given offset, then sticks.
background: #fff;	Background colour or image.
display: grid;	Turns the element into a grid container.
place-items: center;	Centres items horizontally and vertically in a grid.
border: 1px solid var(--line);	Changes the visual order of a flex item without changing the source.
border-radius: 6px;	Rounds the corners.
text-decoration: none;	Removes the underline from links.
border-bottom: 2px solid var(--accent);	A bottom border used as a separator line.
scroll-margin-top: 4rem;	Leaves room above an anchor target so a sticky header does not cover it.
font-weight: 700;	Thickness of the text.
dt:target {	Applies to the element whose id matches the URL fragment.

Check your work

- Letter links jump correctly
- Target term highlighted
- Headings not hidden under sticky bar
- dt/dd pairs valid

Exercises

1. Add a live filter input with JavaScript.
2. Link terms to each other with <a href="#term">.

3. Add <dfn> around each term.

Theme data for this project

Field	Value
Business	Sahara Pet Care
Tagline	Grooming, boarding and vet visits
City	New Cairo
Owner	Rana Ibrahim
Brand colour	#c2410c
Accent colour	#fff7ed
Offers	Full grooming (400 EGP); Day boarding (250 EGP); Vaccination (300 EGP); Dog walking (100 EGP)

Project 1040: Glossary with letter navigation for Alexandria Sailing School

Theme: Alexandria Sailing School (Alexandria) | Level 2 | Files: index.html, styles.css

Brief

Build an A-Z glossary using description lists grouped under letter headings, a sticky letter navigation and highlighted :target entries.

Learning goals

- Group dl entries under sections with ids
- Use :target to highlight a linked term
- Prevent sticky headers from hiding anchors with scroll-margin-top

Elements and CSS used

HTML elements	CSS features
nav, a, section, h2, dl, dt, dd	position: sticky, :target, scroll-margin-top, place-items, flex-wrap

Build guide

1. Sort terms alphabetically and group by first letter.
2. Write one section per letter with an id and a dl.
3. Give each dt an id from its name.
4. Write the letter nav with fragment links.
5. Make the nav sticky.

6. Add scroll-margin-top so targets are not hidden under the nav; highlight :target.

Project 1040 explained line by line

The important lines of index.html

Line	What it does
<!DOCTYPE html>	Declares modern HTML so the browser renders in standards mode.
<html lang="en">	Root element; lang tells screen readers and search engines the page language.
<meta charset="utf-8">	Character encoding: makes Arabic, accents and symbols display correctly.
<meta name="viewport" content="width=device-width, initial-scale=1">	Makes the page use the real device width on phones.
<title>Alexandria Sailing School - Glossary</title>	Text shown in the browser tab and search results.
<link rel="stylesheet" href="styles.css">	Loads the external CSS file styles.css.
<main>	The unique content of this page; exactly one per page.
Alexandria Sailing School glossary	The main heading; only one per page.
<nav class="letters" aria-label="Jump to letter">B...	A block of navigation links; aria-label names it for screen readers.
<section id="B">	A thematic group of content, normally with its own heading.
B	Second-level heading for a section.
<dl>	Description list of term / description pairs.
<dt id="beginner-course">Beginner course</dt><dd>Five sessions.</dd>	A term (name) in a description list.

Line	What it does
<dt id="booking">Booking</dt><dd>Reserving a lesson in advance..</dd>	The description of the preceding term.

The important declarations of styles.css

Declaration	What it does
*, *::before, *::after {	Generated content inserted before the element's content (decorations, numbers, lines).
box-sizing: border-box;	Width and height include padding and border, which makes sizing predictable.
:root {	Custom properties (variables) defined on the root so every element can use them.
--brand: #1e40af;	The brand colour variable; change it once and every use follows.
margin: 0;	Space outside the element.
font-family: system-ui, Arial, sans-serif;	The typeface stack: preferred font first, fallbacks after.
line-height: 1.6;	Space between lines; 1.5 to 1.7 is comfortable for body text.
color: var(--ink);	Text colour.
max-width: 44rem;	Limits how wide the element can grow, keeping lines readable.
padding: 0 1rem;	Space inside the element between its border and content.
display: flex;	Turns the element into a flex container (one-dimensional layout).
gap: .4rem;	Space between grid or flex items without extra margins.

Declaration	What it does
flex-wrap: wrap;	Allows flex items to move to a new line when they do not fit.
position: sticky;	Scrolls normally until it reaches the given offset, then sticks.
background: #fff;	Background colour or image.
display: grid;	Turns the element into a grid container.
place-items: center;	Centres items horizontally and vertically in a grid.
border: 1px solid var(--line);	Changes the visual order of a flex item without changing the source.
border-radius: 6px;	Rounds the corners.
text-decoration: none;	Removes the underline from links.
border-bottom: 2px solid var(--accent);	A bottom border used as a separator line.
scroll-margin-top: 4rem;	Leaves room above an anchor target so a sticky header does not cover it.
font-weight: 700;	Thickness of the text.
dt:target {	Applies to the element whose id matches the URL fragment.

Check your work

- Letter links jump correctly
- Target term highlighted
- Headings not hidden under sticky bar
- dt/dd pairs valid

Exercises

1. Add a live filter input with JavaScript.
2. Link terms to each other with <a href="#term">.

3. Add <dfn> around each term.

Project 1043 explained line by line

The important lines of index.html

Line	What it does
<!DOCTYPE html>	Declares modern HTML so the browser renders in standards mode.
<html lang="en">	Root element; lang tells screen readers and search engines the page language.
<meta charset="utf-8">	Character encoding: makes Arabic, accents and symbols display correctly.
<meta name="viewport" content="width=device-width, initial-scale=1">	Makes the page use the real device width on phones.
<title>Cleopatra Beauty Salon - Glossary</title>	Text shown in the browser tab and search results.
<link rel="stylesheet" href="styles.css">	Loads the external CSS file styles.css.
<main>	The unique content of this page; exactly one per page.
Cleopatra Beauty Salon glossary	The main heading; only one per page.
<nav class="letters" aria-label="Jump to letter">B...	A block of navigation links; aria-label names it for screen readers.
<section id="B">	A thematic group of content, normally with its own heading.
B	Second-level heading for a section.
<dl>	Description list of term / description pairs.
<dt id="booking">Booking</dt><dd>Reserving a treatment in advance.....	A term (name) in a description list.

Line	What it does
<dt id="bridal-package">Bridal package</dt><dd>Hair, make-up and na...	The description of the preceding term.

The important declarations of styles.css

Declaration	What it does
*, *::before, *::after {	Generated content inserted before the element's content (decorations, numbers, lines).
box-sizing: border-box;	Width and height include padding and border, which makes sizing predictable.
:root {	Custom properties (variables) defined on the root so every element can use them.
--brand: #db2777;	The brand colour variable; change it once and every use follows.
margin: 0;	Space outside the element.
font-family: system-ui, Arial, sans-serif;	The typeface stack: preferred font first, fallbacks after.
line-height: 1.6;	Space between lines; 1.5 to 1.7 is comfortable for body text.
color: var(--ink);	Text colour.
max-width: 44rem;	Limits how wide the element can grow, keeping lines readable.
padding: 0 1rem;	Space inside the element between its border and content.
display: flex;	Turns the element into a flex container (one-dimensional layout).
gap: .4rem;	Space between grid or flex items without extra margins.

Declaration	What it does
flex-wrap: wrap;	Allows flex items to move to a new line when they do not fit.
position: sticky;	Scrolls normally until it reaches the given offset, then sticks.
background: #fff;	Background colour or image.
display: grid;	Turns the element into a grid container.
place-items: center;	Centres items horizontally and vertically in a grid.
border: 1px solid var(--line);	Changes the visual order of a flex item without changing the source.
border-radius: 6px;	Rounds the corners.
text-decoration: none;	Removes the underline from links.
border-bottom: 2px solid var(--accent);	A bottom border used as a separator line.
scroll-margin-top: 4rem;	Leaves room above an anchor target so a sticky header does not cover it.
font-weight: 700;	Thickness of the text.
dt:target {	Applies to the element whose id matches the URL fragment.

Check your work

- Letter links jump correctly
- Target term highlighted
- Headings not hidden under sticky bar
- dt/dd pairs valid

Exercises

1. Add a live filter input with JavaScript.
2. Link terms to each other with <a href="#term">.

3. Add <dfn> around each term.

Theme data for this project

Field	Value
Business	Cleopatra Beauty Salon
Tagline	Hair, nails and skin care
City	Dokki
Owner	Mariam Adel
Brand colour	#db2777
Accent colour	#fdf2f8
Offers	Haircut and blow-dry (350 EGP); Manicure (200 EGP); Facial (600 EGP); Bridal package (4500 EGP)

Project 1044: Glossary with letter navigation for Suez Auto Service

Theme: Suez Auto Service (Suez) | Level 2 | Files: index.html, styles.css

Brief

Build an A-Z glossary using description lists grouped under letter headings, a sticky letter navigation and highlighted :target entries.

Learning goals

- Group dl entries under sections with ids
- Use :target to highlight a linked term
- Prevent sticky headers from hiding anchors with scroll-margin-top

Elements and CSS used

HTML elements	CSS features
nav, a, section, h2, dl, dt, dd	position: sticky, :target, scroll-margin-top, place-items, flex-wrap

Build guide

1. Sort terms alphabetically and group by first letter.
2. Write one section per letter with an id and a dl.
3. Give each dt an id from its name.
4. Write the letter nav with fragment links.
5. Make the nav sticky.

6. Add scroll-margin-top so targets are not hidden under the nav; highlight :target.

Project 1045: Glossary with letter navigation for Luxor Music Academy

Theme: Luxor Music Academy (Luxor) | Level 2 | Files: index.html, styles.css

Brief

Build an A-Z glossary using description lists grouped under letter headings, a sticky letter navigation and highlighted :target entries.

Learning goals

- Group dl entries under sections with ids
- Use :target to highlight a linked term
- Prevent sticky headers from hiding anchors with scroll-margin-top

Elements and CSS used

HTML elements	CSS features
nav, a, section, h2, dl, dt, dd	position: sticky, :target, scroll-margin-top, place-items, flex-wrap

Build guide

1. Sort terms alphabetically and group by first letter.
2. Write one section per letter with an id and a dl.
3. Give each dt an id from its name.
4. Write the letter nav with fragment links.
5. Make the nav sticky.

6. Add scroll-margin-top so targets are not hidden under the nav; highlight :target.

B	Second-level heading for a section.
<dl>	Description list of term / description pairs.
<dt id="booking">Booking</dt><dd>Reserving a dish in advance..</dd>	A term (name) in a description list.

Line	What it does
<dt id="calamari">Calamari</dt><dd>Fried, with tahini.</dd>	The description of the preceding term.

The important declarations of styles.css

Declaration	What it does
*, *::before, *::after {	Generated content inserted before the element's content (decorations, numbers, lines).
box-sizing: border-box;	Width and height include padding and border, which makes sizing predictable.
:root {	Custom properties (variables) defined on the root so every element can use them.
--brand: #0e7490;	The brand colour variable; change it once and every use follows.
margin: 0;	Space outside the element.
font-family: system-ui, Arial, sans-serif;	The typeface stack: preferred font first, fallbacks after.
line-height: 1.6;	Space between lines; 1.5 to 1.7 is comfortable for body text.
color: var(--ink);	Text colour.
max-width: 44rem;	Limits how wide the element can grow, keeping lines readable.
padding: 0 1rem;	Space inside the element between its border and content.
display: flex;	Turns the element into a flex container (one-dimensional layout).
gap: .4rem;	Space between grid or flex items without extra margins.

Declaration	What it does
flex-wrap: wrap;	Allows flex items to move to a new line when they do not fit.
position: sticky;	Scrolls normally until it reaches the given offset, then sticks.
background: #fff;	Background colour or image.
display: grid;	Turns the element into a grid container.
place-items: center;	Centres items horizontally and vertically in a grid.
border: 1px solid var(--line);	Changes the visual order of a flex item without changing the source.
border-radius: 6px;	Rounds the corners.
text-decoration: none;	Removes the underline from links.
border-bottom: 2px solid var(--accent);	A bottom border used as a separator line.
scroll-margin-top: 4rem;	Leaves room above an anchor target so a sticky header does not cover it.
font-weight: 700;	Thickness of the text.
dt:target {	Applies to the element whose id matches the URL fragment.

Check your work

- Letter links jump correctly
- Target term highlighted
- Headings not hidden under sticky bar
- dt/dd pairs valid

Exercises

1. Add a live filter input with JavaScript.
2. Link terms to each other with <a href="#term">.

3. Add <dfn> around each term.

Theme data for this project

Field	Value
Business	Port Said Seafood
Tagline	Grilled fish straight from the boats
City	Port Said
Owner	Sherif Wahba
Brand colour	#0e7490
Accent colour	#ecfeff
Offers	Grilled sea bass (320 EGP); Shrimp tagine (280 EGP); Calamari (190 EGP); Fish soup (120 EGP)

Project 1047: Glossary with letter navigation for Delta Kids Library

Theme: Delta Kids Library (Tanta) | Level 2 | Files: index.html, styles.css

Brief

Build an A-Z glossary using description lists grouped under letter headings, a sticky letter navigation and highlighted :target entries.

Learning goals

- Group dl entries under sections with ids
- Use :target to highlight a linked term
- Prevent sticky headers from hiding anchors with scroll-margin-top

Elements and CSS used

HTML elements	CSS features
nav, a, section, h2, dl, dt, dd	position: sticky, :target, scroll-margin-top, place-items, flex-wrap

Build guide

1. Sort terms alphabetically and group by first letter.
2. Write one section per letter with an id and a dl.
3. Give each dt an id from its name.
4. Write the letter nav with fragment links.
5. Make the nav sticky.

6. Add scroll-margin-top so targets are not hidden under the nav; highlight :target.

Project 1047: index.html

Project 1050: Glossary with letter navigation for Minya Coding Club

Theme: Minya Coding Club (Minya) | Level 2 | Files: index.html, styles.css

Brief

Build an A-Z glossary using description lists grouped under letter headings, a sticky letter navigation and highlighted :target entries.

Learning goals

- Group dl entries under sections with ids
- Use :target to highlight a linked term
- Prevent sticky headers from hiding anchors with scroll-margin-top

Elements and CSS used

HTML elements	CSS features
nav, a, section, h2, dl, dt, dd	position: sticky, :target, scroll-margin-top, place-items, flex-wrap

Build guide

1. Sort terms alphabetically and group by first letter.
2. Write one section per letter with an id and a dl.
3. Give each dt an id from its name.
4. Write the letter nav with fragment links.
5. Make the nav sticky.

6. Add scroll-margin-top so targets are not hidden under the nav; highlight :target.

Project 1050 explained line by line

The important lines of index.html

Line	What it does
<!DOCTYPE html>	Declares modern HTML so the browser renders in standards mode.
<html lang="en">	Root element; lang tells screen readers and search engines the page language.
<meta charset="utf-8">	Character encoding: makes Arabic, accents and symbols display correctly.
<meta name="viewport" content="width=device-width, initial-scale=1">	Makes the page use the real device width on phones.
<title>Minya Coding Club - Glossary</title>	Text shown in the browser tab and search results.
<link rel="stylesheet" href="styles.css">	Loads the external CSS file styles.css.
<main>	The unique content of this page; exactly one per page.
Minya Coding Club glossary	The main heading; only one per page.
<nav class="letters" aria-label="Jump to letter">B...	A block of navigation links; aria-label names it for screen readers.
<section id="B">	A thematic group of content, normally with its own heading.
B	Second-level heading for a section.
<dl>	Description list of term / description pairs.
<dt id="booking">Booking</dt><dd>Reserving a workshop in advance..<...	A term (name) in a description list.

Line	What it does
<dt id="css-art">CSS art</dt><dd>Draw with code.</dd>	The description of the preceding term.

The important declarations of styles.css

Declaration	What it does
*, *::before, *::after {	Generated content inserted before the element's content (decorations, numbers, lines).
box-sizing: border-box;	Width and height include padding and border, which makes sizing predictable.
:root {	Custom properties (variables) defined on the root so every element can use them.
--brand: #2563eb;	The brand colour variable; change it once and every use follows.
margin: 0;	Space outside the element.
font-family: system-ui, Arial, sans-serif;	The typeface stack: preferred font first, fallbacks after.
line-height: 1.6;	Space between lines; 1.5 to 1.7 is comfortable for body text.
color: var(--ink);	Text colour.
max-width: 44rem;	Limits how wide the element can grow, keeping lines readable.
padding: 0 1rem;	Space inside the element between its border and content.
display: flex;	Turns the element into a flex container (one-dimensional layout).
gap: .4rem;	Space between grid or flex items without extra margins.

Declaration	What it does
flex-wrap: wrap;	Allows flex items to move to a new line when they do not fit.
position: sticky;	Scrolls normally until it reaches the given offset, then sticks.
background: #fff;	Background colour or image.
display: grid;	Turns the element into a grid container.
place-items: center;	Centres items horizontally and vertically in a grid.
border: 1px solid var(--line);	Changes the visual order of a flex item without changing the source.
border-radius: 6px;	Rounds the corners.
text-decoration: none;	Removes the underline from links.
border-bottom: 2px solid var(--accent);	A bottom border used as a separator line.
scroll-margin-top: 4rem;	Leaves room above an anchor target so a sticky header does not cover it.
font-weight: 700;	Thickness of the text.
dt:target {	Applies to the element whose id matches the URL fragment.

Check your work

- Letter links jump correctly
- Target term highlighted
- Headings not hidden under sticky bar
- dt/dd pairs valid

Exercises

1. Add a live filter input with JavaScript.
2. Link terms to each other with <a href="#term">.

3. Add <dfn> around each term.

Theme data for this project

Field	Value
Business	Minya Coding Club
Tagline	Free weekend coding for teenagers
City	Minya
Owner	Youssef Hany
Brand colour	#2563eb
Accent colour	#eff6ff
Offers	HTML weekend (Free); CSS art (Free); Scratch games (Free); Hackathon (Free)

Project type: Pricing plans comparison

Level 2 | 25 projects, one per theme

Present three packages side by side with a highlighted, slightly enlarged middle plan, a 'most popular' ribbon and tick/cross feature lists.

Project 1051: Pricing plans comparison for Cairo Book Shop

Theme: Cairo Book Shop (Giza) | Level 2 | Files: index.html, styles.css

Brief

Present three packages side by side with a highlighted, slightly enlarged middle plan, a 'most popular' ribbon and tick/cross feature lists.

Learning goals

- Emphasise one card with transform: scale and a border
- Position a ribbon over the card edge
- Use ::before glyphs for ticks and crosses

Elements and CSS used

HTML elements	CSS features
section, h2, p, ul, li, a	transform: scale(), position: absolute + translate, align-items: start, ::before content, box-shadow

Build guide

1. Write three .plan sections; give the middle one the featured class and a ribbon p.
2. Grid the plans and align them to the start.
3. Scale the featured plan and add a shadow.
4. Position the ribbon at the top centre.
5. Add ticks with ::before; crosses for .no items.
6. Style the buttons.

Project 1051: index.html

The important lines of index.html

Line	What it does
<!DOCTYPE html>	Declares modern HTML so the browser renders in standards mode.
<html lang="en">	Root element; lang tells screen readers and search engines the page language.
<meta charset="utf-8">	Character encoding: makes Arabic, accents and symbols display correctly.
<meta name="viewport" content="width=device-width, initial-scale=1">	Makes the page use the real device width on phones.
<title>Cairo Book Shop - Compare plans</title>	Text shown in the browser tab and search results.
<link rel="stylesheet" href="styles.css">	Loads the external CSS file styles.css.
<main>	The unique content of this page; exactly one per page.
Compare our packages	The main heading; only one per page.
	Generic block container for grouping and layout.
<section class="plan">	A thematic group of content, normally with its own heading.
Basic	Second-level heading for a section.
120 EGP	A paragraph of text.
- One book - Email support <li class="no">No priori...	Unordered (bulleted) list.

Line	What it does
Choose Basic	A link styled as a button; it navigates, so it is a link and not a <button>.
- Three books - Phone support - Priority booking<...	One list item.

The important declarations of styles.css

Declaration	What it does
*, *::before, *::after {	Generated content inserted before the element's content (decorations, numbers, lines).
box-sizing: border-box;	Width and height include padding and border, which makes sizing predictable.
:root {	Custom properties (variables) defined on the root so every element can use them.
--brand: #b90000;	The brand colour variable; change it once and every use follows.
margin: 0;	Space outside the element.
font-family: system-ui, Arial, sans-serif;	The typeface stack: preferred font first, fallbacks after.
line-height: 1.6;	Space between lines; 1.5 to 1.7 is comfortable for body text.
color: var(--ink);	Text colour.
max-width: 64rem;	Limits how wide the element can grow, keeping lines readable.
padding: 0 1rem;	Space inside the element between its border and content.
text-align: center;	Centres inline content such as text.
display: grid;	Turns the element into a grid container.

Declaration	What it does
gap: 1.5rem;	Space between grid or flex items without extra margins.
grid-template-columns: repeat(auto-fit, minmax(15rem, 1fr));	Defines the columns of the grid.
align-items: start;	Aligns items to the start of the cross axis (no stretching).
position: relative;	Keeps normal flow but becomes the reference for absolutely positioned children.
border: 1px solid var(--line);	Changes the visual order of a flex item without changing the source.
border-radius: 16px;	Rounds the corners.
background: #fff;	Background colour or image.
border: 2px solid var(--brand);	The line around the element: width, style and colour.
transform: scale(1.04);	Enlarges or shrinks the element visually.
box-shadow: 0 16px 40px rgb(0 0 0 / 12%);	Soft shadow that lifts the element from the page.
position: absolute;	Removes the element from flow and positions it relative to the nearest positioned ancestor.
translate: -50% 0;	Moves the element without affecting the layout of others.
font-size: .75rem;	Size of the text.
border-radius: 999px;	Fully rounded pill shape.
font-weight: 800;	Thickness of the text.
list-style: none;	Removes bullets or numbers from a list.
border-bottom: 1px solid var(--accent);	A bottom border used as a separator line.

Declaration	What it does
content: "\2713 ";	The text or empty string for a pseudo-element.
display: block;	Element starts on a new line and fills the width (used on links and images).
text-decoration: none;	Removes the underline from links.

Check your work

- Ribbon centred
- Scaled card does not overlap on narrow screens (stacking)
- Features left-aligned
- Prices large and clear

Exercises

1. Add a monthly/yearly toggle with :checked.
2. Convert to a comparison table for many features.
3. Animate the featured card on hover.

Project 1053 explained line by line

The important lines of index.html

Line	What it does
<!DOCTYPE html>	Declares modern HTML so the browser renders in standards mode.
<html lang="en">	Root element; lang tells screen readers and search engines the page language.
<meta charset="utf-8">	Character encoding: makes Arabic, accents and symbols display correctly.
<meta name="viewport" content="width=device-width, initial-scale=1">	Makes the page use the real device width on phones.
<title>Pyramid Fitness - Compare plans</title>	Text shown in the browser tab and search results.
<link rel="stylesheet" href="styles.css">	Loads the external CSS file styles.css.
<main>	The unique content of this page; exactly one per page.
Compare our packages	The main heading; only one per page.
	Generic block container for grouping and layout.
<section class="plan">	A thematic group of content, normally with its own heading.
Basic	Second-level heading for a section.
100 EGP	A paragraph of text.
- One class - Email support <li class="no">No prior…	Unordered (bulleted) list.

Line	What it does
Choose Basic	A link styled as a button; it navigates, so it is a link and not a <button>.
- Three classes - Phone support - Priority bookin...	One list item.

The important declarations of styles.css

Declaration	What it does
*, *::before, *::after {	Generated content inserted before the element's content (decorations, numbers, lines).
box-sizing: border-box;	Width and height include padding and border, which makes sizing predictable.
:root {	Custom properties (variables) defined on the root so every element can use them.
--brand: #0f766e;	The brand colour variable; change it once and every use follows.
margin: 0;	Space outside the element.
font-family: system-ui, Arial, sans-serif;	The typeface stack: preferred font first, fallbacks after.
line-height: 1.6;	Space between lines; 1.5 to 1.7 is comfortable for body text.
color: var(--ink);	Text colour.
max-width: 64rem;	Limits how wide the element can grow, keeping lines readable.
padding: 0 1rem;	Space inside the element between its border and content.
text-align: center;	Centres inline content such as text.
display: grid;	Turns the element into a grid container.

Declaration	What it does
gap: 1.5rem;	Space between grid or flex items without extra margins.
grid-template-columns: repeat(auto-fit, minmax(15rem, 1fr));	Defines the columns of the grid.
align-items: start;	Aligns items to the start of the cross axis (no stretching).
position: relative;	Keeps normal flow but becomes the reference for absolutely positioned children.
border: 1px solid var(--line);	Changes the visual order of a flex item without changing the source.
border-radius: 16px;	Rounds the corners.
background: #fff;	Background colour or image.
border: 2px solid var(--brand);	The line around the element: width, style and colour.
transform: scale(1.04);	Enlarges or shrinks the element visually.
box-shadow: 0 16px 40px rgb(0 0 0 / 12%);	Soft shadow that lifts the element from the page.
position: absolute;	Removes the element from flow and positions it relative to the nearest positioned ancestor.
translate: -50% 0;	Moves the element without affecting the layout of others.
font-size: .75rem;	Size of the text.
border-radius: 999px;	Fully rounded pill shape.
font-weight: 800;	Thickness of the text.
list-style: none;	Removes bullets or numbers from a list.
border-bottom: 1px solid var(--accent);	A bottom border used as a separator line.

Declaration	What it does
content: "\2713 ";	The text or empty string for a pseudo-element.
display: block;	Element starts on a new line and fills the width (used on links and images).
text-decoration: none;	Removes the underline from links.

Check your work

- Ribbon centred
- Scaled card does not overlap on narrow screens (stacking)
- Features left-aligned
- Prices large and clear

Exercises

1. Add a monthly/yearly toggle with :checked.
2. Convert to a comparison table for many features.
3. Animate the featured card on hover.

Theme data for this project

Field	Value
Business	Pyramid Fitness
Tagline	Train smarter, feel stronger
City	6th of October
Owner	Omar Farouk
Brand colour	#0f766e
Accent colour	#ecfdf5
Offers	Morning yoga (100 EGP); Strength circuit (120 EGP); Spinning (110 EGP); Personal training (350 EGP)

Project 1054: Pricing plans comparison for Delta Dental Clinic

Theme: Delta Dental Clinic (Mansoura) | Level 2 | Files: index.html, styles.css

Brief

Present three packages side by side with a highlighted, slightly enlarged middle plan, a 'most popular' ribbon and tick/cross feature lists.

Learning goals

- Emphasise one card with transform: scale and a border
- Position a ribbon over the card edge
- Use ::before glyphs for ticks and crosses

Elements and CSS used

HTML elements	CSS features
section, h2, p, ul, li, a	transform: scale(), position: absolute + translate, align-items: start, ::before content, box-shadow

Build guide

1. Write three .plan sections; give the middle one the featured class and a ribbon p.
2. Grid the plans and align them to the start.
3. Scale the featured plan and add a shadow.
4. Position the ribbon at the top centre.
5. Add ticks with ::before; crosses for .no items.
6. Style the buttons.

Project 1056 explained line by line

The important lines of index.html

Line	What it does
<!DOCTYPE html>	Declares modern HTML so the browser renders in standards mode.
<html lang="en">	Root element; lang tells screen readers and search engines the page language.
<meta charset="utf-8">	Character encoding: makes Arabic, accents and symbols display correctly.
<meta name="viewport" content="width=device-width, initial-scale=1">	Makes the page use the real device width on phones.
<title>Lotus Language School - Compare plans</title>	Text shown in the browser tab and search results.
<link rel="stylesheet" href="styles.css">	Loads the external CSS file styles.css.
<main>	The unique content of this page; exactly one per page.
Compare our packages	The main heading; only one per page.
	Generic block container for grouping and layout.
<section class="plan">	A thematic group of content, normally with its own heading.
Basic	Second-level heading for a section.
1800 EGP	A paragraph of text.
- One course - Email support <li class="no">No prio...	Unordered (bulleted) list.

Line	What it does
Choose Basic	A link styled as a button; it navigates, so it is a link and not a <button>.
- Three courses - Phone support - Priority bookin...	One list item.

The important declarations of styles.css

Declaration	What it does
*, *::before, *::after {	Generated content inserted before the element's content (decorations, numbers, lines).
box-sizing: border-box;	Width and height include padding and border, which makes sizing predictable.
:root {	Custom properties (variables) defined on the root so every element can use them.
--brand: #7c3aed;	The brand colour variable; change it once and every use follows.
margin: 0;	Space outside the element.
font-family: system-ui, Arial, sans-serif;	The typeface stack: preferred font first, fallbacks after.
line-height: 1.6;	Space between lines; 1.5 to 1.7 is comfortable for body text.
color: var(--ink);	Text colour.
max-width: 64rem;	Limits how wide the element can grow, keeping lines readable.
padding: 0 1rem;	Space inside the element between its border and content.
text-align: center;	Centres inline content such as text.
display: grid;	Turns the element into a grid container.

Declaration	What it does
gap: 1.5rem;	Space between grid or flex items without extra margins.
grid-template-columns: repeat(auto-fit, minmax(15rem, 1fr));	Defines the columns of the grid.
align-items: start;	Aligns items to the start of the cross axis (no stretching).
position: relative;	Keeps normal flow but becomes the reference for absolutely positioned children.
border: 1px solid var(--line);	Changes the visual order of a flex item without changing the source.
border-radius: 16px;	Rounds the corners.
background: #fff;	Background colour or image.
border: 2px solid var(--brand);	The line around the element: width, style and colour.
transform: scale(1.04);	Enlarges or shrinks the element visually.
box-shadow: 0 16px 40px rgb(0 0 0 / 12%);	Soft shadow that lifts the element from the page.
position: absolute;	Removes the element from flow and positions it relative to the nearest positioned ancestor.
translate: -50% 0;	Moves the element without affecting the layout of others.
font-size: .75rem;	Size of the text.
border-radius: 999px;	Fully rounded pill shape.
font-weight: 800;	Thickness of the text.
list-style: none;	Removes bullets or numbers from a list.
border-bottom: 1px solid var(--accent);	A bottom border used as a separator line.

Declaration	What it does
content: "\2713 ";	The text or empty string for a pseudo-element.
display: block;	Element starts on a new line and fills the width (used on links and images).
text-decoration: none;	Removes the underline from links.

Check your work

- Ribbon centred
- Scaled card does not overlap on narrow screens (stacking)
- Features left-aligned
- Prices large and clear

Exercises

1. Add a monthly/yearly toggle with :checked.
2. Convert to a comparison table for many features.
3. Animate the featured card on hover.

Theme data for this project

Field	Value
Business	Lotus Language School
Tagline	Learn English, French and German in small groups
City	Alexandria
Owner	Nour El Din
Brand colour	#7c3aed
Accent colour	#f5f3ff
Offers	English A1 (1800 EGP); French B1 (2200 EGP); German A2 (2000 EGP); IELTS preparation (3000 EGP)

Project 1057: Pricing plans comparison for Green Leaf Cafe

Theme: Green Leaf Cafe (Zamalek) | Level 2 | Files: index.html, styles.css

Brief

Present three packages side by side with a highlighted, slightly enlarged middle plan, a 'most popular' ribbon and tick/cross feature lists.

Learning goals

- Emphasise one card with transform: scale and a border
- Position a ribbon over the card edge
- Use ::before glyphs for ticks and crosses

Elements and CSS used

HTML elements	CSS features
section, h2, p, ul, li, a	transform: scale(), position: absolute + translate, align-items: start, ::before content, box-shadow

Build guide

1. Write three .plan sections; give the middle one the featured class and a ribbon p.
2. Grid the plans and align them to the start.
3. Scale the featured plan and add a shadow.
4. Position the ribbon at the top centre.
5. Add ticks with ::before; crosses for .no items.
6. Style the buttons.

Project 1059 explained line by line

The important lines of index.html

Line	What it does
<!DOCTYPE html>	Declares modern HTML so the browser renders in standards mode.
<html lang="en">	Root element; lang tells screen readers and search engines the page language.
<meta charset="utf-8">	Character encoding: makes Arabic, accents and symbols display correctly.
<meta name="viewport" content="width=device-width, initial-scale=1">	Makes the page use the real device width on phones.
<title>Horizon Photography - Compare plans</title>	Text shown in the browser tab and search results.
<link rel="stylesheet" href="styles.css">	Loads the external CSS file styles.css.
<main>	The unique content of this page; exactly one per page.
Compare our packages	The main heading; only one per page.
	Generic block container for grouping and layout.
<section class="plan">	A thematic group of content, normally with its own heading.
Basic	Second-level heading for a section.
1200 EGP	A paragraph of text.
- One session - Email support <li class="no">No pri...	Unordered (bulleted) list.

Line	What it does
Choose Basic	A link styled as a button; it navigates, so it is a link and not a <button>.
- Three sessions - Phone support - Priority booki...	One list item.

The important declarations of styles.css

Declaration	What it does
*, *::before, *::after {	Generated content inserted before the element's content (decorations, numbers, lines).
box-sizing: border-box;	Width and height include padding and border, which makes sizing predictable.
:root {	Custom properties (variables) defined on the root so every element can use them.
--brand: #111827;	The brand colour variable; change it once and every use follows.
margin: 0;	Space outside the element.
font-family: system-ui, Arial, sans-serif;	The typeface stack: preferred font first, fallbacks after.
line-height: 1.6;	Space between lines; 1.5 to 1.7 is comfortable for body text.
color: var(--ink);	Text colour.
max-width: 64rem;	Limits how wide the element can grow, keeping lines readable.
padding: 0 1rem;	Space inside the element between its border and content.
text-align: center;	Centres inline content such as text.
display: grid;	Turns the element into a grid container.

Declaration	What it does
gap: 1.5rem;	Space between grid or flex items without extra margins.
grid-template-columns: repeat(auto-fit, minmax(15rem, 1fr));	Defines the columns of the grid.
align-items: start;	Aligns items to the start of the cross axis (no stretching).
position: relative;	Keeps normal flow but becomes the reference for absolutely positioned children.
border: 1px solid var(--line);	Changes the visual order of a flex item without changing the source.
border-radius: 16px;	Rounds the corners.
background: #fff;	Background colour or image.
border: 2px solid var(--brand);	The line around the element: width, style and colour.
transform: scale(1.04);	Enlarges or shrinks the element visually.
box-shadow: 0 16px 40px rgb(0 0 0 / 12%);	Soft shadow that lifts the element from the page.
position: absolute;	Removes the element from flow and positions it relative to the nearest positioned ancestor.
translate: -50% 0;	Moves the element without affecting the layout of others.
font-size: .75rem;	Size of the text.
border-radius: 999px;	Fully rounded pill shape.
font-weight: 800;	Thickness of the text.
list-style: none;	Removes bullets or numbers from a list.
border-bottom: 1px solid var(--accent);	A bottom border used as a separator line.

Declaration	What it does
content: "\2713 ";	The text or empty string for a pseudo-element.
display: block;	Element starts on a new line and fills the width (used on links and images).
text-decoration: none;	Removes the underline from links.

Check your work

- Ribbon centred
- Scaled card does not overlap on narrow screens (stacking)
- Features left-aligned
- Prices large and clear

Exercises

1. Add a monthly/yearly toggle with :checked.
2. Convert to a comparison table for many features.
3. Animate the featured card on hover.

Theme data for this project

Field	Value
Business	Horizon Photography
Tagline	Portraits, weddings and product photography
City	Maadi
Owner	Adham Nabil
Brand colour	#111827
Accent colour	#f3f4f6
Offers	Portrait session (1200 EGP); Wedding day (15000 EGP); Product shoot (900 EGP); Family session (1500 EGP)

Project 1060: Pricing plans comparison for Papyrus Stationery

Theme: Papyrus Stationery (Heliopolis) | Level 2 | Files: index.html, styles.css

Brief

Present three packages side by side with a highlighted, slightly enlarged middle plan, a 'most popular' ribbon and tick/cross feature lists.

Learning goals

- Emphasise one card with transform: scale and a border
- Position a ribbon over the card edge
- Use ::before glyphs for ticks and crosses

Elements and CSS used

HTML elements	CSS features
section, h2, p, ul, li, a	transform: scale(), position: absolute + translate, align-items: start, ::before content, box-shadow

Build guide

1. Write three .plan sections; give the middle one the featured class and a ribbon p.
2. Grid the plans and align them to the start.
3. Scale the featured plan and add a shadow.
4. Position the ribbon at the top centre.
5. Add ticks with ::before; crosses for .no items.
6. Style the buttons.

Project 1062 explained line by line

The important lines of index.html

Line	What it does
<!DOCTYPE html>	Declares modern HTML so the browser renders in standards mode.
<html lang="en">	Root element; lang tells screen readers and search engines the page language.
<meta charset="utf-8">	Character encoding: makes Arabic, accents and symbols display correctly.
<meta name="viewport" content="width=device-width, initial-scale=1">	Makes the page use the real device width on phones.
<title>Cedar Furniture - Compare plans</title>	Text shown in the browser tab and search results.
<link rel="stylesheet" href="styles.css">	Loads the external CSS file styles.css.
<main>	The unique content of this page; exactly one per page.
Compare our packages	The main heading; only one per page.
	Generic block container for grouping and layout.
<section class="plan">	A thematic group of content, normally with its own heading.
Basic	Second-level heading for a section.
9500 EGP	A paragraph of text.
- One piece - Email support <li class="no">No prior…	Unordered (bulleted) list.

Line	What it does
Choose Basic	A link styled as a button; it navigates, so it is a link and not a <button>.
- Three pieces - Phone support - Priority booking...	One list item.

The important declarations of styles.css

Declaration	What it does
*, *::before, *::after {	Generated content inserted before the element's content (decorations, numbers, lines).
box-sizing: border-box;	Width and height include padding and border, which makes sizing predictable.
:root {	Custom properties (variables) defined on the root so every element can use them.
--brand: #78350f;	The brand colour variable; change it once and every use follows.
margin: 0;	Space outside the element.
font-family: system-ui, Arial, sans-serif;	The typeface stack: preferred font first, fallbacks after.
line-height: 1.6;	Space between lines; 1.5 to 1.7 is comfortable for body text.
color: var(--ink);	Text colour.
max-width: 64rem;	Limits how wide the element can grow, keeping lines readable.
padding: 0 1rem;	Space inside the element between its border and content.
text-align: center;	Centres inline content such as text.
display: grid;	Turns the element into a grid container.

Declaration	What it does
gap: 1.5rem;	Space between grid or flex items without extra margins.
grid-template-columns: repeat(auto-fit, minmax(15rem, 1fr));	Defines the columns of the grid.
align-items: start;	Aligns items to the start of the cross axis (no stretching).
position: relative;	Keeps normal flow but becomes the reference for absolutely positioned children.
border: 1px solid var(--line);	Changes the visual order of a flex item without changing the source.
border-radius: 16px;	Rounds the corners.
background: #fff;	Background colour or image.
border: 2px solid var(--brand);	The line around the element: width, style and colour.
transform: scale(1.04);	Enlarges or shrinks the element visually.
box-shadow: 0 16px 40px rgb(0 0 0 / 12%);	Soft shadow that lifts the element from the page.
position: absolute;	Removes the element from flow and positions it relative to the nearest positioned ancestor.
translate: -50% 0;	Moves the element without affecting the layout of others.
font-size: .75rem;	Size of the text.
border-radius: 999px;	Fully rounded pill shape.
font-weight: 800;	Thickness of the text.
list-style: none;	Removes bullets or numbers from a list.
border-bottom: 1px solid var(--accent);	A bottom border used as a separator line.

Declaration	What it does
content: "\2713 ";	The text or empty string for a pseudo-element.
display: block;	Element starts on a new line and fills the width (used on links and images).
text-decoration: none;	Removes the underline from links.

Check your work

- Ribbon centred
- Scaled card does not overlap on narrow screens (stacking)
- Features left-aligned
- Prices large and clear

Exercises

1. Add a monthly/yearly toggle with :checked.
2. Convert to a comparison table for many features.
3. Animate the featured card on hover.

Theme data for this project

Field	Value
Business	Cedar Furniture
Tagline	Solid wood furniture made to order
City	Damietta
Owner	Tarek Lotfy
Brand colour	#78350f
Accent colour	#fef3c7
Offers	Oak dining table (9500 EGP); Bookshelf (4200 EGP); Bedside table (1500 EGP); Coffee table (2800 EGP)

Project 1063: Pricing plans comparison for Byte Repair

Theme: Byte Repair (Nasr City) | Level 2 | Files: index.html, styles.css

Brief

Present three packages side by side with a highlighted, slightly enlarged middle plan, a 'most popular' ribbon and tick/cross feature lists.

Learning goals

- Emphasise one card with transform: scale and a border
- Position a ribbon over the card edge
- Use ::before glyphs for ticks and crosses

Elements and CSS used

HTML elements	CSS features
section, h2, p, ul, li, a	transform: scale(), position: absolute + translate, align-items: start, ::before content, box-shadow

Build guide

1. Write three .plan sections; give the middle one the featured class and a ribbon p.
2. Grid the plans and align them to the start.
3. Scale the featured plan and add a shadow.
4. Position the ribbon at the top centre.
5. Add ticks with ::before; crosses for .no items.
6. Style the buttons.

Project 1065 explained line by line

The important lines of index.html

Line	What it does
<!DOCTYPE html>	Declares modern HTML so the browser renders in standards mode.
<html lang="en">	Root element; lang tells screen readers and search engines the page language.
<meta charset="utf-8">	Character encoding: makes Arabic, accents and symbols display correctly.
<meta name="viewport" content="width=device-width, initial-scale=1">	Makes the page use the real device width on phones.
<title>Alexandria Sailing School - Compare plans</title>	Text shown in the browser tab and search results.
<link rel="stylesheet" href="styles.css">	Loads the external CSS file styles.css.
<main>	The unique content of this page; exactly one per page.
Compare our packages	The main heading; only one per page.
	Generic block container for grouping and layout.
<section class="plan">	A thematic group of content, normally with its own heading.
Basic	Second-level heading for a section.
500 EGP	A paragraph of text.

Line	What it does
- One lesson - Email support <li class="no">No prio...	Unordered (bulleted) list.
Choose Basic	A link styled as a button; it navigates, so it is a link and not a <button>.
- Three lessons - Phone support - Priority bookin...	One list item.

The important declarations of styles.css

Declaration	What it does
*, *::before, *::after {	Generated content inserted before the element's content (decorations, numbers, lines).
box-sizing: border-box;	Width and height include padding and border, which makes sizing predictable.
:root {	Custom properties (variables) defined on the root so every element can use them.
--brand: #1e40af;	The brand colour variable; change it once and every use follows.
margin: 0;	Space outside the element.
font-family: system-ui, Arial, sans-serif;	The typeface stack: preferred font first, fallbacks after.
line-height: 1.6;	Space between lines; 1.5 to 1.7 is comfortable for body text.
color: var(--ink);	Text colour.
max-width: 64rem;	Limits how wide the element can grow, keeping lines readable.

Declaration	What it does
padding: 0 1rem;	Space inside the element between its border and content.
text-align: center;	Centres inline content such as text.
display: grid;	Turns the element into a grid container.
gap: 1.5rem;	Space between grid or flex items without extra margins.
grid-template-columns: repeat(auto-fit, minmax(15rem, 1fr));	Defines the columns of the grid.
align-items: start;	Aligns items to the start of the cross axis (no stretching).
position: relative;	Keeps normal flow but becomes the reference for absolutely positioned children.
border: 1px solid var(--line);	Changes the visual order of a flex item without changing the source.
border-radius: 16px;	Rounds the corners.
background: #fff;	Background colour or image.
border: 2px solid var(--brand);	The line around the element: width, style and colour.
transform: scale(1.04);	Enlarges or shrinks the element visually.
box-shadow: 0 16px 40px rgb(0 0 0 / 12%);	Soft shadow that lifts the element from the page.
position: absolute;	Removes the element from flow and positions it relative to the nearest positioned ancestor.
translate: -50% 0;	Moves the element without affecting the layout of others.
font-size: .75rem;	Size of the text.
border-radius: 999px;	Fully rounded pill shape.

Declaration	What it does
font-weight: 800;	Thickness of the text.
list-style: none;	Removes bullets or numbers from a list.
border-bottom: 1px solid var(--accent);	A bottom border used as a separator line.
content: "\2713 ";	The text or empty string for a pseudo-element.
display: block;	Element starts on a new line and fills the width (used on links and images).
text-decoration: none;	Removes the underline from links.

Check your work

- Ribbon centred
- Scaled card does not overlap on narrow screens (stacking)
- Features left-aligned
- Prices large and clear

Exercises

1. Add a monthly/yearly toggle with :checked.
2. Convert to a comparison table for many features.
3. Animate the featured card on hover.

Theme data for this project

Field	Value
Business	Alexandria Sailing School
Tagline	Learn to sail on the Mediterranean
City	Alexandria
Owner	Amr Selim
Brand colour	#1e40af

Field	Value
Accent colour	#eff6ff
Offers	Taster session (500 EGP); Beginner course (2200 EGP); Racing clinic (1800 EGP); Private lesson (900 EGP)

Project 1066: Pricing plans comparison for Habiba Handmade Jewellery

Theme: Habiba Handmade Jewellery (Aswan) | Level 2 | Files: index.html, styles.css

Brief

Present three packages side by side with a highlighted, slightly enlarged middle plan, a 'most popular' ribbon and tick/cross feature lists.

Learning goals

- Emphasise one card with transform: scale and a border
- Position a ribbon over the card edge
- Use ::before glyphs for ticks and crosses

Elements and CSS used

HTML elements	CSS features
section, h2, p, ul, li, a	transform: scale(), position: absolute + translate, align-items: start, ::before content, box-shadow

Build guide

1. Write three .plan sections; give the middle one the featured class and a ribbon p.
2. Grid the plans and align them to the start.
3. Scale the featured plan and add a shadow.
4. Position the ribbon at the top centre.
5. Add ticks with ::before; crosses for .no items.

6. Style the buttons.

Project 1068 explained line by line

The important lines of index.html

Line	What it does
<!DOCTYPE html>	Declares modern HTML so the browser renders in standards mode.
<html lang="en">	Root element; lang tells screen readers and search engines the page language.
<meta charset="utf-8">	Character encoding: makes Arabic, accents and symbols display correctly.
<meta name="viewport" content="width=device-width, initial-scale=1">	Makes the page use the real device width on phones.
<title>Cleopatra Beauty Salon - Compare plans</title>	Text shown in the browser tab and search results.
<link rel="stylesheet" href="styles.css">	Loads the external CSS file styles.css.
<main>	The unique content of this page; exactly one per page.
Compare our packages	The main heading; only one per page.
	Generic block container for grouping and layout.
<section class="plan">	A thematic group of content, normally with its own heading.
Basic	Second-level heading for a section.
350 EGP	A paragraph of text.
- One treatment - Email support <li class="no">No p...	Unordered (bulleted) list.

Line	What it does
Choose Basic	A link styled as a button; it navigates, so it is a link and not a <button>.
- Three treatments - Phone support - Priority boo...	One list item.

The important declarations of styles.css

Declaration	What it does
*, *::before, *::after {	Generated content inserted before the element's content (decorations, numbers, lines).
box-sizing: border-box;	Width and height include padding and border, which makes sizing predictable.
:root {	Custom properties (variables) defined on the root so every element can use them.
--brand: #db2777;	The brand colour variable; change it once and every use follows.
margin: 0;	Space outside the element.
font-family: system-ui, Arial, sans-serif;	The typeface stack: preferred font first, fallbacks after.
line-height: 1.6;	Space between lines; 1.5 to 1.7 is comfortable for body text.
color: var(--ink);	Text colour.
max-width: 64rem;	Limits how wide the element can grow, keeping lines readable.
padding: 0 1rem;	Space inside the element between its border and content.
text-align: center;	Centres inline content such as text.
display: grid;	Turns the element into a grid container.

Declaration	What it does
gap: 1.5rem;	Space between grid or flex items without extra margins.
grid-template-columns: repeat(auto-fit, minmax(15rem, 1fr));	Defines the columns of the grid.
align-items: start;	Aligns items to the start of the cross axis (no stretching).
position: relative;	Keeps normal flow but becomes the reference for absolutely positioned children.
border: 1px solid var(--line);	Changes the visual order of a flex item without changing the source.
border-radius: 16px;	Rounds the corners.
background: #fff;	Background colour or image.
border: 2px solid var(--brand);	The line around the element: width, style and colour.
transform: scale(1.04);	Enlarges or shrinks the element visually.
box-shadow: 0 16px 40px rgb(0 0 0 / 12%);	Soft shadow that lifts the element from the page.
position: absolute;	Removes the element from flow and positions it relative to the nearest positioned ancestor.
translate: -50% 0;	Moves the element without affecting the layout of others.
font-size: .75rem;	Size of the text.
border-radius: 999px;	Fully rounded pill shape.
font-weight: 800;	Thickness of the text.
list-style: none;	Removes bullets or numbers from a list.
border-bottom: 1px solid var(--accent);	A bottom border used as a separator line.

Declaration	What it does
content: "\2713 ";	The text or empty string for a pseudo-element.
display: block;	Element starts on a new line and fills the width (used on links and images).
text-decoration: none;	Removes the underline from links.

Check your work

- Ribbon centred
- Scaled card does not overlap on narrow screens (stacking)
- Features left-aligned
- Prices large and clear

Exercises

1. Add a monthly/yearly toggle with :checked.
2. Convert to a comparison table for many features.
3. Animate the featured card on hover.

Theme data for this project

Field	Value
Business	Cleopatra Beauty Salon
Tagline	Hair, nails and skin care
City	Dokki
Owner	Mariam Adel
Brand colour	#db2777
Accent colour	#fdf2f8
Offers	Haircut and blow-dry (350 EGP); Manicure (200 EGP); Facial (600 EGP); Bridal package (4500 EGP)

Project 1069: Pricing plans comparison for Suez Auto Service

Theme: Suez Auto Service (Suez) | Level 2 | Files: index.html, styles.css

Brief

Present three packages side by side with a highlighted, slightly enlarged middle plan, a 'most popular' ribbon and tick/cross feature lists.

Learning goals

- Emphasise one card with transform: scale and a border
- Position a ribbon over the card edge
- Use ::before glyphs for ticks and crosses

Elements and CSS used

HTML elements	CSS features
section, h2, p, ul, li, a	transform: scale(), position: absolute + translate, align-items: start, ::before content, box-shadow

Build guide

1. Write three .plan sections; give the middle one the featured class and a ribbon p.
2. Grid the plans and align them to the start.
3. Scale the featured plan and add a shadow.
4. Position the ribbon at the top centre.
5. Add ticks with ::before; crosses for .no items.
6. Style the buttons.

Project 1071 explained line by line

The important lines of index.html

Line	What it does
<!DOCTYPE html>	Declares modern HTML so the browser renders in standards mode.
<html lang="en">	Root element; lang tells screen readers and search engines the page language.
<meta charset="utf-8">	Character encoding: makes Arabic, accents and symbols display correctly.
<meta name="viewport" content="width=device-width, initial-scale=1">	Makes the page use the real device width on phones.
<title>Port Said Seafood - Compare plans</title>	Text shown in the browser tab and search results.
<link rel="stylesheet" href="styles.css">	Loads the external CSS file styles.css.
<main>	The unique content of this page; exactly one per page.
Compare our packages	The main heading; only one per page.
	Generic block container for grouping and layout.
<section class="plan">	A thematic group of content, normally with its own heading.
Basic	Second-level heading for a section.
320 EGP	A paragraph of text.
- One dish - Email support <li class="no">No priori...	Unordered (bulleted) list.

Line	What it does
Choose Basic	A link styled as a button; it navigates, so it is a link and not a <button>.
- Three dishes - Phone support - Priority booking...	One list item.

The important declarations of styles.css

Declaration	What it does
*, *::before, *::after {	Generated content inserted before the element's content (decorations, numbers, lines).
box-sizing: border-box;	Width and height include padding and border, which makes sizing predictable.
:root {	Custom properties (variables) defined on the root so every element can use them.
--brand: #0e7490;	The brand colour variable; change it once and every use follows.
margin: 0;	Space outside the element.
font-family: system-ui, Arial, sans-serif;	The typeface stack: preferred font first, fallbacks after.
line-height: 1.6;	Space between lines; 1.5 to 1.7 is comfortable for body text.
color: var(--ink);	Text colour.
max-width: 64rem;	Limits how wide the element can grow, keeping lines readable.
padding: 0 1rem;	Space inside the element between its border and content.
text-align: center;	Centres inline content such as text.
display: grid;	Turns the element into a grid container.

Declaration	What it does
gap: 1.5rem;	Space between grid or flex items without extra margins.
grid-template-columns: repeat(auto-fit, minmax(15rem, 1fr));	Defines the columns of the grid.
align-items: start;	Aligns items to the start of the cross axis (no stretching).
position: relative;	Keeps normal flow but becomes the reference for absolutely positioned children.
border: 1px solid var(--line);	Changes the visual order of a flex item without changing the source.
border-radius: 16px;	Rounds the corners.
background: #fff;	Background colour or image.
border: 2px solid var(--brand);	The line around the element: width, style and colour.
transform: scale(1.04);	Enlarges or shrinks the element visually.
box-shadow: 0 16px 40px rgb(0 0 0 / 12%);	Soft shadow that lifts the element from the page.
position: absolute;	Removes the element from flow and positions it relative to the nearest positioned ancestor.
translate: -50% 0;	Moves the element without affecting the layout of others.
font-size: .75rem;	Size of the text.
border-radius: 999px;	Fully rounded pill shape.
font-weight: 800;	Thickness of the text.
list-style: none;	Removes bullets or numbers from a list.
border-bottom: 1px solid var(--accent);	A bottom border used as a separator line.

Declaration	What it does
content: "\2713 ";	The text or empty string for a pseudo-element.
display: block;	Element starts on a new line and fills the width (used on links and images).
text-decoration: none;	Removes the underline from links.

Check your work

- Ribbon centred
- Scaled card does not overlap on narrow screens (stacking)
- Features left-aligned
- Prices large and clear

Exercises

1. Add a monthly/yearly toggle with :checked.
2. Convert to a comparison table for many features.
3. Animate the featured card on hover.

Theme data for this project

Field	Value
Business	Port Said Seafood
Tagline	Grilled fish straight from the boats
City	Port Said
Owner	Sherif Wahba
Brand colour	#0e7490
Accent colour	#ecfeff
Offers	Grilled sea bass (320 EGP); Shrimp tagine (280 EGP); Calamari (190 EGP); Fish soup (120 EGP)

Project 1072: Pricing plans comparison for Delta Kids Library

Theme: Delta Kids Library (Tanta) | Level 2 | Files: index.html, styles.css

Brief

Present three packages side by side with a highlighted, slightly enlarged middle plan, a 'most popular' ribbon and tick/cross feature lists.

Learning goals

- Emphasise one card with transform: scale and a border
- Position a ribbon over the card edge
- Use ::before glyphs for ticks and crosses

Elements and CSS used

HTML elements	CSS features
section, h2, p, ul, li, a	transform: scale(), position: absolute + translate, align-items: start, ::before content, box-shadow

Build guide

1. Write three .plan sections; give the middle one the featured class and a ribbon p.
2. Grid the plans and align them to the start.
3. Scale the featured plan and add a shadow.
4. Position the ribbon at the top centre.
5. Add ticks with ::before; crosses for .no items.
6. Style the buttons.

```

Project 1074 explained line by line

The important lines of index.html

Line	What it does
<!DOCTYPE html>	Declares modern HTML so the browser renders in standards mode.
<html lang="en">	Root element; lang tells screen readers and search engines the page language.
<meta charset="utf-8">	Character encoding: makes Arabic, accents and symbols display correctly.
<meta name="viewport" content="width=device-width, initial-scale=1">	Makes the page use the real device width on phones.
<title>Ismailia Cycling Store - Compare plans</title>	Text shown in the browser tab and search results.
<link rel="stylesheet" href="styles.css">	Loads the external CSS file styles.css.
<main>	The unique content of this page; exactly one per page.
Compare our packages	The main heading; only one per page.
	Generic block container for grouping and layout.
<section class="plan">	A thematic group of content, normally with its own heading.
Basic	Second-level heading for a section.
6500 EGP	A paragraph of text.
- One bike - Email support <li class="no">No priori...	Unordered (bulleted) list.

Line	What it does
Choose Basic	A link styled as a button; it navigates, so it is a link and not a <button>.
- Three bikes - Phone support - Priority booking<...	One list item.

The important declarations of styles.css

Declaration	What it does
*, *::before, *::after {	Generated content inserted before the element's content (decorations, numbers, lines).
box-sizing: border-box;	Width and height include padding and border, which makes sizing predictable.
:root {	Custom properties (variables) defined on the root so every element can use them.
--brand: #dc2626;	The brand colour variable; change it once and every use follows.
margin: 0;	Space outside the element.
font-family: system-ui, Arial, sans-serif;	The typeface stack: preferred font first, fallbacks after.
line-height: 1.6;	Space between lines; 1.5 to 1.7 is comfortable for body text.
color: var(--ink);	Text colour.
max-width: 64rem;	Limits how wide the element can grow, keeping lines readable.
padding: 0 1rem;	Space inside the element between its border and content.
text-align: center;	Centres inline content such as text.
display: grid;	Turns the element into a grid container.

Declaration	What it does
gap: 1.5rem;	Space between grid or flex items without extra margins.
grid-template-columns: repeat(auto-fit, minmax(15rem, 1fr));	Defines the columns of the grid.
align-items: start;	Aligns items to the start of the cross axis (no stretching).
position: relative;	Keeps normal flow but becomes the reference for absolutely positioned children.
border: 1px solid var(--line);	Changes the visual order of a flex item without changing the source.
border-radius: 16px;	Rounds the corners.
background: #fff;	Background colour or image.
border: 2px solid var(--brand);	The line around the element: width, style and colour.
transform: scale(1.04);	Enlarges or shrinks the element visually.
box-shadow: 0 16px 40px rgb(0 0 0 / 12%);	Soft shadow that lifts the element from the page.
position: absolute;	Removes the element from flow and positions it relative to the nearest positioned ancestor.
translate: -50% 0;	Moves the element without affecting the layout of others.
font-size: .75rem;	Size of the text.
border-radius: 999px;	Fully rounded pill shape.
font-weight: 800;	Thickness of the text.
list-style: none;	Removes bullets or numbers from a list.
border-bottom: 1px solid var(--accent);	A bottom border used as a separator line.

Declaration	What it does
content: "\2713 ";	The text or empty string for a pseudo-element.
display: block;	Element starts on a new line and fills the width (used on links and images).
text-decoration: none;	Removes the underline from links.

Check your work

- Ribbon centred
- Scaled card does not overlap on narrow screens (stacking)
- Features left-aligned
- Prices large and clear

Exercises

1. Add a monthly/yearly toggle with :checked.
2. Convert to a comparison table for many features.
3. Animate the featured card on hover.

Theme data for this project

Field	Value
Business	Ismailia Cycling Store
Tagline	Bikes, parts and Friday group rides
City	Ismailia
Owner	Bassem Adly
Brand colour	#dc2626
Accent colour	#fef2f2
Offers	City bike (6500 EGP); Mountain bike (11000 EGP); Kids bike (3200 EGP); Tune-up (250 EGP)

Project 1075: Pricing plans comparison for Minya Coding Club

Theme: Minya Coding Club (Minya) | Level 2 | Files: index.html, styles.css

Brief

Present three packages side by side with a highlighted, slightly enlarged middle plan, a 'most popular' ribbon and tick/cross feature lists.

Learning goals

- Emphasise one card with transform: scale and a border
- Position a ribbon over the card edge
- Use ::before glyphs for ticks and crosses

Elements and CSS used

HTML elements	CSS features
section, h2, p, ul, li, a	transform: scale(), position: absolute + translate, align-items: start, ::before content, box-shadow

Build guide

1. Write three .plan sections; give the middle one the featured class and a ribbon p.
2. Grid the plans and align them to the start.
3. Scale the featured plan and add a shadow.
4. Position the ribbon at the top centre.
5. Add ticks with ::before; crosses for .no items.
6. Style the buttons.

Project type: Step-by-step how-to page

Level 2 | 25 projects, one per theme

Write a tutorial page with a 'you will need' box and numbered steps where each number is a large circle generated by CSS counters inside a grid row.

Project 1076: Step-by-step how-to page for Cairo Book Shop

Theme: Cairo Book Shop (Giza) | Level 2 | Files: index.html, styles.css

Brief

Write a tutorial page with a 'you will need' box and numbered steps where each number is a large circle generated by CSS counters inside a grid row.

Learning goals

- Use headings inside list items
- Generate step numbers with counters
- Use a two-column grid per list item with the ::before in the first column

Elements and CSS used

HTML elements	CSS features
article, h1, p, section, h2, ul, ol, li, h3	counter-reset/increment, grid-template-columns: 3rem 1fr, grid-row: 1 / 3, grid-column: 2, border-radius: 50%

Build guide

1. Write the article with lead and 'You will need' section.
2. Write the ol; each li has an h3 and a p.
3. Remove list numbers and reset a counter.
4. Make each li a grid of two columns.
5. Put the counter in ::before spanning two rows.

6. Place h3 and p in column two.

Project 1076: index.html

<title>How we make Learn HTML - Cairo Book Shop</title>	Text shown in the browser tab and search results.
<link rel="stylesheet" href="styles.css">	Loads the external CSS file styles.css.
<main>	The unique content of this page; exactly one per page.
<article class="howto">	A self-contained piece: card, post, product.
How we make Learn HTML	The main heading; only one per page.
<p class="lead">From your first tag to a complete page. Here is the...	A paragraph of text.
<section class="need">	A thematic group of content, normally with its own heading.
You will need	Second-level heading for a section.
	Unordered (bulleted) list.
Time: about 2 hours	One list item.

Line	What it does
<ol class="steps">	Ordered (numbered) list; the order matters.
<h3>Prepare</h3><p>Gather everything and read the whole process...	Third-level heading, inside an h2 section.

The important declarations of styles.css

Declaration	What it does
*, *::before, *::after {	Generated content inserted before the element's content (decorations, numbers, lines).
box-sizing: border-box;	Width and height include padding and border, which makes sizing predictable.
:root {	Custom properties (variables) defined on the root so every element can use them.
--brand: #b90000;	The brand colour variable; change it once and every use follows.
margin: 0;	Space outside the element.
font-family: system-ui, Arial, sans-serif;	The typeface stack: preferred font first, fallbacks after.
line-height: 1.6;	Space between lines; 1.5 to 1.7 is comfortable for body text.
color: var(--ink);	Text colour.
max-width: 44rem;	Limits how wide the element can grow, keeping lines readable.
padding: 0 1rem;	Space inside the element between its border and content.
font-size: 1.2rem;	Size of the text.
background: var(--accent);	Background colour or image.

Declaration	What it does
border-radius: 12px;	Rounds the corners.
text-transform: uppercase;	Displays text in capitals without changing the HTML.
letter-spacing: .05em;	Adds space between letters; useful for small capitals.
list-style: none;	Removes bullets or numbers from a list.
counter-reset: step;	Starts a CSS counter.
counter-increment: step;	Adds one to the counter for each matching element.
display: grid;	Turns the element into a grid container.
grid-template-columns: 3rem 1fr;	Defines the columns of the grid.
gap: 0 1rem;	Space between grid or flex items without extra margins.
border-bottom: 1px solid var(--line);	A bottom border used as a separator line.
content: counter(step);	The text or empty string for a pseudo-element.
border-radius: 50%;	Turns a square into a circle.
place-items: center;	Centres items horizontally and vertically in a grid.
font-weight: 800;	Thickness of the text.

Check your work

- Numbers generated, list still an ol
- Headings inside li are h3
- Circle stays aligned with the heading
- Readable width

Exercises

1. Add images to steps.
2. Add a 'mark as done' checkbox per step with :has() styling.
3. Add schema.org HowTo microdata.

Project 1077: Step-by-step how-to page for Nile Bakery

Theme: Nile Bakery (Cairo) | Level 2 | Files: index.html, styles.css

Brief

Write a tutorial page with a 'you will need' box and numbered steps where each number is a large circle generated by CSS counters inside a grid row.

Learning goals

- Use headings inside list items
- Generate step numbers with counters
- Use a two-column grid per list item with the ::before in the first column

Elements and CSS used

HTML elements	CSS features
article, h1, p, section, h2, ul, ol, li, h3	counter-reset/increment, grid-template-columns: 3rem 1fr, grid-row: 1 / 3, grid-column: 2, border-radius: 50%

Build guide

1. Write the article with lead and 'You will need' section.
2. Write the ol; each li has an h3 and a p.
3. Remove list numbers and reset a counter.
4. Make each li a grid of two columns.
5. Put the counter in ::before spanning two rows.
6. Place h3 and p in column two.

How we make Sourdough loaf	The main heading; only one per page.
<p class="lead">Slow fermented, crisp crust. Here is the process, s...	A paragraph of text.
<section class="need">	A thematic group of content, normally with its own heading.
You will need	Second-level heading for a section.
	Unordered (bulleted) list.
Time: about 2 hours	One list item.

Line	What it does
<ol class="steps">	Ordered (numbered) list; the order matters.
<h3>Prepare</h3><p>Gather everything and read the whole process...	Third-level heading, inside an h2 section.

The important declarations of styles.css

Declaration	What it does
*, *::before, *::after {	Generated content inserted before the element's content (decorations, numbers, lines).
box-sizing: border-box;	Width and height include padding and border, which makes sizing predictable.
:root {	Custom properties (variables) defined on the root so every element can use them.
--brand: #a0522d;	The brand colour variable; change it once and every use follows.
margin: 0;	Space outside the element.
font-family: system-ui, Arial, sans-serif;	The typeface stack: preferred font first, fallbacks after.
line-height: 1.6;	Space between lines; 1.5 to 1.7 is comfortable for body text.
color: var(--ink);	Text colour.
max-width: 44rem;	Limits how wide the element can grow, keeping lines readable.
padding: 0 1rem;	Space inside the element between its border and content.
font-size: 1.2rem;	Size of the text.
background: var(--accent);	Background colour or image.

Declaration	What it does
border-radius: 12px;	Rounds the corners.
text-transform: uppercase;	Displays text in capitals without changing the HTML.
letter-spacing: .05em;	Adds space between letters; useful for small capitals.
list-style: none;	Removes bullets or numbers from a list.
counter-reset: step;	Starts a CSS counter.
counter-increment: step;	Adds one to the counter for each matching element.
display: grid;	Turns the element into a grid container.
grid-template-columns: 3rem 1fr;	Defines the columns of the grid.
gap: 0 1rem;	Space between grid or flex items without extra margins.
border-bottom: 1px solid var(--line);	A bottom border used as a separator line.
content: counter(step);	The text or empty string for a pseudo-element.
border-radius: 50%;	Turns a square into a circle.
place-items: center;	Centres items horizontally and vertically in a grid.
font-weight: 800;	Thickness of the text.

Check your work

- Numbers generated, list still an ol
- Headings inside li are h3
- Circle stays aligned with the heading
- Readable width

Exercises

1. Add images to steps.
2. Add a 'mark as done' checkbox per step with :has() styling.
3. Add schema.org HowTo microdata.

Theme data for this project

Field	Value
Business	Nile Bakery
Tagline	Fresh bread and pastries every morning
City	Cairo
Owner	Sara Adel
Brand colour	#a0522d
Accent colour	#fff6ec
Offers	Sourdough loaf (60 EGP); Croissant (35 EGP); Date cookies (80 EGP); Baklava box (220 EGP)

Project 1078: Step-by-step how-to page for Pyramid Fitness

Theme: Pyramid Fitness (6th of October) | Level 2 | Files: index.html, styles.css

Brief

Write a tutorial page with a 'you will need' box and numbered steps where each number is a large circle generated by CSS counters inside a grid row.

Learning goals

- Use headings inside list items
- Generate step numbers with counters
- Use a two-column grid per list item with the ::before in the first column

Elements and CSS used

HTML elements	CSS features
article, h1, p, section, h2, ul, ol, li, h3	counter-reset/increment, grid-template-columns: 3rem 1fr, grid-row: 1 / 3, grid-column: 2, border-radius: 50%

Build guide

1. Write the article with lead and 'You will need' section.
2. Write the ol; each li has an h3 and a p.
3. Remove list numbers and reset a counter.
4. Make each li a grid of two columns.
5. Put the counter in ::before spanning two rows.

6. Place h3 and p in column two.

Project 1078: index.html

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="utf-8">
  <meta name="viewport" content="width=device-width, initial-scale=1">

Project 1081: Step-by-step how-to page for Lotus Language School

Theme: Lotus Language School (Alexandria) | Level 2 | Files: index.html, styles.css

Brief

Write a tutorial page with a 'you will need' box and numbered steps where each number is a large circle generated by CSS counters inside a grid row.

Learning goals

- Use headings inside list items
- Generate step numbers with counters
- Use a two-column grid per list item with the ::before in the first column

Elements and CSS used

HTML elements	CSS features
article, h1, p, section, h2, ul, ol, li, h3	counter-reset/increment, grid-template-columns: 3rem 1fr, grid-row: 1 / 3, grid-column: 2, border-radius: 50%

Build guide

1. Write the article with lead and 'You will need' section.
2. Write the ol; each li has an h3 and a p.
3. Remove list numbers and reset a counter.
4. Make each li a grid of two columns.
5. Put the counter in ::before spanning two rows.

6. Place h3 and p in column two.

Project 1081: index.html

```
<!DOCTYPE html>
<html lang="en">
<head>

Project 1081 explained line by line

The important lines of index.html

Line	What it does
<!DOCTYPE html>	Declares modern HTML so the browser renders in standards mode.
<html lang="en">	Root element; lang tells screen readers and search engines the page language.
<meta charset="utf-8">	Character encoding: makes Arabic, accents and symbols display correctly.
<meta name="viewport" content="width=device-width, initial-scale=1">	Makes the page use the real device width on phones.
<title>How we make English A1 - Lotus Language School</title>	Text shown in the browser tab and search results.
<link rel="stylesheet" href="styles.css">	Loads the external CSS file styles.css.
<main>	The unique content of this page; exactly one per page.
<article class="howto">	A self-contained piece: card, post, product.
How we make English A1	The main heading; only one per page.
<p class="lead">Beginner, 8 weeks. Here is the process, step by ste...	A paragraph of text.
<section class="need">	A thematic group of content, normally with its own heading.
You will need	Second-level heading for a section.
	Unordered (bulleted) list.
Time: about 2 hours	One list item.

Line	What it does
<ol class="steps">	Ordered (numbered) list; the order matters.
<h3>Prepare</h3><p>Gather everything and read the whole process...	Third-level heading, inside an h2 section.

The important declarations of styles.css

Declaration	What it does
*, *::before, *::after {	Generated content inserted before the element's content (decorations, numbers, lines).
box-sizing: border-box;	Width and height include padding and border, which makes sizing predictable.
:root {	Custom properties (variables) defined on the root so every element can use them.
--brand: #7c3aed;	The brand colour variable; change it once and every use follows.
margin: 0;	Space outside the element.
font-family: system-ui, Arial, sans-serif;	The typeface stack: preferred font first, fallbacks after.
line-height: 1.6;	Space between lines; 1.5 to 1.7 is comfortable for body text.
color: var(--ink);	Text colour.
max-width: 44rem;	Limits how wide the element can grow, keeping lines readable.
padding: 0 1rem;	Space inside the element between its border and content.
font-size: 1.2rem;	Size of the text.
background: var(--accent);	Background colour or image.

Declaration	What it does
border-radius: 12px;	Rounds the corners.
text-transform: uppercase;	Displays text in capitals without changing the HTML.
letter-spacing: .05em;	Adds space between letters; useful for small capitals.
list-style: none;	Removes bullets or numbers from a list.
counter-reset: step;	Starts a CSS counter.
counter-increment: step;	Adds one to the counter for each matching element.
display: grid;	Turns the element into a grid container.
grid-template-columns: 3rem 1fr;	Defines the columns of the grid.
gap: 0 1rem;	Space between grid or flex items without extra margins.
border-bottom: 1px solid var(--line);	A bottom border used as a separator line.
content: counter(step);	The text or empty string for a pseudo-element.
border-radius: 50%;	Turns a square into a circle.
place-items: center;	Centres items horizontally and vertically in a grid.
font-weight: 800;	Thickness of the text.

Check your work

- Numbers generated, list still an ol
- Headings inside li are h3
- Circle stays aligned with the heading
- Readable width

Exercises

1. Add images to steps.
2. Add a 'mark as done' checkbox per step with :has() styling.
3. Add schema.org HowTo microdata.

Theme data for this project

Offers	Mount Sinai sunrise (400 EGP); Blue Desert loop (250 EGP); Wadi Gnai (300 EGP); Three-day traverse (1900 EGP)

Project 1084: Step-by-step how-to page for Horizon Photography

Theme: Horizon Photography (Maadi) | Level 2 | Files: index.html, styles.css

Brief

Write a tutorial page with a 'you will need' box and numbered steps where each number is a large circle generated by CSS counters inside a grid row.

Learning goals

- Use headings inside list items
- Generate step numbers with counters
- Use a two-column grid per list item with the ::before in the first column

Elements and CSS used

HTML elements	CSS features
article, h1, p, section, h2, ul, ol, li, h3	counter-reset/increment, grid-template-columns: 3rem 1fr, grid-row: 1 / 3, grid-column: 2, border-radius: 50%

Build guide

1. Write the article with lead and 'You will need' section.
2. Write the ol; each li has an h3 and a p.
3. Remove list numbers and reset a counter.
4. Make each li a grid of two columns.
5. Put the counter in ::before spanning two rows.

6. Place h3 and p in column two.

Project 1084 explained line by line

The important lines of index.html

Line	What it does
<!DOCTYPE html>	Declares modern HTML so the browser renders in standards mode.
<html lang="en">	Root element; lang tells screen readers and search engines the page language.
<meta charset="utf-8">	Character encoding: makes Arabic, accents and symbols display correctly.
<meta name="viewport" content="width=device-width, initial-scale=1">	Makes the page use the real device width on phones.
<title>How we make Portrait session - Horizon Photography</title>	Text shown in the browser tab and search results.
<link rel="stylesheet" href="styles.css">	Loads the external CSS file styles.css.
<main>	The unique content of this page; exactly one per page.
<article class="howto">	A self-contained piece: card, post, product.
How we make Portrait session	The main heading; only one per page.
<p class="lead">One hour, 20 edited photos. Here is the process, st...	A paragraph of text.
<section class="need">	A thematic group of content, normally with its own heading.
You will need	Second-level heading for a section.
	Unordered (bulleted) list.
Time: about 2 hours	One list item.

Line	What it does
<ol class="steps">	Ordered (numbered) list; the order matters.
<h3>Prepare</h3><p>Gather everything and read the whole process...	Third-level heading, inside an h2 section.

The important declarations of styles.css

Declaration	What it does
*, *::before, *::after {	Generated content inserted before the element's content (decorations, numbers, lines).
box-sizing: border-box;	Width and height include padding and border, which makes sizing predictable.
:root {	Custom properties (variables) defined on the root so every element can use them.
--brand: #111827;	The brand colour variable; change it once and every use follows.
margin: 0;	Space outside the element.
font-family: system-ui, Arial, sans-serif;	The typeface stack: preferred font first, fallbacks after.
line-height: 1.6;	Space between lines; 1.5 to 1.7 is comfortable for body text.
color: var(--ink);	Text colour.
max-width: 44rem;	Limits how wide the element can grow, keeping lines readable.
padding: 0 1rem;	Space inside the element between its border and content.
font-size: 1.2rem;	Size of the text.
background: var(--accent);	Background colour or image.

Declaration	What it does
border-radius: 12px;	Rounds the corners.
text-transform: uppercase;	Displays text in capitals without changing the HTML.
letter-spacing: .05em;	Adds space between letters; useful for small capitals.
list-style: none;	Removes bullets or numbers from a list.
counter-reset: step;	Starts a CSS counter.
counter-increment: step;	Adds one to the counter for each matching element.
display: grid;	Turns the element into a grid container.
grid-template-columns: 3rem 1fr;	Defines the columns of the grid.
gap: 0 1rem;	Space between grid or flex items without extra margins.
border-bottom: 1px solid var(--line);	A bottom border used as a separator line.
content: counter(step);	The text or empty string for a pseudo-element.
border-radius: 50%;	Turns a square into a circle.
place-items: center;	Centres items horizontally and vertically in a grid.
font-weight: 800;	Thickness of the text.

Check your work

- Numbers generated, list still an ol
- Headings inside li are h3
- Circle stays aligned with the heading
- Readable width

Exercises

1. Add images to steps.
2. Add a 'mark as done' checkbox per step with :has() styling.
3. Add schema.org HowTo microdata.

Theme data for this project

Field	Value
Business	Horizon Photography
Tagline	Portraits, weddings and product photography
City	Maadi
Owner	Adham Nabil
Brand colour	#111827
Accent colour	#f3f4f6
Offers	Portrait session (1200 EGP); Wedding day (15000 EGP); Product shoot (900 EGP); Family session (1500 EGP)

Project 1085: Step-by-step how-to page for Papyrus Stationery

Theme: Papyrus Stationery (Heliopolis) | Level 2 | Files: index.html, styles.css

Brief

Write a tutorial page with a 'you will need' box and numbered steps where each number is a large circle generated by CSS counters inside a grid row.

Learning goals

- Use headings inside list items
- Generate step numbers with counters
- Use a two-column grid per list item with the ::before in the first column

Elements and CSS used

HTML elements	CSS features
article, h1, p, section, h2, ul, ol, li, h3	counter-reset/increment, grid-template-columns: 3rem 1fr, grid-row: 1 / 3, grid-column: 2, border-radius: 50%

Build guide

1. Write the article with lead and 'You will need' section.
2. Write the ol; each li has an h3 and a p.
3. Remove list numbers and reset a counter.
4. Make each li a grid of two columns.
5. Put the counter in ::before spanning two rows.

6. Place h3 and p in column two.

Project 1085: index.html

```
<!DOCTYPE html>

Project 1087: Step-by-step how-to page for Cedar Furniture

Theme: Cedar Furniture (Damietta) | Level 2 | Files: index.html, styles.css

Brief

Write a tutorial page with a 'you will need' box and numbered steps where each number is a large circle generated by CSS counters inside a grid row.

Learning goals

- Use headings inside list items
- Generate step numbers with counters
- Use a two-column grid per list item with the ::before in the first column

Elements and CSS used

HTML elements	CSS features
article, h1, p, section, h2, ul, ol, li, h3	counter-reset/increment, grid-template-columns: 3rem 1fr, grid-row: 1 / 3, grid-column: 2, border-radius: 50%

Build guide

1. Write the article with lead and 'You will need' section.
2. Write the ol; each li has an h3 and a p.
3. Remove list numbers and reset a counter.
4. Make each li a grid of two columns.
5. Put the counter in ::before spanning two rows.

6. Place h3 and p in column two.

<h3>Prepare</h3><p>Gather everything and read the whole process...	Third-level heading, inside an h2 section.

The important declarations of styles.css

Declaration	What it does
*, *::before, *::after {	Generated content inserted before the element's content (decorations, numbers, lines).
box-sizing: border-box;	Width and height include padding and border, which makes sizing predictable.
:root {	Custom properties (variables) defined on the root so every element can use them.
--brand: #78350f;	The brand colour variable; change it once and every use follows.
margin: 0;	Space outside the element.
font-family: system-ui, Arial, sans-serif;	The typeface stack: preferred font first, fallbacks after.
line-height: 1.6;	Space between lines; 1.5 to 1.7 is comfortable for body text.
color: var(--ink);	Text colour.
max-width: 44rem;	Limits how wide the element can grow, keeping lines readable.
padding: 0 1rem;	Space inside the element between its border and content.
font-size: 1.2rem;	Size of the text.
background: var(--accent);	Background colour or image.

Declaration	What it does
border-radius: 12px;	Rounds the corners.
text-transform: uppercase;	Displays text in capitals without changing the HTML.
letter-spacing: .05em;	Adds space between letters; useful for small capitals.
list-style: none;	Removes bullets or numbers from a list.
counter-reset: step;	Starts a CSS counter.
counter-increment: step;	Adds one to the counter for each matching element.
display: grid;	Turns the element into a grid container.
grid-template-columns: 3rem 1fr;	Defines the columns of the grid.
gap: 0 1rem;	Space between grid or flex items without extra margins.
border-bottom: 1px solid var(--line);	A bottom border used as a separator line.
content: counter(step);	The text or empty string for a pseudo-element.
border-radius: 50%;	Turns a square into a circle.
place-items: center;	Centres items horizontally and vertically in a grid.
font-weight: 800;	Thickness of the text.

Check your work

- Numbers generated, list still an ol
- Headings inside li are h3
- Circle stays aligned with the heading
- Readable width

Exercises

1. Add images to steps.
2. Add a 'mark as done' checkbox per step with :has() styling.
3. Add schema.org HowTo microdata.

Theme data for this project

Field	Value
Business	Cedar Furniture
Tagline	Solid wood furniture made to order
City	Damietta
Owner	Tarek Lotfy
Brand colour	#78350f
Accent colour	#fef3c7
Offers	Oak dining table (9500 EGP); Bookshelf (4200 EGP); Bedside table (1500 EGP); Coffee table (2800 EGP)

Project 1088: Step-by-step how-to page for Byte Repair

Theme: Byte Repair (Nasr City) | Level 2 | Files: index.html, styles.css

Brief

Write a tutorial page with a 'you will need' box and numbered steps where each number is a large circle generated by CSS counters inside a grid row.

Learning goals

- Use headings inside list items
- Generate step numbers with counters
- Use a two-column grid per list item with the ::before in the first column

Elements and CSS used

HTML elements	CSS features
article, h1, p, section, h2, ul, ol, li, h3	counter-reset/increment, grid-template-columns: 3rem 1fr, grid-row: 1 / 3, grid-column: 2, border-radius: 50%

Build guide

1. Write the article with lead and 'You will need' section.
2. Write the ol; each li has an h3 and a p.
3. Remove list numbers and reset a counter.
4. Make each li a grid of two columns.
5. Put the counter in ::before spanning two rows.
6. Place h3 and p in column two.

Project 1088: index.html

```
<!DOCTYPE html>

Project 1090: Step-by-step how-to page for Alexandria Sailing School

Theme: Alexandria Sailing School (Alexandria) | Level 2 | Files: index.html, styles.css

Brief

Write a tutorial page with a 'you will need' box and numbered steps where each number is a large circle generated by CSS counters inside a grid row.

Learning goals

- Use headings inside list items
- Generate step numbers with counters
- Use a two-column grid per list item with the ::before in the first column

Elements and CSS used

HTML elements	CSS features
article, h1, p, section, h2, ul, ol, li, h3	counter-reset/increment, grid-template-columns: 3rem 1fr, grid-row: 1 / 3, grid-column: 2, border-radius: 50%

Build guide

1. Write the article with lead and 'You will need' section.
2. Write the ol; each li has an h3 and a p.
3. Remove list numbers and reset a counter.
4. Make each li a grid of two columns.
5. Put the counter in ::before spanning two rows.

6. Place h3 and p in column two.

Project 1090: index.html

```
<!DOCTYPE html>

Project 1091: Step-by-step how-to page for Habiba Handmade Jewellery

Theme: Habiba Handmade Jewellery (Aswan) | Level 2 | Files: index.html, styles.css

Brief

Write a tutorial page with a 'you will need' box and numbered steps where each number is a large circle generated by CSS counters inside a grid row.

Learning goals

- Use headings inside list items
- Generate step numbers with counters
- Use a two-column grid per list item with the ::before in the first column

Elements and CSS used

HTML elements	CSS features
article, h1, p, section, h2, ul, ol, li, h3	counter-reset/increment, grid-template-columns: 3rem 1fr, grid-row: 1 / 3, grid-column: 2, border-radius: 50%

Build guide

1. Write the article with lead and 'You will need' section.
2. Write the ol; each li has an h3 and a p.
3. Remove list numbers and reset a counter.
4. Make each li a grid of two columns.
5. Put the counter in ::before spanning two rows.

6. Place h3 and p in column two.

Project 1091 explained line by line

The important lines of index.html

Line	What it does
<!DOCTYPE html>	Declares modern HTML so the browser renders in standards mode.
<html lang="en">	Root element; lang tells screen readers and search engines the page language.
<meta charset="utf-8">	Character encoding: makes Arabic, accents and symbols display correctly.
<meta name="viewport" content="width=device-width, initial-scale=1">	Makes the page use the real device width on phones.
<title>How we make Lotus pendant - Habiba Handmade Jewellery</title>	Text shown in the browser tab and search results.
<link rel="stylesheet" href="styles.css">	Loads the external CSS file styles.css.
<main>	The unique content of this page; exactly one per page.
<article class="howto">	A self-contained piece: card, post, product.
How we make Lotus pendant	The main heading; only one per page.
<p class="lead">Sterling silver. Here is the process, step by step,...	A paragraph of text.
<section class="need">	A thematic group of content, normally with its own heading.
You will need	Second-level heading for a section.
	Unordered (bulleted) list.
Time: about 2 hours	One list item.

Line	What it does
<ol class="steps">	Ordered (numbered) list; the order matters.
<h3>Prepare</h3><p>Gather everything and read the whole process...	Third-level heading, inside an h2 section.

The important declarations of styles.css

Declaration	What it does
*, *::before, *::after {	Generated content inserted before the element's content (decorations, numbers, lines).
box-sizing: border-box;	Width and height include padding and border, which makes sizing predictable.
:root {	Custom properties (variables) defined on the root so every element can use them.
--brand: #a16207;	The brand colour variable; change it once and every use follows.
margin: 0;	Space outside the element.
font-family: system-ui, Arial, sans-serif;	The typeface stack: preferred font first, fallbacks after.
line-height: 1.6;	Space between lines; 1.5 to 1.7 is comfortable for body text.
color: var(--ink);	Text colour.
max-width: 44rem;	Limits how wide the element can grow, keeping lines readable.
padding: 0 1rem;	Space inside the element between its border and content.
font-size: 1.2rem;	Size of the text.
background: var(--accent);	Background colour or image.

Declaration	What it does
border-radius: 12px;	Rounds the corners.
text-transform: uppercase;	Displays text in capitals without changing the HTML.
letter-spacing: .05em;	Adds space between letters; useful for small capitals.
list-style: none;	Removes bullets or numbers from a list.
counter-reset: step;	Starts a CSS counter.
counter-increment: step;	Adds one to the counter for each matching element.
display: grid;	Turns the element into a grid container.
grid-template-columns: 3rem 1fr;	Defines the columns of the grid.
gap: 0 1rem;	Space between grid or flex items without extra margins.
border-bottom: 1px solid var(--line);	A bottom border used as a separator line.
content: counter(step);	The text or empty string for a pseudo-element.
border-radius: 50%;	Turns a square into a circle.
place-items: center;	Centres items horizontally and vertically in a grid.
font-weight: 800;	Thickness of the text.

Check your work

- Numbers generated, list still an ol
- Headings inside li are h3
- Circle stays aligned with the heading
- Readable width

Exercises

1. Add images to steps.
2. Add a 'mark as done' checkbox per step with :has() styling.
3. Add schema.org HowTo microdata.

Theme data for this project

Field	Value
Business	Habiba Handmade Jewellery
Tagline	Silver and brass pieces inspired by Nubia
City	Aswan
Owner	Habiba Saleh
Brand colour	#a16207
Accent colour	#fefce8
Offers	Lotus pendant (650 EGP); Brass cuff (420 EGP); Bead earrings (180 EGP); Ankh ring (300 EGP)

Project 1092: Step-by-step how-to page for Fayoum Pottery Studio

Theme: Fayoum Pottery Studio (Tunis Village) | Level 2 | Files: index.html, styles.css

Brief

Write a tutorial page with a 'you will need' box and numbered steps where each number is a large circle generated by CSS counters inside a grid row.

Learning goals

- Use headings inside list items
- Generate step numbers with counters
- Use a two-column grid per list item with the ::before in the first column

Elements and CSS used

HTML elements	CSS features
article, h1, p, section, h2, ul, ol, li, h3	counter-reset/increment, grid-template-columns: 3rem 1fr, grid-row: 1 / 3, grid-column: 2, border-radius: 50%

Build guide

1. Write the article with lead and 'You will need' section.
2. Write the ol; each li has an h3 and a p.
3. Remove list numbers and reset a counter.
4. Make each li a grid of two columns.
5. Put the counter in ::before spanning two rows.

6. Place h3 and p in column two.

Project 1094: Step-by-step how-to page for Suez Auto Service

Theme: Suez Auto Service (Suez) | Level 2 | Files: index.html, styles.css

Brief

Write a tutorial page with a 'you will need' box and numbered steps where each number is a large circle generated by CSS counters inside a grid row.

Learning goals

- Use headings inside list items
- Generate step numbers with counters
- Use a two-column grid per list item with the ::before in the first column

Elements and CSS used

HTML elements	CSS features
article, h1, p, section, h2, ul, ol, li, h3	counter-reset/increment, grid-template-columns: 3rem 1fr, grid-row: 1 / 3, grid-column: 2, border-radius: 50%

Build guide

1. Write the article with lead and 'You will need' section.
2. Write the ol; each li has an h3 and a p.
3. Remove list numbers and reset a counter.
4. Make each li a grid of two columns.
5. Put the counter in ::before spanning two rows.

6. Place h3 and p in column two.

Project 1094: index.html

Project 1094 explained line by line

The important lines of index.html

Line	What it does
<!DOCTYPE html>	Declares modern HTML so the browser renders in standards mode.
<html lang="en">	Root element; lang tells screen readers and search engines the page language.
<meta charset="utf-8">	Character encoding: makes Arabic, accents and symbols display correctly.
<meta name="viewport" content="width=device-width, initial-scale=1">	Makes the page use the real device width on phones.
<title>How we make Oil change - Suez Auto Service</title>	Text shown in the browser tab and search results.
<link rel="stylesheet" href="styles.css">	Loads the external CSS file styles.css.
<main>	The unique content of this page; exactly one per page.
<article class="howto">	A self-contained piece: card, post, product.
How we make Oil change	The main heading; only one per page.
<p class="lead">Filter included. Here is the process, step by step,...	A paragraph of text.
<section class="need">	A thematic group of content, normally with its own heading.
You will need	Second-level heading for a section.
	Unordered (bulleted) list.
Time: about 2 hours	One list item.

Line	What it does
<ol class="steps">	Ordered (numbered) list; the order matters.
<h3>Prepare</h3><p>Gather everything and read the whole process...	Third-level heading, inside an h2 section.

The important declarations of styles.css

Declaration	What it does
*, *::before, *::after {	Generated content inserted before the element's content (decorations, numbers, lines).
box-sizing: border-box;	Width and height include padding and border, which makes sizing predictable.
:root {	Custom properties (variables) defined on the root so every element can use them.
--brand: #374151;	The brand colour variable; change it once and every use follows.
margin: 0;	Space outside the element.
font-family: system-ui, Arial, sans-serif;	The typeface stack: preferred font first, fallbacks after.
line-height: 1.6;	Space between lines; 1.5 to 1.7 is comfortable for body text.
color: var(--ink);	Text colour.
max-width: 44rem;	Limits how wide the element can grow, keeping lines readable.
padding: 0 1rem;	Space inside the element between its border and content.
font-size: 1.2rem;	Size of the text.
background: var(--accent);	Background colour or image.

Declaration	What it does
border-radius: 12px;	Rounds the corners.
text-transform: uppercase;	Displays text in capitals without changing the HTML.
letter-spacing: .05em;	Adds space between letters; useful for small capitals.
list-style: none;	Removes bullets or numbers from a list.
counter-reset: step;	Starts a CSS counter.
counter-increment: step;	Adds one to the counter for each matching element.
display: grid;	Turns the element into a grid container.
grid-template-columns: 3rem 1fr;	Defines the columns of the grid.
gap: 0 1rem;	Space between grid or flex items without extra margins.
border-bottom: 1px solid var(--line);	A bottom border used as a separator line.
content: counter(step);	The text or empty string for a pseudo-element.
border-radius: 50%;	Turns a square into a circle.
place-items: center;	Centres items horizontally and vertically in a grid.
font-weight: 800;	Thickness of the text.

Check your work

- Numbers generated, list still an ol
- Headings inside li are h3
- Circle stays aligned with the heading
- Readable width

Exercises

1. Add images to steps.
2. Add a 'mark as done' checkbox per step with :has() styling.
3. Add schema.org HowTo microdata.

Theme data for this project

Field	Value
Business	Suez Auto Service
Tagline	Honest car servicing and repairs
City	Suez
Owner	Khaled Nasser
Brand colour	#374151
Accent colour	#f9fafb
Offers	Oil change (600 EGP); Brake pads (1400 EGP); Air conditioning (900 EGP); Pre-purchase inspection (750 EGP)

Project 1095: Step-by-step how-to page for Luxor Music Academy

Theme: Luxor Music Academy (Luxor) | Level 2 | Files: index.html, styles.css

Brief

Write a tutorial page with a 'you will need' box and numbered steps where each number is a large circle generated by CSS counters inside a grid row.

Learning goals

- Use headings inside list items
- Generate step numbers with counters
- Use a two-column grid per list item with the ::before in the first column

Elements and CSS used

HTML elements	CSS features
article, h1, p, section, h2, ul, ol, li, h3	counter-reset/increment, grid-template-columns: 3rem 1fr, grid-row: 1 / 3, grid-column: 2, border-radius: 50%

Build guide

1. Write the article with lead and 'You will need' section.
2. Write the ol; each li has an h3 and a p.
3. Remove list numbers and reset a counter.
4. Make each li a grid of two columns.
5. Put the counter in ::before spanning two rows.

6. Place h3 and p in column two.

Project 1095: index.html

```

Project 1097: Step-by-step how-to page for Delta Kids Library

Theme: Delta Kids Library (Tanta) | Level 2 | Files: index.html, styles.css

Brief

Write a tutorial page with a 'you will need' box and numbered steps where each number is a large circle generated by CSS counters inside a grid row.

Learning goals

- Use headings inside list items
- Generate step numbers with counters
- Use a two-column grid per list item with the ::before in the first column

Elements and CSS used

HTML elements	CSS features
article, h1, p, section, h2, ul, ol, li, h3	counter-reset/increment, grid-template-columns: 3rem 1fr, grid-row: 1 / 3, grid-column: 2, border-radius: 50%

Build guide

1. Write the article with lead and 'You will need' section.
2. Write the ol; each li has an h3 and a p.
3. Remove list numbers and reset a counter.
4. Make each li a grid of two columns.
5. Put the counter in ::before spanning two rows.

6. Place h3 and p in column two.

Project 1097: index.html

box-sizing: border-box;	Width and height include padding and border, which makes sizing predictable.
:root {	Custom properties (variables) defined on the root so every element can use them.
--brand: #ea580c;	The brand colour variable; change it once and every use follows.
margin: 0;	Space outside the element.
font-family: system-ui, Arial, sans-serif;	The typeface stack: preferred font first, fallbacks after.
line-height: 1.6;	Space between lines; 1.5 to 1.7 is comfortable for body text.
color: var(--ink);	Text colour.
max-width: 44rem;	Limits how wide the element can grow, keeping lines readable.
padding: 0 1rem;	Space inside the element between its border and content.
font-size: 1.2rem;	Size of the text.
background: var(--accent);	Background colour or image.

Declaration	What it does
border-radius: 12px;	Rounds the corners.
text-transform: uppercase;	Displays text in capitals without changing the HTML.
letter-spacing: .05em;	Adds space between letters; useful for small capitals.
list-style: none;	Removes bullets or numbers from a list.
counter-reset: step;	Starts a CSS counter.
counter-increment: step;	Adds one to the counter for each matching element.
display: grid;	Turns the element into a grid container.
grid-template-columns: 3rem 1fr;	Defines the columns of the grid.
gap: 0 1rem;	Space between grid or flex items without extra margins.
border-bottom: 1px solid var(--line);	A bottom border used as a separator line.
content: counter(step);	The text or empty string for a pseudo-element.
border-radius: 50%;	Turns a square into a circle.
place-items: center;	Centres items horizontally and vertically in a grid.
font-weight: 800;	Thickness of the text.

Check your work

- Numbers generated, list still an ol
- Headings inside li are h3
- Circle stays aligned with the heading
- Readable width

Exercises

1. Add images to steps.
2. Add a 'mark as done' checkbox per step with :has() styling.
3. Add schema.org HowTo microdata.

Theme data for this project

Field	Value
Business	Delta Kids Library
Tagline	Stories, reading clubs and homework help
City	Tanta
Owner	Ghada Kamel
Brand colour	#ea580c
Accent colour	#fff7ed
Offers	Story hour (Free); Reading club (50 EGP per month); Homework help (Free); Summer challenge (Free)

Project 1098: Step-by-step how-to page for Nubian Guest House

Theme: Nubian Guest House (Aswan) | Level 2 | Files: index.html, styles.css

Brief

Write a tutorial page with a 'you will need' box and numbered steps where each number is a large circle generated by CSS counters inside a grid row.

Learning goals

- Use headings inside list items
- Generate step numbers with counters
- Use a two-column grid per list item with the ::before in the first column

Elements and CSS used

HTML elements	CSS features
article, h1, p, section, h2, ul, ol, li, h3	counter-reset/increment, grid-template-columns: 3rem 1fr, grid-row: 1 / 3, grid-column: 2, border-radius: 50%

Build guide

1. Write the article with lead and 'You will need' section.
2. Write the ol; each li has an h3 and a p.
3. Remove list numbers and reset a counter.
4. Make each li a grid of two columns.
5. Put the counter in ::before spanning two rows.

6. Place h3 and p in column two.

Project 1098: index.html

```
<!DOCTYPE html>
<html lang="en">

Project 1100: Step-by-step how-to page for Minya Coding Club

Theme: Minya Coding Club (Minya) | Level 2 | Files: index.html, styles.css

Brief

Write a tutorial page with a 'you will need' box and numbered steps where each number is a large circle generated by CSS counters inside a grid row.

Learning goals

- Use headings inside list items
- Generate step numbers with counters
- Use a two-column grid per list item with the ::before in the first column

Elements and CSS used

HTML elements	CSS features
article, h1, p, section, h2, ul, ol, li, h3	counter-reset/increment, grid-template-columns: 3rem 1fr, grid-row: 1 / 3, grid-column: 2, border-radius: 50%

Build guide

1. Write the article with lead and 'You will need' section.
2. Write the ol; each li has an h3 and a p.
3. Remove list numbers and reset a counter.
4. Make each li a grid of two columns.
5. Put the counter in ::before spanning two rows.

6. Place h3 and p in column two.

Project 1100: index.html

border-bottom: 1px solid var(--line);	A bottom border used as a separator line.
content: counter(step);	The text or empty string for a pseudo-element.
border-radius: 50%;	Turns a square into a circle.
place-items: center;	Centres items horizontally and vertically in a grid.
font-weight: 800;	Thickness of the text.

Check your work

- Numbers generated, list still an ol
- Headings inside li are h3
- Circle stays aligned with the heading
- Readable width

Exercises

1. Add images to steps.
2. Add a 'mark as done' checkbox per step with :has() styling.
3. Add schema.org HowTo microdata.

Theme data for this project

Field	Value
Business	Minya Coding Club
Tagline	Free weekend coding for teenagers
City	Minya
Owner	Youssef Hany
Brand colour	#2563eb
Accent colour	#eff6ff
Offers	HTML weekend (Free); CSS art (Free); Scratch games (Free); Hackathon (Free)

Project type: Complete one-page website

Level 3 | 25 projects, one per theme

Combine everything into a single-page site: skip link, sticky header with anchor navigation, hero, offers grid, about with details, contact form and footer.

Project 1101: Complete one-page website for Cairo Book Shop

Theme: Cairo Book Shop (Giza) | Level 3 | Files: index.html, styles.css

Brief

Combine everything into a single-page site: skip link, sticky header with anchor navigation, hero, offers grid, about with details, contact form and footer.

Learning goals

- Assemble a full page from components
- Use in-page anchor navigation with scroll-margin-top
- Provide a skip link

Elements and CSS used

HTML elements	CSS features
a.skip, header, nav, main, section, h1-h3, article, details, summary, form, label, input, textarea, button, footer	position: sticky, z-index, scroll-margin-top, grid auto-fit, clamp(), focus styles for skip link

Build guide

1. Write the skeleton with four sections that have ids.
2. Add the sticky header with links to those ids.
3. Add a skip link as the first element in body.
4. Style the hero, grid, about and form.
5. Add scroll-margin-top to h2 so anchors are not hidden by the header.

6. Validate the whole page and test keyboard navigation.

<button>Send</button>	A clickable button; inside a form it submits by default.

Line	What it does
<footer class="site-footer"><p>© 2026 Cairo Book Shop ·...	Footer of the page or of a section.

The important declarations of styles.css

Declaration	What it does
*, *::before, *::after {	Generated content inserted before the element's content (decorations, numbers, lines).
box-sizing: border-box;	Width and height include padding and border, which makes sizing predictable.
:root {	Custom properties (variables) defined on the root so every element can use them.
--brand: #b90000;	The brand colour variable; change it once and every use follows.
margin: 0;	Space outside the element.
font-family: system-ui, Arial, sans-serif;	The typeface stack: preferred font first, fallbacks after.
line-height: 1.6;	Space between lines; 1.5 to 1.7 is comfortable for body text.
color: var(--ink);	Text colour.
position: absolute;	Removes the element from flow and positions it relative to the nearest positioned ancestor.
background: #fff;	Background colour or image.
padding: .5rem;	Space inside the element between its border and content.
z-index: 100;	Stacking order for positioned elements; higher is on top.

Declaration	What it does
position: sticky;	Scrolls normally until it reaches the given offset, then sticks.
display: flex;	Turns the element into a flex container (one-dimensional layout).
flex-wrap: wrap;	Allows flex items to move to a new line when they do not fit.
justify-content: space-between;	Spreads items so the first touches the start and the last the end.
align-items: center;	Centres items on the cross axis.
gap: .5rem 1rem;	Space between grid or flex items without extra margins.
border-bottom: 1px solid var(--line);	A bottom border used as a separator line.
font-weight: 800;	Thickness of the text.
text-decoration: none;	Removes the underline from links.
list-style: none;	Removes bullets or numbers from a list.
border-radius: 6px;	Rounds the corners.
.nav a:hover {	Applies while the pointer is over the element.
text-align: center;	Centres inline content such as text.
font-size: clamp(1.8rem, 5vw, 3rem);	A fluid value between a minimum and a maximum, based on the middle expression.
display: inline-block;	Flows in text but accepts width, height and vertical padding.
border-radius: 999px;	Fully rounded pill shape.
max-width: 60rem;	Limits how wide the element can grow, keeping lines readable.

Declaration	What it does
margin: 0 auto;	Centres a block horizontally: zero top/bottom, automatic left/right.
display: grid;	Turns the element into a grid container.
grid-template-columns: repeat(auto-fit, minmax(13rem, 1fr));	Defines the columns of the grid.
border-radius: 12px;	The line around the element: width, style and colour.
} summary { cursor: pointer;	Shows the hand cursor to indicate something clickable.
border: 1px solid #bbb;	Changes the visual order of a flex item without changing the source.
font: inherit;	Makes form controls use the page font instead of the browser default.
border: 0;	Removes the default border (for example on an iframe or button).
border-top: 1px solid var(--line);	A top border used as an accent or separator.
scroll-margin-top: 4rem;	Leaves room above an anchor target so a sticky header does not cover it.

Check your work

- Skip link appears on first Tab
- Anchor links land below the sticky header
- One h1
- Form fully labelled
- Passes the W3C validator

Exercises

1. Add smooth scrolling with scroll-behavior: smooth (respecting reduced motion).
2. Add an Arabic RTL version.
3. Split into multiple pages with a shared stylesheet.

Theme data for this project

Field	Value
Business	Cairo Book Shop
Tagline	PDF and printed books about web development
City	Giza
Owner	Mohamed Khattab
Brand colour	#b90000
Accent colour	#f4f1ea
Offers	Learn HTML (120 EGP); CSS in Practice (150 EGP); JavaScript Basics (180 EGP); Web Accessibility (95 EGP)

Project 1102: Complete one-page website for Nile Bakery

Theme: Nile Bakery (Cairo) | Level 3 | Files: index.html, styles.css

Brief

Combine everything into a single-page site: skip link, sticky header with anchor navigation, hero, offers grid, about with details, contact form and footer.

Learning goals

- Assemble a full page from components
- Use in-page anchor navigation with scroll-margin-top
- Provide a skip link

Elements and CSS used

HTML elements	CSS features
a.skip, header, nav, main, section, h1-h3, article, details, summary, form, label, input, textarea, button, footer	position: sticky, z-index, scroll-margin-top, grid auto-fit, clamp(), focus styles for skip link

Build guide

1. Write the skeleton with four sections that have ids.
2. Add the sticky header with links to those ids.
3. Add a skip link as the first element in body.
4. Style the hero, grid, about and form.
5. Add scroll-margin-top to h2 so anchors are not hidden by the header.

6. Validate the whole page and test keyboard navigation.

Project 1102: index.html

The important declarations of styles.css

Declaration	What it does
*, *::before, *::after {	Generated content inserted before the element's content (decorations, numbers, lines).
box-sizing: border-box;	Width and height include padding and border, which makes sizing predictable.
:root {	Custom properties (variables) defined on the root so every element can use them.
--brand: #0f766e;	The brand colour variable; change it once and every use follows.
margin: 0;	Space outside the element.
font-family: system-ui, Arial, sans-serif;	The typeface stack: preferred font first, fallbacks after.
line-height: 1.6;	Space between lines; 1.5 to 1.7 is comfortable for body text.
color: var(--ink);	Text colour.
position: absolute;	Removes the element from flow and positions it relative to the nearest positioned ancestor.
background: #fff;	Background colour or image.
padding: .5rem;	Space inside the element between its border and content.
z-index: 100;	Stacking order for positioned elements; higher is on top.

Declaration	What it does
position: sticky;	Scrolls normally until it reaches the given offset, then sticks.
display: flex;	Turns the element into a flex container (one-dimensional layout).
flex-wrap: wrap;	Allows flex items to move to a new line when they do not fit.
justify-content: space-between;	Spreads items so the first touches the start and the last the end.
align-items: center;	Centres items on the cross axis.
gap: .5rem 1rem;	Space between grid or flex items without extra margins.
border-bottom: 1px solid var(--line);	A bottom border used as a separator line.
font-weight: 800;	Thickness of the text.
text-decoration: none;	Removes the underline from links.
list-style: none;	Removes bullets or numbers from a list.
border-radius: 6px;	Rounds the corners.
.nav a:hover {	Applies while the pointer is over the element.
text-align: center;	Centres inline content such as text.
font-size: clamp(1.8rem, 5vw, 3rem);	A fluid value between a minimum and a maximum, based on the middle expression.
display: inline-block;	Flows in text but accepts width, height and vertical padding.
border-radius: 999px;	Fully rounded pill shape.
max-width: 60rem;	Limits how wide the element can grow, keeping lines readable.

Declaration	What it does
margin: 0 auto;	Centres a block horizontally: zero top/bottom, automatic left/right.
display: grid;	Turns the element into a grid container.
grid-template-columns: repeat(auto-fit, minmax(13rem, 1fr));	Defines the columns of the grid.
border-radius: 12px;	The line around the element: width, style and colour.
} summary { cursor: pointer;	Shows the hand cursor to indicate something clickable.
border: 1px solid #bbb;	Changes the visual order of a flex item without changing the source.
font: inherit;	Makes form controls use the page font instead of the browser default.
border: 0;	Removes the default border (for example on an iframe or button).
border-top: 1px solid var(--line);	A top border used as an accent or separator.
scroll-margin-top: 4rem;	Leaves room above an anchor target so a sticky header does not cover it.

Check your work

- Skip link appears on first Tab
- Anchor links land below the sticky header
- One h1
- Form fully labelled
- Passes the W3C validator

Exercises

1. Add smooth scrolling with scroll-behavior: smooth (respecting reduced motion).
2. Add an Arabic RTL version.
3. Split into multiple pages with a shared stylesheet.

Theme data for this project

Field	Value
Business	Pyramid Fitness
Tagline	Train smarter, feel stronger
City	6th of October
Owner	Omar Farouk
Brand colour	#0f766e
Accent colour	#ecfdf5
Offers	Morning yoga (100 EGP); Strength circuit (120 EGP); Spinning (110 EGP); Personal training (350 EGP)

Project 1104: Complete one-page website for Delta Dental Clinic

Theme: Delta Dental Clinic (Mansoura) | Level 3 | Files: index.html, styles.css

Brief

Combine everything into a single-page site: skip link, sticky header with anchor navigation, hero, offers grid, about with details, contact form and footer.

Learning goals

- Assemble a full page from components
- Use in-page anchor navigation with scroll-margin-top
- Provide a skip link

Elements and CSS used

HTML elements	CSS features
a.skip, header, nav, main, section, h1-h3, article, details, summary, form, label, input, textarea, button, footer	position: sticky, z-index, scroll-margin-top, grid auto-fit, clamp(), focus styles for skip link

Build guide

1. Write the skeleton with four sections that have ids.
2. Add the sticky header with links to those ids.
3. Add a skip link as the first element in body.
4. Style the hero, grid, about and form.
5. Add scroll-margin-top to h2 so anchors are not hidden by the header.

6. Validate the whole page and test keyboard navigation.

Project 1104: index.html

Project 1105 explained line by line

The important lines of index.html

Line	What it does
<!DOCTYPE html>	Declares modern HTML so the browser renders in standards mode.
<html lang="en">	Root element; lang tells screen readers and search engines the page language.
<meta charset="utf-8">	Character encoding: makes Arabic, accents and symbols display correctly.
<meta name="viewport" content="width=device-width, initial-scale=1">	Makes the page use the real device width on phones.
<title>Red Sea Travel - Complete site</title>	Text shown in the browser tab and search results.
<link rel="stylesheet" href="styles.css">	Loads the external CSS file styles.css.
<header class="site-header">	Introductory content: logo, title, navigation.
<nav aria-label="Main"><ul class="nav">	A block of navigation links; aria-label names it for screen readers.
Tours About<...	A hyperlink; href gives the destination.
<main id="main">	The unique content of this page; exactly one per page.
<section class="hero">	A thematic group of content, normally with its own heading.
Discover Egypt from desert to reef	The main heading; only one per page.
Welcome to Red Sea Travel in Hurghada.	A paragraph of text.

Line	What it does
Explore	A link styled as a button; it navigates, so it is a link and not a <button>.
Our tours	Second-level heading for a section.
	Generic block container for grouping and layout.
<article class="card"><h3>Luxor day trip</h3><p>Karnak, Valley of t...	A self-contained piece: card, post, product.
<article class="card"><h3>Snorkelling</h3><p>Giftun island reefs.<//...	Third-level heading, inside an h2 section.
<details><summary>Opening hours</summary><p>Saturday to Thursday 10...	Disclosure widget that can be opened and closed.
<form action="/contact" method="post" class="form">	A form; action is where the data goes, method how it is sent.
<label for="n">Name</label><input id="n" name="name" required>	Text label for a control; for matches the control's id, or the label wraps the control.
<label for="e">Email</label><input id="e" name="email" type="email"...	Email field: validated automatically and shows the @ keyboard on phones.
<label for="m">Message</label><textarea id="m" name="message" rows=...	Multi-line text field.
<button>Send</button>	A clickable button; inside a form it submits by default.

Line	What it does
<footer class="site-footer"><p>© 2026 Red Sea Travel · ...	Footer of the page or of a section.

The important declarations of styles.css

Declaration	What it does
*, *::before, *::after {	Generated content inserted before the element's content (decorations, numbers, lines).
box-sizing: border-box;	Width and height include padding and border, which makes sizing predictable.
:root {	Custom properties (variables) defined on the root so every element can use them.
--brand: #0369a1;	The brand colour variable; change it once and every use follows.
margin: 0;	Space outside the element.
font-family: system-ui, Arial, sans-serif;	The typeface stack: preferred font first, fallbacks after.
line-height: 1.6;	Space between lines; 1.5 to 1.7 is comfortable for body text.
color: var(--ink);	Text colour.
position: absolute;	Removes the element from flow and positions it relative to the nearest positioned ancestor.
background: #fff;	Background colour or image.
padding: .5rem;	Space inside the element between its border and content.
z-index: 100;	Stacking order for positioned elements; higher is on top.

Declaration	What it does
position: sticky;	Scrolls normally until it reaches the given offset, then sticks.
display: flex;	Turns the element into a flex container (one-dimensional layout).
flex-wrap: wrap;	Allows flex items to move to a new line when they do not fit.
justify-content: space-between;	Spreads items so the first touches the start and the last the end.
align-items: center;	Centres items on the cross axis.
gap: .5rem 1rem;	Space between grid or flex items without extra margins.
border-bottom: 1px solid var(--line);	A bottom border used as a separator line.
font-weight: 800;	Thickness of the text.
text-decoration: none;	Removes the underline from links.
list-style: none;	Removes bullets or numbers from a list.
border-radius: 6px;	Rounds the corners.
.nav a:hover {	Applies while the pointer is over the element.
text-align: center;	Centres inline content such as text.
font-size: clamp(1.8rem, 5vw, 3rem);	A fluid value between a minimum and a maximum, based on the middle expression.
display: inline-block;	Flows in text but accepts width, height and vertical padding.
border-radius: 999px;	Fully rounded pill shape.
max-width: 60rem;	Limits how wide the element can grow, keeping lines readable.

Declaration	What it does
margin: 0 auto;	Centres a block horizontally: zero top/bottom, automatic left/right.
display: grid;	Turns the element into a grid container.
grid-template-columns: repeat(auto-fit, minmax(13rem, 1fr));	Defines the columns of the grid.
border-radius: 12px;	The line around the element: width, style and colour.
} summary { cursor: pointer;	Shows the hand cursor to indicate something clickable.
border: 1px solid #bbb;	Changes the visual order of a flex item without changing the source.
font: inherit;	Makes form controls use the page font instead of the browser default.
border: 0;	Removes the default border (for example on an iframe or button).
border-top: 1px solid var(--line);	A top border used as an accent or separator.
scroll-margin-top: 4rem;	Leaves room above an anchor target so a sticky header does not cover it.

Check your work

- Skip link appears on first Tab
- Anchor links land below the sticky header
- One h1
- Form fully labelled
- Passes the W3C validator

Exercises

1. Add smooth scrolling with scroll-behavior: smooth (respecting reduced motion).
2. Add an Arabic RTL version.
3. Split into multiple pages with a shared stylesheet.

Theme data for this project

Field	Value
Business	Red Sea Travel
Tagline	Discover Egypt from desert to reef
City	Hurghada
Owner	Laila Mansour
Brand colour	#0369a1

Project 1106: Complete one-page website for Lotus Language School

Theme: Lotus Language School (Alexandria) | Level 3 | Files: index.html, styles.css

Brief

Combine everything into a single-page site: skip link, sticky header with anchor navigation, hero, offers grid, about with details, contact form and footer.

Learning goals

- Assemble a full page from components
- Use in-page anchor navigation with scroll-margin-top
- Provide a skip link

Elements and CSS used

HTML elements	CSS features
a.skip, header, nav, main, section, h1-h3, article, details, summary, form, label, input, textarea, button, footer	position: sticky, z-index, scroll-margin-top, grid auto-fit, clamp(), focus styles for skip link

Build guide

1. Write the skeleton with four sections that have ids.
2. Add the sticky header with links to those ids.
3. Add a skip link as the first element in body.
4. Style the hero, grid, about and form.
5. Add scroll-margin-top to h2 so anchors are not hidden by the header.

6. Validate the whole page and test keyboard navigation.

Project 1107 explained line by line

The important lines of index.html

Line	What it does
<!DOCTYPE html>	Declares modern HTML so the browser renders in standards mode.
<html lang="en">	Root element; lang tells screen readers and search engines the page language.
<meta charset="utf-8">	Character encoding: makes Arabic, accents and symbols display correctly.
<meta name="viewport" content="width=device-width, initial-scale=1">	Makes the page use the real device width on phones.
<title>Green Leaf Cafe - Complete site</title>	Text shown in the browser tab and search results.
<link rel="stylesheet" href="styles.css">	Loads the external CSS file styles.css.
<header class="site-header">	Introductory content: logo, title, navigation.
<nav aria-label="Main"><ul class="nav">	A block of navigation links; aria-label names it for screen readers.
Drinks About...	A hyperlink; href gives the destination.
<main id="main">	The unique content of this page; exactly one per page.
<section class="hero">	A thematic group of content, normally with its own heading.
Specialty coffee and quiet corners	The main heading; only one per page.
Welcome to Green Leaf Cafe in Zamalek.	A paragraph of text.

Line	What it does
Explore	A link styled as a button; it navigates, so it is a link and not a <button>.
Our drinks	Second-level heading for a section.
	Generic block container for grouping and layout.
<article class="card"> Flat white Double shot, silky milk...	A self-contained piece: card, post, product.
<article class="card"> Cold brew 18 hours steeped. <p ...	Third-level heading, inside an h2 section.
<details><summary>Opening hours</summary> Saturday to Thursday 10...	Disclosure widget that can be opened and closed.
<form action="/contact" method="post" class="form">	A form; action is where the data goes, method how it is sent.
<label for="n">Name</label><input id="n" name="name" required>	Text label for a control; for matches the control's id, or the label wraps the control.
<label for="e">Email</label><input id="e" name="email" type="email"...	Email field: validated automatically and shows the @ keyboard on phones.
<label for="m">Message</label><textarea id="m" name="message" rows=...	Multi-line text field.
<button>Send</button>	A clickable button; inside a form it submits by default.

Line	What it does
<footer class="site-footer"><p>© 2026 Green Leaf Cafe ·...	Footer of the page or of a section.

The important declarations of styles.css

Declaration	What it does
*, *::before, *::after {	Generated content inserted before the element's content (decorations, numbers, lines).
box-sizing: border-box;	Width and height include padding and border, which makes sizing predictable.
:root {	Custom properties (variables) defined on the root so every element can use them.
--brand: #166534;	The brand colour variable; change it once and every use follows.
margin: 0;	Space outside the element.
font-family: system-ui, Arial, sans-serif;	The typeface stack: preferred font first, fallbacks after.
line-height: 1.6;	Space between lines; 1.5 to 1.7 is comfortable for body text.
color: var(--ink);	Text colour.
position: absolute;	Removes the element from flow and positions it relative to the nearest positioned ancestor.
background: #fff;	Background colour or image.
padding: .5rem;	Space inside the element between its border and content.
z-index: 100;	Stacking order for positioned elements; higher is on top.

Declaration	What it does
position: sticky;	Scrolls normally until it reaches the given offset, then sticks.
display: flex;	Turns the element into a flex container (one-dimensional layout).
flex-wrap: wrap;	Allows flex items to move to a new line when they do not fit.
justify-content: space-between;	Spreads items so the first touches the start and the last the end.
align-items: center;	Centres items on the cross axis.
gap: .5rem 1rem;	Space between grid or flex items without extra margins.
border-bottom: 1px solid var(--line);	A bottom border used as a separator line.
font-weight: 800;	Thickness of the text.
text-decoration: none;	Removes the underline from links.
list-style: none;	Removes bullets or numbers from a list.
border-radius: 6px;	Rounds the corners.
.nav a:hover {	Applies while the pointer is over the element.
text-align: center;	Centres inline content such as text.
font-size: clamp(1.8rem, 5vw, 3rem);	A fluid value between a minimum and a maximum, based on the middle expression.
display: inline-block;	Flows in text but accepts width, height and vertical padding.
border-radius: 999px;	Fully rounded pill shape.
max-width: 60rem;	Limits how wide the element can grow, keeping lines readable.

Declaration	What it does
margin: 0 auto;	Centres a block horizontally: zero top/bottom, automatic left/right.
display: grid;	Turns the element into a grid container.
grid-template-columns: repeat(auto-fit, minmax(13rem, 1fr));	Defines the columns of the grid.
border-radius: 12px;	The line around the element: width, style and colour.
} summary { cursor: pointer;	Shows the hand cursor to indicate something clickable.
border: 1px solid #bbb;	Changes the visual order of a flex item without changing the source.
font: inherit;	Makes form controls use the page font instead of the browser default.
border: 0;	Removes the default border (for example on an iframe or button).
border-top: 1px solid var(--line);	A top border used as an accent or separator.
scroll-margin-top: 4rem;	Leaves room above an anchor target so a sticky header does not cover it.

Check your work

- Skip link appears on first Tab
- Anchor links land below the sticky header
- One h1
- Form fully labelled
- Passes the W3C validator

Exercises

1. Add smooth scrolling with scroll-behavior: smooth (respecting reduced motion).
2. Add an Arabic RTL version.
3. Split into multiple pages with a shared stylesheet.

Theme data for this project

Field	Value
Business	Green Leaf Cafe
Tagline	Specialty coffee and quiet corners
City	Zamalek
Owner	Karim Said
Brand colour	#166534
Accent colour	#f0fdf4
Offers	Flat white (55 EGP); Cold brew (60 EGP); Hibiscus iced tea (40 EGP); Cheesecake (75 EGP)

Project 1108: Complete one-page website for Sinai Trekking Club

Theme: Sinai Trekking Club (Saint Catherine) | Level 3 | Files: index.html, styles.css

Brief

Combine everything into a single-page site: skip link, sticky header with anchor navigation, hero, offers grid, about with details, contact form and footer.

Learning goals

- Assemble a full page from components
- Use in-page anchor navigation with scroll-margin-top
- Provide a skip link

Elements and CSS used

HTML elements	CSS features
a.skip, header, nav, main, section, h1-h3, article, details, summary, form, label, input, textarea, button, footer	position: sticky, z-index, scroll-margin-top, grid auto-fit, clamp(), focus styles for skip link

Build guide

1. Write the skeleton with four sections that have ids.
2. Add the sticky header with links to those ids.
3. Add a skip link as the first element in body.
4. Style the hero, grid, about and form.
5. Add scroll-margin-top to h2 so anchors are not hidden by the header.

6. Validate the whole page and test keyboard navigation.

Project 1108: index.html

Project 1109 explained line by line

The important lines of index.html

Line	What it does
<!DOCTYPE html>	Declares modern HTML so the browser renders in standards mode.
<html lang="en">	Root element; lang tells screen readers and search engines the page language.
<meta charset="utf-8">	Character encoding: makes Arabic, accents and symbols display correctly.
<meta name="viewport" content="width=device-width, initial-scale=1">	Makes the page use the real device width on phones.
<title>Horizon Photography - Complete site</title>	Text shown in the browser tab and search results.
<link rel="stylesheet" href="styles.css">	Loads the external CSS file styles.css.
<header class="site-header">	Introductory content: logo, title, navigation.
<nav aria-label="Main"><ul class="nav">	A block of navigation links; aria-label names it for screen readers.
Sessions <a href="#about">About<//...	A hyperlink; href gives the destination.
<main id="main">	The unique content of this page; exactly one per page.
<section class="hero">	A thematic group of content, normally with its own heading.
Portraits, weddings and product photography	The main heading; only one per page.
Welcome to Horizon Photography in Maadi.	A paragraph of text.

Line	What it does
Explore	A link styled as a button; it navigates, so it is a link and not a <button>.
Our sessions	Second-level heading for a section.
	Generic block container for grouping and layout.
<article class="card"><h3>Portrait session</h3><p>One hour, 20 edit...	A self-contained piece: card, post, product.
<article class="card"><h3>Wedding day</h3><p>Full coverage, two pho...	Third-level heading, inside an h2 section.
<details><summary>Opening hours</summary><p>Saturday to Thursday 10...	Disclosure widget that can be opened and closed.
<form action="/contact" method="post" class="form">	A form; action is where the data goes, method how it is sent.
<label for="n">Name</label><input id="n" name="name" required>	Text label for a control; for matches the control's id, or the label wraps the control.
<label for="e">Email</label><input id="e" name="email" type="email"...	Email field: validated automatically and shows the @ keyboard on phones.
<label for="m">Message</label><textarea id="m" name="message" rows=...	Multi-line text field.
<button>Send</button>	A clickable button; inside a form it submits by default.

Line	What it does
<footer class="site-footer"><p>© 2026 Horizon Photography &mid...	Footer of the page or of a section.

The important declarations of styles.css

Declaration	What it does
*, *::before, *::after {	Generated content inserted before the element's content (decorations, numbers, lines).
box-sizing: border-box;	Width and height include padding and border, which makes sizing predictable.
:root {	Custom properties (variables) defined on the root so every element can use them.
--brand: #111827;	The brand colour variable; change it once and every use follows.
margin: 0;	Space outside the element.
font-family: system-ui, Arial, sans-serif;	The typeface stack: preferred font first, fallbacks after.
line-height: 1.6;	Space between lines; 1.5 to 1.7 is comfortable for body text.
color: var(--ink);	Text colour.
position: absolute;	Removes the element from flow and positions it relative to the nearest positioned ancestor.
background: #fff;	Background colour or image.
padding: .5rem;	Space inside the element between its border and content.
z-index: 100;	Stacking order for positioned elements; higher is on top.

Declaration	What it does
position: sticky;	Scrolls normally until it reaches the given offset, then sticks.
display: flex;	Turns the element into a flex container (one-dimensional layout).
flex-wrap: wrap;	Allows flex items to move to a new line when they do not fit.
justify-content: space-between;	Spreads items so the first touches the start and the last the end.
align-items: center;	Centres items on the cross axis.
gap: .5rem 1rem;	Space between grid or flex items without extra margins.
border-bottom: 1px solid var(--line);	A bottom border used as a separator line.
font-weight: 800;	Thickness of the text.
text-decoration: none;	Removes the underline from links.
list-style: none;	Removes bullets or numbers from a list.
border-radius: 6px;	Rounds the corners.
.nav a:hover {	Applies while the pointer is over the element.
text-align: center;	Centres inline content such as text.
font-size: clamp(1.8rem, 5vw, 3rem);	A fluid value between a minimum and a maximum, based on the middle expression.
display: inline-block;	Flows in text but accepts width, height and vertical padding.
border-radius: 999px;	Fully rounded pill shape.
max-width: 60rem;	Limits how wide the element can grow, keeping lines readable.

Declaration	What it does
margin: 0 auto;	Centres a block horizontally: zero top/bottom, automatic left/right.
display: grid;	Turns the element into a grid container.
grid-template-columns: repeat(auto-fit, minmax(13rem, 1fr));	Defines the columns of the grid.
border-radius: 12px;	The line around the element: width, style and colour.
} summary { cursor: pointer;	Shows the hand cursor to indicate something clickable.
border: 1px solid #bbb;	Changes the visual order of a flex item without changing the source.
font: inherit;	Makes form controls use the page font instead of the browser default.
border: 0;	Removes the default border (for example on an iframe or button).
border-top: 1px solid var(--line);	A top border used as an accent or separator.
scroll-margin-top: 4rem;	Leaves room above an anchor target so a sticky header does not cover it.

Check your work

- Skip link appears on first Tab
- Anchor links land below the sticky header
- One h1
- Form fully labelled
- Passes the W3C validator

Exercises

1. Add smooth scrolling with scroll-behavior: smooth (respecting reduced motion).
2. Add an Arabic RTL version.
3. Split into multiple pages with a shared stylesheet.

Theme data for this project

Field	Value
Business	Horizon Photography
Tagline	Portraits, weddings and product photography
City	Maadi
Owner	Adham Nabil
Brand colour	#111827
Accent colour	#f3f4f6
Offers	Portrait session (1200 EGP); Wedding day (15000 EGP); Product shoot (900 EGP); Family session (1500 EGP)

Project 1110: Complete one-page website for Papyrus Stationery

Theme: Papyrus Stationery (Heliopolis) | Level 3 | Files: index.html, styles.css

Brief

Combine everything into a single-page site: skip link, sticky header with anchor navigation, hero, offers grid, about with details, contact form and footer.

Learning goals

- Assemble a full page from components
- Use in-page anchor navigation with scroll-margin-top
- Provide a skip link

Elements and CSS used

HTML elements	CSS features
a.skip, header, nav, main, section, h1-h3, article, details, summary, form, label, input, textarea, button, footer	position: sticky, z-index, scroll-margin-top, grid auto-fit, clamp(), focus styles for skip link

Build guide

1. Write the skeleton with four sections that have ids.
2. Add the sticky header with links to those ids.
3. Add a skip link as the first element in body.
4. Style the hero, grid, about and form.
5. Add scroll-margin-top to h2 so anchors are not hidden by the header.

6. Validate the whole page and test keyboard navigation.

Project 1110: index.html

Project 1111 explained line by line

The important lines of index.html

Line	What it does
<!DOCTYPE html>	Declares modern HTML so the browser renders in standards mode.
<html lang="en">	Root element; lang tells screen readers and search engines the page language.
<meta charset="utf-8">	Character encoding: makes Arabic, accents and symbols display correctly.
<meta name="viewport" content="width=device-width, initial-scale=1">	Makes the page use the real device width on phones.
<title>Oasis Plant Nursery - Complete site</title>	Text shown in the browser tab and search results.
<link rel="stylesheet" href="styles.css">	Loads the external CSS file styles.css.
<header class="site-header">	Introductory content: logo, title, navigation.
<nav aria-label="Main"><ul class="nav">	A block of navigation links; aria-label names it for screen readers.
Plants About...	A hyperlink; href gives the destination.
<main id="main">	The unique content of this page; exactly one per page.
<section class="hero">	A thematic group of content, normally with its own heading.
Indoor plants and gardening advice	The main heading; only one per page.
Welcome to Oasis Plant Nursery in Sheikh Zayed.	A paragraph of text.

Line	What it does
Explore	A link styled as a button; it navigates, so it is a link and not a <button>.
Our plants	Second-level heading for a section.
	Generic block container for grouping and layout.
<article class="card"> Monstera Large leaves, easy care.<...	A self-contained piece: card, post, product.
<article class="card"> Snake plant Survives anything. ...	Third-level heading, inside an h2 section.
<details><summary>Opening hours</summary> Saturday to Thursday 10...	Disclosure widget that can be opened and closed.
<form action="/contact" method="post" class="form">	A form; action is where the data goes, method how it is sent.
<label for="n">Name</label><input id="n" name="name" required>	Text label for a control; for matches the control's id, or the label wraps the control.
<label for="e">Email</label><input id="e" name="email" type="email"...	Email field: validated automatically and shows the @ keyboard on phones.
<label for="m">Message</label><textarea id="m" name="message" rows=...	Multi-line text field.
<button>Send</button>	A clickable button; inside a form it submits by default.

Line	What it does
<footer class="site-footer"><p>© 2026 Oasis Plant Nursery &mid...	Footer of the page or of a section.

The important declarations of styles.css

Declaration	What it does
*, *::before, *::after {	Generated content inserted before the element's content (decorations, numbers, lines).
box-sizing: border-box;	Width and height include padding and border, which makes sizing predictable.
:root {	Custom properties (variables) defined on the root so every element can use them.
--brand: #15803d;	The brand colour variable; change it once and every use follows.
margin: 0;	Space outside the element.
font-family: system-ui, Arial, sans-serif;	The typeface stack: preferred font first, fallbacks after.
line-height: 1.6;	Space between lines; 1.5 to 1.7 is comfortable for body text.
color: var(--ink);	Text colour.
position: absolute;	Removes the element from flow and positions it relative to the nearest positioned ancestor.
background: #fff;	Background colour or image.
padding: .5rem;	Space inside the element between its border and content.
z-index: 100;	Stacking order for positioned elements; higher is on top.

Declaration	What it does
position: sticky;	Scrolls normally until it reaches the given offset, then sticks.
display: flex;	Turns the element into a flex container (one-dimensional layout).
flex-wrap: wrap;	Allows flex items to move to a new line when they do not fit.
justify-content: space-between;	Spreads items so the first touches the start and the last the end.
align-items: center;	Centres items on the cross axis.
gap: .5rem 1rem;	Space between grid or flex items without extra margins.
border-bottom: 1px solid var(--line);	A bottom border used as a separator line.
font-weight: 800;	Thickness of the text.
text-decoration: none;	Removes the underline from links.
list-style: none;	Removes bullets or numbers from a list.
border-radius: 6px;	Rounds the corners.
.nav a:hover {	Applies while the pointer is over the element.
text-align: center;	Centres inline content such as text.
font-size: clamp(1.8rem, 5vw, 3rem);	A fluid value between a minimum and a maximum, based on the middle expression.
display: inline-block;	Flows in text but accepts width, height and vertical padding.
border-radius: 999px;	Fully rounded pill shape.
max-width: 60rem;	Limits how wide the element can grow, keeping lines readable.

Declaration	What it does
margin: 0 auto;	Centres a block horizontally: zero top/bottom, automatic left/right.
display: grid;	Turns the element into a grid container.
grid-template-columns: repeat(auto-fit, minmax(13rem, 1fr));	Defines the columns of the grid.
border-radius: 12px;	The line around the element: width, style and colour.
} summary { cursor: pointer;	Shows the hand cursor to indicate something clickable.
border: 1px solid #bbb;	Changes the visual order of a flex item without changing the source.
font: inherit;	Makes form controls use the page font instead of the browser default.
border: 0;	Removes the default border (for example on an iframe or button).
border-top: 1px solid var(--line);	A top border used as an accent or separator.
scroll-margin-top: 4rem;	Leaves room above an anchor target so a sticky header does not cover it.

Check your work

- Skip link appears on first Tab
- Anchor links land below the sticky header
- One h1
- Form fully labelled
- Passes the W3C validator

Exercises

1. Add smooth scrolling with scroll-behavior: smooth (respecting reduced motion).
2. Add an Arabic RTL version.
3. Split into multiple pages with a shared stylesheet.

Theme data for this project

Field	Value
Business	Oasis Plant Nursery
Tagline	Indoor plants and gardening advice
City	Sheikh Zayed
Owner	Hossam Ali
Brand colour	#15803d
Accent colour	#f7fee7
Offers	Monstera (250 EGP); Snake plant (120 EGP); Basil pot (45 EGP); Olive tree (600 EGP)

Project 1112: Complete one-page website for Cedar Furniture

Theme: Cedar Furniture (Damietta) | Level 3 | Files: index.html, styles.css

Brief

Combine everything into a single-page site: skip link, sticky header with anchor navigation, hero, offers grid, about with details, contact form and footer.

Learning goals

- Assemble a full page from components
- Use in-page anchor navigation with scroll-margin-top
- Provide a skip link

Elements and CSS used

HTML elements	CSS features
a.skip, header, nav, main, section, h1-h3, article, details, summary, form, label, input, textarea, button, footer	position: sticky, z-index, scroll-margin-top, grid auto-fit, clamp(), focus styles for skip link

Build guide

1. Write the skeleton with four sections that have ids.
2. Add the sticky header with links to those ids.
3. Add a skip link as the first element in body.
4. Style the hero, grid, about and form.
5. Add scroll-margin-top to h2 so anchors are not hidden by the header.

6. Validate the whole page and test keyboard navigation.

Project 1112: index.html

```

The important lines of index.html

Line	What it does
<!DOCTYPE html>	Declares modern HTML so the browser renders in standards mode.
<html lang="en">	Root element; lang tells screen readers and search engines the page language.
<meta charset="utf-8">	Character encoding: makes Arabic, accents and symbols display correctly.
<meta name="viewport" content="width=device-width, initial-scale=1">	Makes the page use the real device width on phones.
<title>Byte Repair - Complete site</title>	Text shown in the browser tab and search results.
<link rel="stylesheet" href="styles.css">	Loads the external CSS file styles.css.
<header class="site-header">	Introductory content: logo, title, navigation.
<nav aria-label="Main"><ul class="nav">	A block of navigation links; aria-label names it for screen readers.
Repairs <a href="#about">About</a...	A hyperlink; href gives the destination.
<main id="main">	The unique content of this page; exactly one per page.
<section class="hero">	A thematic group of content, normally with its own heading.
Phone and laptop repairs while you wait	The main heading; only one per page.
Welcome to Byte Repair in Nasr City.	A paragraph of text.

Line	What it does
Explore	A link styled as a button; it navigates, so it is a link and not a <button>.
Our repairs	Second-level heading for a section.
	Generic block container for grouping and layout.
<article class="card"> Screen replacement Most phones, 1 ...	A self-contained piece: card, post, product.
<article class="card"> Battery swap Original cells. <p...	Third-level heading, inside an h2 section.
<details><summary>Opening hours</summary> Saturday to Thursday 10...	Disclosure widget that can be opened and closed.
<form action="/contact" method="post" class="form">	A form; action is where the data goes, method how it is sent.
<label for="n">Name</label><input id="n" name="name" required>	Text label for a control; for matches the control's id, or the label wraps the control.
<label for="e">Email</label><input id="e" name="email" type="email"...	Email field: validated automatically and shows the @ keyboard on phones.
<label for="m">Message</label><textarea id="m" name="message" rows=...	Multi-line text field.
<button>Send</button>	A clickable button; inside a form it submits by default.

Line	What it does
<footer class="site-footer"><p>© 2026 Byte Repair · <a ...	Footer of the page or of a section.

The important declarations of styles.css

Declaration	What it does
*, *::before, *::after {	Generated content inserted before the element's content (decorations, numbers, lines).
box-sizing: border-box;	Width and height include padding and border, which makes sizing predictable.
:root {	Custom properties (variables) defined on the root so every element can use them.
--brand: #0891b2;	The brand colour variable; change it once and every use follows.
margin: 0;	Space outside the element.
font-family: system-ui, Arial, sans-serif;	The typeface stack: preferred font first, fallbacks after.
line-height: 1.6;	Space between lines; 1.5 to 1.7 is comfortable for body text.
color: var(--ink);	Text colour.
position: absolute;	Removes the element from flow and positions it relative to the nearest positioned ancestor.
background: #fff;	Background colour or image.
padding: .5rem;	Space inside the element between its border and content.
z-index: 100;	Stacking order for positioned elements; higher is on top.

Declaration	What it does
position: sticky;	Scrolls normally until it reaches the given offset, then sticks.
display: flex;	Turns the element into a flex container (one-dimensional layout).
flex-wrap: wrap;	Allows flex items to move to a new line when they do not fit.
justify-content: space-between;	Spreads items so the first touches the start and the last the end.
align-items: center;	Centres items on the cross axis.
gap: .5rem 1rem;	Space between grid or flex items without extra margins.
border-bottom: 1px solid var(--line);	A bottom border used as a separator line.
font-weight: 800;	Thickness of the text.
text-decoration: none;	Removes the underline from links.
list-style: none;	Removes bullets or numbers from a list.
border-radius: 6px;	Rounds the corners.
.nav a:hover {	Applies while the pointer is over the element.
text-align: center;	Centres inline content such as text.
font-size: clamp(1.8rem, 5vw, 3rem);	A fluid value between a minimum and a maximum, based on the middle expression.
display: inline-block;	Flows in text but accepts width, height and vertical padding.
border-radius: 999px;	Fully rounded pill shape.
max-width: 60rem;	Limits how wide the element can grow, keeping lines readable.

Declaration	What it does
margin: 0 auto;	Centres a block horizontally: zero top/bottom, automatic left/right.
display: grid;	Turns the element into a grid container.
grid-template-columns: repeat(auto-fit, minmax(13rem, 1fr));	Defines the columns of the grid.
border-radius: 12px;	The line around the element: width, style and colour.
} summary { cursor: pointer;	Shows the hand cursor to indicate something clickable.
border: 1px solid #bbb;	Changes the visual order of a flex item without changing the source.
font: inherit;	Makes form controls use the page font instead of the browser default.
border: 0;	Removes the default border (for example on an iframe or button).
border-top: 1px solid var(--line);	A top border used as an accent or separator.
scroll-margin-top: 4rem;	Leaves room above an anchor target so a sticky header does not cover it.

Check your work

- Skip link appears on first Tab
- Anchor links land below the sticky header
- One h1
- Form fully labelled
- Passes the W3C validator

Exercises

1. Add smooth scrolling with scroll-behavior: smooth (respecting reduced motion).
2. Add an Arabic RTL version.
3. Split into multiple pages with a shared stylesheet.

Theme data for this project

Field	Value
Business	Byte Repair
Tagline	Phone and laptop repairs while you wait
City	Nasr City
Owner	Mostafa Gamal
Brand colour	#0891b2
Accent colour	#ecfeff
Offers	Screen replacement (From 800 EGP); Battery swap (From 500 EGP); Laptop cleaning (350 EGP); Data recovery (From 1200 EGP)

Project 1114: Complete one-page website for Sahara Pet Care

Theme: Sahara Pet Care (New Cairo) | Level 3 | Files: index.html, styles.css

Brief

Combine everything into a single-page site: skip link, sticky header with anchor navigation, hero, offers grid, about with details, contact form and footer.

Learning goals

- Assemble a full page from components
- Use in-page anchor navigation with scroll-margin-top
- Provide a skip link

Elements and CSS used

HTML elements	CSS features
a.skip, header, nav, main, section, h1-h3, article, details, summary, form, label, input, textarea, button, footer	position: sticky, z-index, scroll-margin-top, grid auto-fit, clamp(), focus styles for skip link

Build guide

1. Write the skeleton with four sections that have ids.
2. Add the sticky header with links to those ids.
3. Add a skip link as the first element in body.
4. Style the hero, grid, about and form.
5. Add scroll-margin-top to h2 so anchors are not hidden by the header.

6. Validate the whole page and test keyboard navigation.

Project 1114: index.html

The important declarations of styles.css

Declaration	What it does
*, *::before, *::after {	Generated content inserted before the element's content (decorations, numbers, lines).
box-sizing: border-box;	Width and height include padding and border, which makes sizing predictable.
:root {	Custom properties (variables) defined on the root so every element can use them.
--brand: #1e40af;	The brand colour variable; change it once and every use follows.
margin: 0;	Space outside the element.
font-family: system-ui, Arial, sans-serif;	The typeface stack: preferred font first, fallbacks after.
line-height: 1.6;	Space between lines; 1.5 to 1.7 is comfortable for body text.
color: var(--ink);	Text colour.
position: absolute;	Removes the element from flow and positions it relative to the nearest positioned ancestor.
background: #fff;	Background colour or image.
padding: .5rem;	Space inside the element between its border and content.
z-index: 100;	Stacking order for positioned elements; higher is on top.

Declaration	What it does
position: sticky;	Scrolls normally until it reaches the given offset, then sticks.
display: flex;	Turns the element into a flex container (one-dimensional layout).
flex-wrap: wrap;	Allows flex items to move to a new line when they do not fit.
justify-content: space-between;	Spreads items so the first touches the start and the last the end.
align-items: center;	Centres items on the cross axis.
gap: .5rem 1rem;	Space between grid or flex items without extra margins.
border-bottom: 1px solid var(--line);	A bottom border used as a separator line.
font-weight: 800;	Thickness of the text.
text-decoration: none;	Removes the underline from links.
list-style: none;	Removes bullets or numbers from a list.
border-radius: 6px;	Rounds the corners.
.nav a:hover {	Applies while the pointer is over the element.
text-align: center;	Centres inline content such as text.
font-size: clamp(1.8rem, 5vw, 3rem);	A fluid value between a minimum and a maximum, based on the middle expression.
display: inline-block;	Flows in text but accepts width, height and vertical padding.
border-radius: 999px;	Fully rounded pill shape.
max-width: 60rem;	Limits how wide the element can grow, keeping lines readable.

Declaration	What it does
margin: 0 auto;	Centres a block horizontally: zero top/bottom, automatic left/right.
display: grid;	Turns the element into a grid container.
grid-template-columns: repeat(auto-fit, minmax(13rem, 1fr));	Defines the columns of the grid.
border-radius: 12px;	The line around the element: width, style and colour.
} summary { cursor: pointer;	Shows the hand cursor to indicate something clickable.
border: 1px solid #bbb;	Changes the visual order of a flex item without changing the source.
font: inherit;	Makes form controls use the page font instead of the browser default.
border: 0;	Removes the default border (for example on an iframe or button).
border-top: 1px solid var(--line);	A top border used as an accent or separator.
scroll-margin-top: 4rem;	Leaves room above an anchor target so a sticky header does not cover it.

Check your work

- Skip link appears on first Tab
- Anchor links land below the sticky header
- One h1
- Form fully labelled
- Passes the W3C validator

Exercises

1. Add smooth scrolling with scroll-behavior: smooth (respecting reduced motion).
2. Add an Arabic RTL version.
3. Split into multiple pages with a shared stylesheet.

Theme data for this project

Field	Value
Business	Alexandria Sailing School
Tagline	Learn to sail on the Mediterranean
City	Alexandria
Owner	Amr Selim
Brand colour	#1e40af
Accent colour	#eff6ff
Offers	Taster session (500 EGP); Beginner course (2200 EGP); Racing clinic (1800 EGP); Private lesson (900 EGP)

Project 1116: Complete one-page website for Habiba Handmade Jewellery

Theme: Habiba Handmade Jewellery (Aswan) | Level 3 | Files: index.html, styles.css

Brief

Combine everything into a single-page site: skip link, sticky header with anchor navigation, hero, offers grid, about with details, contact form and footer.

Learning goals

- Assemble a full page from components
- Use in-page anchor navigation with scroll-margin-top
- Provide a skip link

Elements and CSS used

HTML elements	CSS features
a.skip, header, nav, main, section, h1-h3, article, details, summary, form, label, input, textarea, button, footer	position: sticky, z-index, scroll-margin-top, grid auto-fit, clamp(), focus styles for skip link

Build guide

1. Write the skeleton with four sections that have ids.
2. Add the sticky header with links to those ids.
3. Add a skip link as the first element in body.
4. Style the hero, grid, about and form.
5. Add scroll-margin-top to h2 so anchors are not hidden by the header.

6. Validate the whole page and test keyboard navigation.

Project 1116: index.html

The important lines of index.html

Line	What it does
<!DOCTYPE html>	Declares modern HTML so the browser renders in standards mode.
<html lang="en">	Root element; lang tells screen readers and search engines the page language.
<meta charset="utf-8">	Character encoding: makes Arabic, accents and symbols display correctly.
<meta name="viewport" content="width=device-width, initial-scale=1">	Makes the page use the real device width on phones.
<title>Fayoum Pottery Studio - Complete site</title>	Text shown in the browser tab and search results.
<link rel="stylesheet" href="styles.css">	Loads the external CSS file styles.css.
<header class="site-header">	Introductory content: logo, title, navigation.
<nav aria-label="Main"><ul class="nav">	A block of navigation links; aria-label names it for screen readers.
Workshops <a href="#about">About<...	A hyperlink; href gives the destination.
<main id="main">	The unique content of this page; exactly one per page.
<section class="hero">	A thematic group of content, normally with its own heading.
Wheel throwing and glazing classes	The main heading; only one per page.
Welcome to Fayoum Pottery Studio in Tunis Village.	A paragraph of text.

Line	What it does
Explore	A link styled as a button; it navigates, so it is a link and not a <button>.
Our workshops	Second-level heading for a section.
	Generic block container for grouping and layout.
<article class="card"><h3>Intro to the wheel</h3><p>Three hours, ta...	A self-contained piece: card, post, product.
<article class="card"><h3>Glazing day</h3><p>Colour your pieces.</p...	Third-level heading, inside an h2 section.
<details><summary>Opening hours</summary><p>Saturday to Thursday 10...	Disclosure widget that can be opened and closed.
<form action="/contact" method="post" class="form">	A form; action is where the data goes, method how it is sent.
<label for="n">Name</label><input id="n" name="name" required>	Text label for a control; for matches the control's id, or the label wraps the control.
<label for="e">Email</label><input id="e" name="email" type="email"...	Email field: validated automatically and shows the @ keyboard on phones.
<label for="m">Message</label><textarea id="m" name="message" rows=...	Multi-line text field.
<button>Send</button>	A clickable button; inside a form it submits by default.

Line	What it does
<footer class="site-footer"><p>© 2026 Fayoum Pottery Studio &m...	Footer of the page or of a section.

The important declarations of styles.css

Declaration	What it does
*, *::before, *::after {	Generated content inserted before the element's content (decorations, numbers, lines).
box-sizing: border-box;	Width and height include padding and border, which makes sizing predictable.
:root {	Custom properties (variables) defined on the root so every element can use them.
--brand: #9a3412;	The brand colour variable; change it once and every use follows.
margin: 0;	Space outside the element.
font-family: system-ui, Arial, sans-serif;	The typeface stack: preferred font first, fallbacks after.
line-height: 1.6;	Space between lines; 1.5 to 1.7 is comfortable for body text.
color: var(--ink);	Text colour.
position: absolute;	Removes the element from flow and positions it relative to the nearest positioned ancestor.
background: #fff;	Background colour or image.
padding: .5rem;	Space inside the element between its border and content.
z-index: 100;	Stacking order for positioned elements; higher is on top.

Declaration	What it does
position: sticky;	Scrolls normally until it reaches the given offset, then sticks.
display: flex;	Turns the element into a flex container (one-dimensional layout).
flex-wrap: wrap;	Allows flex items to move to a new line when they do not fit.
justify-content: space-between;	Spreads items so the first touches the start and the last the end.
align-items: center;	Centres items on the cross axis.
gap: .5rem 1rem;	Space between grid or flex items without extra margins.
border-bottom: 1px solid var(--line);	A bottom border used as a separator line.
font-weight: 800;	Thickness of the text.
text-decoration: none;	Removes the underline from links.
list-style: none;	Removes bullets or numbers from a list.
border-radius: 6px;	Rounds the corners.
.nav a:hover {	Applies while the pointer is over the element.
text-align: center;	Centres inline content such as text.
font-size: clamp(1.8rem, 5vw, 3rem);	A fluid value between a minimum and a maximum, based on the middle expression.
display: inline-block;	Flows in text but accepts width, height and vertical padding.
border-radius: 999px;	Fully rounded pill shape.
max-width: 60rem;	Limits how wide the element can grow, keeping lines readable.

Declaration	What it does
margin: 0 auto;	Centres a block horizontally: zero top/bottom, automatic left/right.
display: grid;	Turns the element into a grid container.
grid-template-columns: repeat(auto-fit, minmax(13rem, 1fr));	Defines the columns of the grid.
border-radius: 12px;	The line around the element: width, style and colour.
} summary { cursor: pointer;	Shows the hand cursor to indicate something clickable.
border: 1px solid #bbb;	Changes the visual order of a flex item without changing the source.
font: inherit;	Makes form controls use the page font instead of the browser default.
border: 0;	Removes the default border (for example on an iframe or button).
border-top: 1px solid var(--line);	A top border used as an accent or separator.
scroll-margin-top: 4rem;	Leaves room above an anchor target so a sticky header does not cover it.

Check your work

- Skip link appears on first Tab
- Anchor links land below the sticky header
- One h1
- Form fully labelled
- Passes the W3C validator

Exercises

1. Add smooth scrolling with scroll-behavior: smooth (respecting reduced motion).
2. Add an Arabic RTL version.
3. Split into multiple pages with a shared stylesheet.

Theme data for this project

Field	Value
Business	Fayoum Pottery Studio
Tagline	Wheel throwing and glazing classes
City	Tunis Village
Owner	Ahmed Mahmoud
Brand colour	#9a3412
Accent colour	#fff7ed
Offers	Intro to the wheel (450 EGP); Glazing day (300 EGP); Kids clay class (200 EGP); Weekend retreat (2500 EGP)

Project 1118: Complete one-page website for Cleopatra Beauty Salon

Theme: Cleopatra Beauty Salon (Dokki) | Level 3 | Files: index.html, styles.css

Brief

Combine everything into a single-page site: skip link, sticky header with anchor navigation, hero, offers grid, about with details, contact form and footer.

Learning goals

- Assemble a full page from components
- Use in-page anchor navigation with scroll-margin-top
- Provide a skip link

Elements and CSS used

HTML elements	CSS features
a.skip, header, nav, main, section, h1-h3, article, details, summary, form, label, input, textarea, button, footer	position: sticky, z-index, scroll-margin-top, grid auto-fit, clamp(), focus styles for skip link

Build guide

1. Write the skeleton with four sections that have ids.
2. Add the sticky header with links to those ids.
3. Add a skip link as the first element in body.
4. Style the hero, grid, about and form.
5. Add scroll-margin-top to h2 so anchors are not hidden by the header.

6. Validate the whole page and test keyboard navigation.

Project 1118: index.html

<form action="/contact" method="post" class="form">	A form; action is where the data goes, method how it is sent.
<label for="n">Name</label><input id="n" name="name" required>	Text label for a control; for matches the control's id, or the label wraps the control.
<label for="e">Email</label><input id="e" name="email" type="email"...	Email field: validated automatically and shows the @ keyboard on phones.
<label for="m">Message</label><textarea id="m" name="message" rows=...	Multi-line text field.
<button>Send</button>	A clickable button; inside a form it submits by default.

Line	What it does
<footer class="site-footer"><p>© 2026 Suez Auto Service &middo...	Footer of the page or of a section.

The important declarations of styles.css

Declaration	What it does
*, *::before, *::after {	Generated content inserted before the element's content (decorations, numbers, lines).
box-sizing: border-box;	Width and height include padding and border, which makes sizing predictable.
:root {	Custom properties (variables) defined on the root so every element can use them.
--brand: #374151;	The brand colour variable; change it once and every use follows.
margin: 0;	Space outside the element.
font-family: system-ui, Arial, sans-serif;	The typeface stack: preferred font first, fallbacks after.
line-height: 1.6;	Space between lines; 1.5 to 1.7 is comfortable for body text.
color: var(--ink);	Text colour.
position: absolute;	Removes the element from flow and positions it relative to the nearest positioned ancestor.
background: #fff;	Background colour or image.
padding: .5rem;	Space inside the element between its border and content.
z-index: 100;	Stacking order for positioned elements; higher is on top.

Declaration	What it does
position: sticky;	Scrolls normally until it reaches the given offset, then sticks.
display: flex;	Turns the element into a flex container (one-dimensional layout).
flex-wrap: wrap;	Allows flex items to move to a new line when they do not fit.
justify-content: space-between;	Spreads items so the first touches the start and the last the end.
align-items: center;	Centres items on the cross axis.
gap: .5rem 1rem;	Space between grid or flex items without extra margins.
border-bottom: 1px solid var(--line);	A bottom border used as a separator line.
font-weight: 800;	Thickness of the text.
text-decoration: none;	Removes the underline from links.
list-style: none;	Removes bullets or numbers from a list.
border-radius: 6px;	Rounds the corners.
.nav a:hover {	Applies while the pointer is over the element.
text-align: center;	Centres inline content such as text.
font-size: clamp(1.8rem, 5vw, 3rem);	A fluid value between a minimum and a maximum, based on the middle expression.
display: inline-block;	Flows in text but accepts width, height and vertical padding.
border-radius: 999px;	Fully rounded pill shape.
max-width: 60rem;	Limits how wide the element can grow, keeping lines readable.

Declaration	What it does
margin: 0 auto;	Centres a block horizontally: zero top/bottom, automatic left/right.
display: grid;	Turns the element into a grid container.
grid-template-columns: repeat(auto-fit, minmax(13rem, 1fr));	Defines the columns of the grid.
border-radius: 12px;	The line around the element: width, style and colour.
} summary { cursor: pointer;	Shows the hand cursor to indicate something clickable.
border: 1px solid #bbb;	Changes the visual order of a flex item without changing the source.
font: inherit;	Makes form controls use the page font instead of the browser default.
border: 0;	Removes the default border (for example on an iframe or button).
border-top: 1px solid var(--line);	A top border used as an accent or separator.
scroll-margin-top: 4rem;	Leaves room above an anchor target so a sticky header does not cover it.

Check your work

- Skip link appears on first Tab
- Anchor links land below the sticky header
- One h1
- Form fully labelled
- Passes the W3C validator

Exercises

1. Add smooth scrolling with scroll-behavior: smooth (respecting reduced motion).
2. Add an Arabic RTL version.
3. Split into multiple pages with a shared stylesheet.

Theme data for this project

Field	Value
Business	Suez Auto Service
Tagline	Honest car servicing and repairs
City	Suez
Owner	Khaled Nasser
Brand colour	#374151
Accent colour	#f9fafb
Offers	Oil change (600 EGP); Brake pads (1400 EGP); Air conditioning (900 EGP); Pre-purchase inspection (750 EGP)

Project 1120: Complete one-page website for Luxor Music Academy

Theme: Luxor Music Academy (Luxor) | Level 3 | Files: index.html, styles.css

Brief

Combine everything into a single-page site: skip link, sticky header with anchor navigation, hero, offers grid, about with details, contact form and footer.

Learning goals

- Assemble a full page from components
- Use in-page anchor navigation with scroll-margin-top
- Provide a skip link

Elements and CSS used

HTML elements	CSS features
a.skip, header, nav, main, section, h1-h3, article, details, summary, form, label, input, textarea, button, footer	position: sticky, z-index, scroll-margin-top, grid auto-fit, clamp(), focus styles for skip link

Build guide

1. Write the skeleton with four sections that have ids.
2. Add the sticky header with links to those ids.
3. Add a skip link as the first element in body.
4. Style the hero, grid, about and form.
5. Add scroll-margin-top to h2 so anchors are not hidden by the header.

6. Validate the whole page and test keyboard navigation.

Project 1120: index.html

Line	What it does
Explore	A link styled as a button; it navigates, so it is a link and not a <button>.
Our dishes	Second-level heading for a section.
	Generic block container for grouping and layout.
<article class="card"><h3>Grilled sea bass</h3><p>With rice and sal...	A self-contained piece: card, post, product.
<article class="card"><h3>Shrimp tagine</h3><p>Tomato and garlic.<//...	Third-level heading, inside an h2 section.
<details><summary>Opening hours</summary><p>Saturday to Thursday 10...	Disclosure widget that can be opened and closed.
<form action="/contact" method="post" class="form">	A form; action is where the data goes, method how it is sent.
<label for="n">Name</label><input id="n" name="name" required>	Text label for a control; for matches the control's id, or the label wraps the control.
<label for="e">Email</label><input id="e" name="email" type="email"...	Email field: validated automatically and shows the @ keyboard on phones.
<label for="m">Message</label><textarea id="m" name="message" rows=...	Multi-line text field.
<button>Send</button>	A clickable button; inside a form it submits by default.

Line	What it does
<footer class="site-footer"><p>© 2026 Port Said Seafood &middo...	Footer of the page or of a section.

The important declarations of styles.css

Declaration	What it does
*, *::before, *::after {	Generated content inserted before the element's content (decorations, numbers, lines).
box-sizing: border-box;	Width and height include padding and border, which makes sizing predictable.
:root {	Custom properties (variables) defined on the root so every element can use them.
--brand: #0e7490;	The brand colour variable; change it once and every use follows.
margin: 0;	Space outside the element.
font-family: system-ui, Arial, sans-serif;	The typeface stack: preferred font first, fallbacks after.
line-height: 1.6;	Space between lines; 1.5 to 1.7 is comfortable for body text.
color: var(--ink);	Text colour.
position: absolute;	Removes the element from flow and positions it relative to the nearest positioned ancestor.
background: #fff;	Background colour or image.
padding: .5rem;	Space inside the element between its border and content.
z-index: 100;	Stacking order for positioned elements; higher is on top.

Declaration	What it does
position: sticky;	Scrolls normally until it reaches the given offset, then sticks.
display: flex;	Turns the element into a flex container (one-dimensional layout).
flex-wrap: wrap;	Allows flex items to move to a new line when they do not fit.
justify-content: space-between;	Spreads items so the first touches the start and the last the end.
align-items: center;	Centres items on the cross axis.
gap: .5rem 1rem;	Space between grid or flex items without extra margins.
border-bottom: 1px solid var(--line);	A bottom border used as a separator line.
font-weight: 800;	Thickness of the text.
text-decoration: none;	Removes the underline from links.
list-style: none;	Removes bullets or numbers from a list.
border-radius: 6px;	Rounds the corners.
.nav a:hover {	Applies while the pointer is over the element.
text-align: center;	Centres inline content such as text.
font-size: clamp(1.8rem, 5vw, 3rem);	A fluid value between a minimum and a maximum, based on the middle expression.
display: inline-block;	Flows in text but accepts width, height and vertical padding.
border-radius: 999px;	Fully rounded pill shape.
max-width: 60rem;	Limits how wide the element can grow, keeping lines readable.

Declaration	What it does
margin: 0 auto;	Centres a block horizontally: zero top/bottom, automatic left/right.
display: grid;	Turns the element into a grid container.
grid-template-columns: repeat(auto-fit, minmax(13rem, 1fr));	Defines the columns of the grid.
border-radius: 12px;	The line around the element: width, style and colour.
} summary { cursor: pointer;	Shows the hand cursor to indicate something clickable.
border: 1px solid #bbb;	Changes the visual order of a flex item without changing the source.
font: inherit;	Makes form controls use the page font instead of the browser default.
border: 0;	Removes the default border (for example on an iframe or button).
border-top: 1px solid var(--line);	A top border used as an accent or separator.
scroll-margin-top: 4rem;	Leaves room above an anchor target so a sticky header does not cover it.

Check your work

- Skip link appears on first Tab
- Anchor links land below the sticky header
- One h1
- Form fully labelled
- Passes the W3C validator

Exercises

1. Add smooth scrolling with scroll-behavior: smooth (respecting reduced motion).
2. Add an Arabic RTL version.
3. Split into multiple pages with a shared stylesheet.

Theme data for this project

Field	Value
Business	Port Said Seafood
Tagline	Grilled fish straight from the boats
City	Port Said
Owner	Sherif Wahba
Brand colour	#0e7490
Accent colour	#ecfeff
Offers	Grilled sea bass (320 EGP); Shrimp tagine (280 EGP); Calamari (190 EGP); Fish soup (120 EGP)

Project 1122: Complete one-page website for Delta Kids Library

Theme: Delta Kids Library (Tanta) | Level 3 | Files: index.html, styles.css

Brief

Combine everything into a single-page site: skip link, sticky header with anchor navigation, hero, offers grid, about with details, contact form and footer.

Learning goals

- Assemble a full page from components
- Use in-page anchor navigation with scroll-margin-top
- Provide a skip link

Elements and CSS used

HTML elements	CSS features
a.skip, header, nav, main, section, h1-h3, article, details, summary, form, label, input, textarea, button, footer	position: sticky, z-index, scroll-margin-top, grid auto-fit, clamp(), focus styles for skip link

Build guide

1. Write the skeleton with four sections that have ids.
2. Add the sticky header with links to those ids.
3. Add a skip link as the first element in body.
4. Style the hero, grid, about and form.
5. Add scroll-margin-top to h2 so anchors are not hidden by the header.

6. Validate the whole page and test keyboard navigation.

Project 1122: index.html

```

<label for="e">Email</label><input id="e" name="email" type="email"...	Email field: validated automatically and shows the @ keyboard on phones.
<label for="m">Message</label><textarea id="m" name="message" rows=...	Multi-line text field.
<button>Send</button>	A clickable button; inside a form it submits by default.

Line	What it does
<footer class="site-footer"><p>© 2026 Nubian Guest House &midd...	Footer of the page or of a section.

The important declarations of styles.css

Declaration	What it does
*, *::before, *::after {	Generated content inserted before the element's content (decorations, numbers, lines).
box-sizing: border-box;	Width and height include padding and border, which makes sizing predictable.
:root {	Custom properties (variables) defined on the root so every element can use them.
--brand: #b45309;	The brand colour variable; change it once and every use follows.
margin: 0;	Space outside the element.
font-family: system-ui, Arial, sans-serif;	The typeface stack: preferred font first, fallbacks after.
line-height: 1.6;	Space between lines; 1.5 to 1.7 is comfortable for body text.
color: var(--ink);	Text colour.
position: absolute;	Removes the element from flow and positions it relative to the nearest positioned ancestor.
background: #fff;	Background colour or image.
padding: .5rem;	Space inside the element between its border and content.
z-index: 100;	Stacking order for positioned elements; higher is on top.

Declaration	What it does
position: sticky;	Scrolls normally until it reaches the given offset, then sticks.
display: flex;	Turns the element into a flex container (one-dimensional layout).
flex-wrap: wrap;	Allows flex items to move to a new line when they do not fit.
justify-content: space-between;	Spreads items so the first touches the start and the last the end.
align-items: center;	Centres items on the cross axis.
gap: .5rem 1rem;	Space between grid or flex items without extra margins.
border-bottom: 1px solid var(--line);	A bottom border used as a separator line.
font-weight: 800;	Thickness of the text.
text-decoration: none;	Removes the underline from links.
list-style: none;	Removes bullets or numbers from a list.
border-radius: 6px;	Rounds the corners.
.nav a:hover {	Applies while the pointer is over the element.
text-align: center;	Centres inline content such as text.
font-size: clamp(1.8rem, 5vw, 3rem);	A fluid value between a minimum and a maximum, based on the middle expression.
display: inline-block;	Flows in text but accepts width, height and vertical padding.
border-radius: 999px;	Fully rounded pill shape.
max-width: 60rem;	Limits how wide the element can grow, keeping lines readable.

Declaration	What it does
margin: 0 auto;	Centres a block horizontally: zero top/bottom, automatic left/right.
display: grid;	Turns the element into a grid container.
grid-template-columns: repeat(auto-fit, minmax(13rem, 1fr));	Defines the columns of the grid.
border-radius: 12px;	The line around the element: width, style and colour.
} summary { cursor: pointer;	Shows the hand cursor to indicate something clickable.
border: 1px solid #bbb;	Changes the visual order of a flex item without changing the source.
font: inherit;	Makes form controls use the page font instead of the browser default.
border: 0;	Removes the default border (for example on an iframe or button).
border-top: 1px solid var(--line);	A top border used as an accent or separator.
scroll-margin-top: 4rem;	Leaves room above an anchor target so a sticky header does not cover it.

Check your work

- Skip link appears on first Tab
- Anchor links land below the sticky header
- One h1
- Form fully labelled
- Passes the W3C validator

Exercises

1. Add smooth scrolling with scroll-behavior: smooth (respecting reduced motion).
2. Add an Arabic RTL version.
3. Split into multiple pages with a shared stylesheet.

Theme data for this project

Field	Value
Business	Nubian Guest House
Tagline	Colourful rooms on the west bank of the Nile
City	Aswan
Owner	Fatma Hassan
Brand colour	#b45309
Accent colour	#fffbeb
Offers	Garden room (900 EGP); Nile view suite (1800 EGP); Family room (1500 EGP); Rooftop dorm (300 EGP)

Project 1124: Complete one-page website for Ismailia Cycling Store

Theme: Ismailia Cycling Store (Ismailia) | Level 3 | Files: index.html, styles.css

Brief

Combine everything into a single-page site: skip link, sticky header with anchor navigation, hero, offers grid, about with details, contact form and footer.

Learning goals

- Assemble a full page from components
- Use in-page anchor navigation with scroll-margin-top
- Provide a skip link

Elements and CSS used

HTML elements	CSS features
a.skip, header, nav, main, section, h1-h3, article, details, summary, form, label, input, textarea, button, footer	position: sticky, z-index, scroll-margin-top, grid auto-fit, clamp(), focus styles for skip link

Build guide

1. Write the skeleton with four sections that have ids.
2. Add the sticky header with links to those ids.
3. Add a skip link as the first element in body.
4. Style the hero, grid, about and form.
5. Add scroll-margin-top to h2 so anchors are not hidden by the header.

6. Validate the whole page and test keyboard navigation.

Project 1124: index.html

Declaration	What it does
*, *::before, *::after {	Generated content inserted before the element's content (decorations, numbers, lines).
box-sizing: border-box;	Width and height include padding and border, which makes sizing predictable.
:root {	Custom properties (variables) defined on the root so every element can use them.
--brand: #2563eb;	The brand colour variable; change it once and every use follows.
margin: 0;	Space outside the element.
font-family: system-ui, Arial, sans-serif;	The typeface stack: preferred font first, fallbacks after.
line-height: 1.6;	Space between lines; 1.5 to 1.7 is comfortable for body text.
color: var(--ink);	Text colour.
position: absolute;	Removes the element from flow and positions it relative to the nearest positioned ancestor.
background: #fff;	Background colour or image.
padding: .5rem;	Space inside the element between its border and content.
z-index: 100;	Stacking order for positioned elements; higher is on top.

Declaration	What it does
position: sticky;	Scrolls normally until it reaches the given offset, then sticks.
display: flex;	Turns the element into a flex container (one-dimensional layout).
flex-wrap: wrap;	Allows flex items to move to a new line when they do not fit.
justify-content: space-between;	Spreads items so the first touches the start and the last the end.
align-items: center;	Centres items on the cross axis.
gap: .5rem 1rem;	Space between grid or flex items without extra margins.
border-bottom: 1px solid var(--line);	A bottom border used as a separator line.
font-weight: 800;	Thickness of the text.
text-decoration: none;	Removes the underline from links.
list-style: none;	Removes bullets or numbers from a list.
border-radius: 6px;	Rounds the corners.
.nav a:hover {	Applies while the pointer is over the element.
text-align: center;	Centres inline content such as text.
font-size: clamp(1.8rem, 5vw, 3rem);	A fluid value between a minimum and a maximum, based on the middle expression.
display: inline-block;	Flows in text but accepts width, height and vertical padding.
border-radius: 999px;	Fully rounded pill shape.
max-width: 60rem;	Limits how wide the element can grow, keeping lines readable.

Declaration	What it does
margin: 0 auto;	Centres a block horizontally: zero top/bottom, automatic left/right.
display: grid;	Turns the element into a grid container.
grid-template-columns: repeat(auto-fit, minmax(13rem, 1fr));	Defines the columns of the grid.
border-radius: 12px;	The line around the element: width, style and colour.
} summary { cursor: pointer;	Shows the hand cursor to indicate something clickable.
border: 1px solid #bbb;	Changes the visual order of a flex item without changing the source.
font: inherit;	Makes form controls use the page font instead of the browser default.
border: 0;	Removes the default border (for example on an iframe or button).
border-top: 1px solid var(--line);	A top border used as an accent or separator.
scroll-margin-top: 4rem;	Leaves room above an anchor target so a sticky header does not cover it.

Check your work

- Skip link appears on first Tab
- Anchor links land below the sticky header
- One h1
- Form fully labelled
- Passes the W3C validator

Exercises

1. Add smooth scrolling with scroll-behavior: smooth (respecting reduced motion).
2. Add an Arabic RTL version.
3. Split into multiple pages with a shared stylesheet.

Theme data for this project

Field	Value
Business	Minya Coding Club
Tagline	Free weekend coding for teenagers
City	Minya
Owner	Youssef Hany
Brand colour	#2563eb
Accent colour	#eff6ff
Offers	HTML weekend (Free); CSS art (Free); Scratch games (Free); Hackathon (Free)
